Bill Clinton, the Class of 1996, Harker Hall, Lou Tepper and the splitting of
Yugoslavia. These names and events became familiar to most of us as the 1992-1993 school year at the University of Illinois began with just a slightly different twist.

On August 21, both old and new students viewed the beginnings of the reconstructed Armory building as they struggled to find an opening in one of the many classes that were closed due to budget cuts. If a class was not closed, it had probably doubled in size as students were forced to take discussion sections with close to 60 other students. Professors and teaching assistants had to cut down their load and combine their divided sections into one.

After this frustration, students were able to choose a new direction for their lives as many became actively involved in the November elections. With more student involvement than ever, change was in the making. Students stood in line on November 3, 1992, up to three or four hours for some and made a difference. Illinois elected the first black woman senator, Carol Moseley Braun; the state of California elected two women as their US Senators; and Democrat Bill Clinton defeated Republican President George

On the Quad during Alpha
Kappa Alpha sorority's initiation weekend, Stacy

Simmons, senior in
Communications, dances during the step show. Many Black Greek Council members watched the event to welcome the sorority back to campus.

Bush and Independent Ross Perot to become the 42nd president of the United States. Clinton dealt with the world impact of the splitting of Yugoslavia andthe turmoil surrounding the no-fly zones in Iraq. The U.S. was on an upswing, though, as the economy swelled and merchants did the best in years during the holiday season. Locally, controversy rose as Democrat Laurel

Prussing defeated Republican Greg Cozad to be the 103rd District Representative. After asking for a recount, Cozad lost by just a few votes.

At the U of I , students had to deal with changing images during their everyday routine. No longer could they cut through the Armory track, as it was now open only to the public at specific times. Harker Hall, the oldest building on campus, received its final restoration to become an administrative building. Memorial Stadium also completed its facelift as fans got to sit on new benches, and the west side was refurbished.

The Division of Intercollegiate Athletics welcomed new coaches into their system. Mark Johnson became the new head wrestling coach, Craig Tiley was appointed the new head men's tennis coach, and Lou Tepper assumed his full-time position as the head football coach after being named to the position before the 1992 John Hancock Bowl.

A picture depicting
the story of the Good
Samaritan by Louis Tiffany
adorns the side of the McKinley Foundation.

The window is the only
Tiffany stained glass
that exists in the
Champaign-Urbana area.

Students became active on campus as well. When Christopher Lloyd, sophomore in ALS, was disciplined by the university for his part in the Latino/a demonstration at the Henry Administration building during the spring of 1992, students erupted into protest as he was the only participant who was put on trial. Students and members of the community slept on the

Quad to protest violence against women. People once again lined up to protest against Chief Illiniwek at various athletic events.

Different events and happenings kept students hopping, from Quad Day and a chance to join their favorite organization to the Def Leppard concert where students could sing their heart out to their favorite song. A disappointment on the concert scene, however, was when U 2 refused to make a stop at Memorial Stadium on their worldwide tour after selling tickets to the show. Besides concerts and activity days, students filled their time by attending movie openings like The Last of the Mohicans and The Vanishing. They also saw the last of The Rocky Horror Picture Show at the New Art Theater before small crowds forced it to close.

As a whole, however, students participated in a variety of activities to make their 1992-1993 school year slightly different from those before.

Randy Johnson dances with his daughter, Kim, junior in CBA, during the halftime activites of the Marching Illini's Dad's Weekend show on

November 7. The Flag Corps and the Illinettes traditionally bring their fathers on to the field to do a dance at the end of the performance.

## student life

"What are you going to do with your LIFE?" they asked you when you graduated from high school. "I'm going to college!" you said confidently, "I'm going to major in...and become a..."

Little did you realize how much more to college there is than studying, exams, residence hall meals and GPA's. If there were only books and professors for enjoyment, you wouldn't have a life! That's what makes each year different from the last. Your four (or so) years here provide you with more than a degree....

During 1992, record numbers of students participated in the "democratic process" by voting. Political fever soared (on both
sides) as Hillary Clinton visited campus to campaign for her husband, our new president, Bill Clinton. Other interesting results of local elections included the first Afrikan-American female in the Senate, Carol Moseley Braun and a controversial win for Laurel Prussing as State Representative. On a less controversial front, many of us dealt with new computerized ID cards and getting jobs. But our lives were made interesting by these daily activities. So, yes, we've studied this year, but we've also spent our time getting interesting jobs, creatively ditching dates, getting our cars towed, decorating our apartments, joining clubs and teams, bar hopping, catching some local bands, flashing back to the golden days of our youth with "Eighties" music and basically doing anything to make this year just slightly different than last.

# Local bands try to make it or break it in the local bar scene and beyond. 

## story by Michelle A. Johnson • layout by Raleigh Bennett

o we're jamming out in Bob's basement and this talent scout knocks on the back door. The dog starts barking, so Jason heads upstairs and opens the front door for this guy who claims he's with this obscure independent record label who wants to cut a deal with us. He was just getting into the details when my alarm went off," an acoustic-playing narcoleptic (desiring anonymity) said of an earlier dream. If getting signed to a major record label is a dream come true for a beginning band, getting a gig in Champaign is just as idealistic. According to the Blind Pig, 30 to 40 bands and performers call daily with the intent of getting stage time. But for bars like Mabel's and the Blind Pig, staging bands is based more on a marketing strategy that targets students and the community rather than one that pleases the various bands.

The optimal goal is to hit as many crowds as possible by dividing the week up musically so the same type of music is played on the same day every week. Band and performance selections usually fall into three categories: bands who are established and bring in a good-sized crowd are booked more often; new bands are spaced so they have time to build a following, and old, established bands who don't bring in people are...avoided. The Blind Pig, in particular, holds a commitment to the local music community and books local performers 98 percent of the time. The remaining twopercent consists of established national or out-of-town performers contracted through agencies. Benefits like the "Great Cover Up" for muscular sclerosis and the WEFT fundraiser also give performers exposure for a good cause.
"So far we've played a couple of parties. Right now it's just hard getting everyone in the band together for practice sessions. Hopefully after the semester slows down we'll have more time to get it together," James Harper, junior in LAS and acoustic guitar player of Lorenzo Music, said. "Champaign is a good place to be for music. There's a lot of talent down here, but it's small enough to get to know other people's music. The musical community here is conscientious, and that really makes the difference."

# Champaign-Urbana's Biggest Venues Bring a Variety of Entertainment to the Community and Campus 

story by Lainee D. Frizzo • layout by Raleigh Bennett

$\square$
or nearly 30 years Assembly Hall has been providing Champaign-Urbana and the $U$ of I with a multitude of quality entertainment. This March it celebrated its Anniversary by inviting its first acts to return for encore performances. Among thoese returning were the New York Pops, Peter, Paul and Mary, and the very first act to ever appear in Assembly Hall, the Ice Capades featuring ice-skating legend Dorothy Hamill.

In the tradition of bringing quality entertainment to the area, Assembly Hall started off the season with comedian Howie Mandel's performance for the U of I Student Expo.
"I'd seen Howie Mandel's act before, and it was still funny, but to be honest, I was much more impressed with the size of Assembly Hall than the show. That place is HUGE!" Jennifer Smejkal, freshman in Education, said.

With the community's taste in mind, Assembly Hall featured such acts as country-western heart-throb Garth Brooks, comedian George Burns during Homecoming festivities, the family favorite Sesame Streeet, and even the World Wrestling Federation.

Musical acts included such legends as Tony Bennett and Doc Severenson. Also, Assembly Hall featured the musical "Annie" and the play "Love Letters."
"Believe it or not the highest student attendance was for Monster Trucks. We were pretty surprised," Xen Riggs, Associate Director of Assembly Hall, said. Besides the Monster Truck Show, Assembly Hall catered to the student mentality by featuring acts such as Def Leppard, The Black Crowes, Ice Cube, Penn and Teller which boasted a huge student turn-out, and the annual Marching Illini show.

In connection with Assembly Hall, Foellinger Auditorium brought entertainment to the Champaign-Urbana area as well. Musical guests sponsored by Star Course (a student organization) included Sonic Youth with Royal Trux, and Soul Asylum with Lemonheads and with Walt. Other shows were the fall musical, Little Shop of Horrors sponsored by the Illini Union Board, Cartoon Concert sponsored by the Sequential Arts Society and a performance by the Other Guys, a branch of the Men's Glee Club. (continued on page 14)

## ON WITH T HE SHOW

Conic Youth played before University students at Foellinger Auditorium Starcourse brought the group to campus.

Def Leppard rocked Champaign at Assembly Hall on December 6. The group toured through Champaign-Urbana for the first time.

$T$ he crowd at the Sonic Youth concert sings along with the music. Fans obtained tickets through a lottery system.

(continued from page 12)
Foellinger was also a convenient location for various Greek events such as Rush Orientation and the New Greek Institute Lecture sponsored by The Panhellenic Council. Also, Alpha Phi Sorority sponsored King of Hearts, and Atius Sachem held their Mom's Day Sing at Foellinger.

Besides entertainment, Foellinger also brought informative, sometimes controversial lectures to the area. For instance, many students attended Intervarsitysponsored Cliff Knechtle's lecture about religious beliefs and the answers to student's burning theological questions like "Why shouldn't I sleep with my boyfriend?" The controversial censorship debate between anex-Public Enemy rapper and the prosecuting attorney in the 2LiveCrew case was also held here.

These and other events kept students entertained throughout the year as Champaign-Urbana became a stop for some legendary and some not so legendary performers.

Jome to the Fighting Illini basketball team, Assembly Hall serves as a host to many guests visiting the ChampaignUrbana entertainment scene. During 1992-1993, Assembly Hall hosted acts such as Howie Mandel, Sesame Street On Ice and Def Leppard.

# How professors spend their time outside of the office and classroom isn't so different from students. 

story by Michelle A. Johnson • layout by Peggy Christensen
y night most students are either wrapped up in studies or involved in other activities, from anything such as participation in student organizations to drinking at the bars. But the question is, where do those professors who delegate your workload by day spend their nights? Richard Schacht, a professor of philosophy who recently performed in the Krannert Center's production of "Oklahoma!", said he sleeps about five or six hours a night. In the earlier evening he attends lectures and rehearsals, and practices the French horn at least one hour every night. Half of his time spent in his office is dedicated to his work as a scholar and philosopher, the other half as teacher.
"Late night time is always work time, usually spent grading, reading dissertations, and doing course preparation related to teaching. I'd say 360 days a year my evenings include work. My evening time is really my precious time," Schacht said.

Brian K. Johnson, an assistant professor in the journalism department, said his night life includes a variety of different activities outside of the time consuming work of class preparation.
"Sometimes my wife and I go to the Blind Pig, usually on Reggae, Blues and Jazz nights. We like to eat out, but we usually end up frequenting the same three places over and over. We also like to travel, sometimes to Chicago for a weekend, or sometimes to New York or California where we have relatives. I also teach an adult education class in photography once a week and take aerobics classes twice a week and on Saturday mornings," Johnson said.

Steven P. Hill, associate professor in Russian, who always uses his middle initial to keep himself separate from stage name of Solomon Berg, has a personal nighttime favorite.
"I watch Robert Stack's Unsolved Mysteries religiously every Wednesday night at 7 p.m., like clockwork. I find it to be the modern equivalent of my childhood favorite, Sherlock Holmes."

According to a sociology professor, who wished to remain anonymous, most time is spent, like other professors, preparing for class lectures in addition to conducting ongoing research and improving previous lectures.
"We carouse too, but the last time I went out I ran into dozens of my students, and it was a little strange. Maybe that's why we don't go out so much!" she said.

All in all, professors are people too, and probably have much more work to do than the average student can complain about all week. That is probably another reason they are rarely seen by night!
ACTIVE ACADEMICS

- Cassandra Ecker
ngela Winfield, senior in Communications, erters data into a desktop computer. Many students on the "WILL" staff are in the workstudy program.

# For over 50 years, "WILL" and its subsidiaries have entertained the Champaign area with the news and music of the times. <br> - • • 

story by Lainee D. Frizzo • layout by Peggy Christensen

ILL's first listeners were the only 15 people in Champaign-Urbana whoowned FMreceivers. Since that fall of 1941, the audience has exploded. At that time, WILL became the first FM station licensed to a university. However,Mary Gramsas, the station's master control room operator said, "I'm still shocked and saddened that more students don't know about their own university station."
WILL consists of two radio stations and a TV station. "The stations are two totally different services, except on Christmas morning when we play the same traditional carols," Gramsas said.

AM 580 was established in the early twenties and is basically a news and information station, broadcasting news from the National Public Radio, American, British Broadcasting Corporation (BBC) and other foreign services. FM90.9 is a classical station that surrenders to jazz on Saturday nights.

Although the two stations are separate now, they both cooperated with the U of I's School of Music to broadcast in stereo before the actual stereo was invented. By recording the left side of the orchestra on one audio channel and the right side on another, they would broadcast one channel on FM and one channel on AM for the stereo effect. Also, the two stations are run from the same control room in Gregory Hall. Since Gramsas is responsible for any accidents like "dead air," she listens to both stations at the same time; AM in one speaker, FM in the other.

Most of WILL's staff are full-time academic professionals. "Although we're not exactly like WPGU where the students do all of the programming, students can get involved," Tracy Conrad-Katz, media liaison for all three WILL stations, said. "Some students run cameras, and we've aired student documentaries."

WILL's TV station, Channel 12, recently aired student documentaries such as "Drinking 101-An Intro to Drinking at the U of I" and "Date Rape," both produced by students in Jerry Landay's documentary course in the School of Journalism.

Most of the time the students who work at the station help out with basic work like Angela Winfield, senior in Communications.
"I help out by distributing programs of the week's activities to the listeners, and I answer phones to help the full-time secretary," Winfield said.

WILL TV was established in 1955 as an alternative to commercial networks and airs mostly Public Broadcasting Service (PBS) programs, such as Sesame Street. Like most PBS stations, channel 12 is a non-profit corporation that does not interrupt its shows for advertisements.
"It's our goal," Katz said, "to provide high-quality, educational programs for everyone."

## "WILL": A

UNIVERSITY CLASSIC

# Everyone should be challenged and inspired to make a change within themselves and within their people. 

story by Tina Jordan • layout by Amy A. Dooley

oming together and discussing current Afrikan-American issues is very important. "The Ritual" at the U of I was originated in 1989 by now alumnus Darwin F. Brown to serve this purpose.

The event was held September 20, 1992, in the Illini Ballroom by Delta Sigma Theta sorority and Alpha Phi Alpha fraternity. The theme was "Liberating Our Minds: Preparing For Revolution," and the guest speaker was sociologist, publisher, editor, and playwright, Useni E. Perkins. The ceremony opened with an inspirational prayer recited by Marcie Edwards, senior in CBA.
"I would describe 'The Ritual' as a program designed to promote awareness and unity among the Afrikan student population. Each person should walk away challenged and inspired to make a change within themselves and within their people," Angela Hunt, senior in Communications, said.

Perkins addressed racism in today's society, the development of Afrikancentered educational institutions, and the likeration of Afrikan-American people. He also recommended a list of ten Afrikan-centered books for students to read in order to prepare for revolution and free their minds.
"'The Ritual' is important because there needs to be more time for us to educate ourselves about ourselves. Many will not doit individually, so at least there are outlets like this for us to do it collectively," Renee Drane, senior in Communications, said.

Perkins delighted the students with a poetry selection of his entitled "Brother Do You Dig?" which asks the black man if he is content with the state of African-Americans in America.
"If nothing else, 'The Ritual' has helped to make some sisters and brothers aware or more aware of what the black community faces. Now, whether or not people choose to do something about it, is another issue," Kimberly Evans, senior in LAS, said.

Near the end of the event there was a "Say What You Feel" segment in which the audience was able to express their feelings regarding the topics that were discussed.
"I think it is an excellent program. I have attended it for the past four years, but I was particularly disappointed with the turnout this year. In the past, the turnout has always been good. I think it is just a sign of the nonchalant attitude that the Afrikan-Americans on campus are sadly taking," Anita Terrell, senior in CBA, said.

Perkins ended the evening with a quote from the author and former slave Frederick Douglass: "If there is no struggle, there is no progress."

 better!!}

## story by Michelle Johnson <br> layout by Mike Krupicka and Ryan Almon

mm . . . Espresso Royale, the Red Herring, the First Presbyterian Church, the New Art Theatre, and Jerry's IGA - what do these places all have in common? They areall Model Communities!

You may have passed the McKinley Foundation a dozen times, but you may not know that located inside is the Central States Education Center, home of Model Community. This organization defines itself as a practical approach to today's environmental crises. It trains volunteers to help transform the way local institutionshandle their wasteand recyclables. To becomea model, an organization mustmeetstandardsinfourareas: preventing unnecessary waste, eliminating toxins, purchasing recycled products and recycling plastics, aluminum, and other recyclables. Model Community has already changed the way approximately twenty businesses on campus think about waste, and how they can reduce and reuse it.

Student volunteer Erin O'Rourke, senior in LAS, described Model Community as an excellent program to be involved in. "It's good because it's progressive. It takes a comprehensive stance on waste, with reduction in the forefront."

One of their newest projects is to turn the entire Greek System into Model Communities by 1996. Members of the Greek Environmental Committee approached Model Community in Spring of 1992 to see what they could do to make a difference.
"TheGreekSystemisoneof thegreater contributors tolandfills, mainly due to the fact that there are so many students living in Greek houses with improper waste management. The mostimportantchangeistoincreaseeducationonhow toreducewaste, notjustrecycle," Meg Drew, junior in LAS and member of the Panhellenic/IFC Greek EnvironmentalCommittee, said. Currently AlphaOmicronPi, at706SouthMathews AvenueinUrbana, isthefirsthouse to be certified as a Model Community.
"Ourgoal is todevelopastrongsenseof communityand civicpridewithinbusinessesand now within the Greek System. Students can practice values here at the university and take them with to other communities and workplaces after graduation to make this a more sustainable world," John Thompson, Executive Director of the non-profit environmental organization, said.

Thompson, a U of I graduate, hopes that the program will serve as a springboard to get students involved in other environmental activities.

The University YMCA, WPGU, Pizza Hut, UpClose Copies, Busey Bank . . . the list continues. Thompsonhopes for Modelday carecenters, Modelapartmentbuildings, Model bus systems, and maybe someday a Model World.

# Afrikan American students on campus celebrate homecoming with style and a touch of elegance! 

story by Toi Walker • layout by Jill Kogan

very year an Afrikan-American group hosts the Afrikan-American Homecoming celebration. On October 24, from 7 p.m. to 12:30 a.m., the Afrikan-American Programming Committee under the Illini Union Board hosted "A Night Under Egypt." There were refreshments, a disc jockey, a photographer, a fashion show and a coronation ceremony.

First, everyone came and socialized. People walked around dressed to impress, full of cheer. Many people got in line to take pictures. The music was blaring, and people began to dance.
"I felt that Homecoming was a time when Afrikan-American people could get together as a family. It was a very relaxed atmosphere, yeteveryone was dressed up. We just had a very good time. The music was pumping - it was great!" Ronda Brookins, junior in Education, said.

After about two hours into theevening, the fashion show began. There was casual wear, after-five attire and Afrikan fashions. The scenes were choreographed to music, and the whole show was very upbeat and lively.
"I thought that adding the show to theevening broke the monotony. You can only walk around and talk to people for so long. People were just having fun!" Akieva Harrell, senior in LAS, said.
"I missed all of the food, which only made the floor sticky. So to me that was a waste of time. But the music was great. And the fashion show was a new idea that they should definitely want to do again," Heather Duncan, senior in LAS, said.

Over 1,000 people came to the celebration. This number was well over the expected turn-out. Many people attribute this to the addition of food and the fashion show to the evening.
"I, for one, was very impressed with the turn-out, as well as the fact that everyone genuinely seemed to have a good time. The only thing that I would have suggested to change was the time of the fashion show. The show should have been at the beginning or the end of the dance; by it being in the middle it slightly altered the flow of the music for the dance. Overall, I enjoyed it very much, even though I didn't get to party that much, being the DJ!" Rasul Freelain, senior in Education, said.

ugo Perales, junior in LAS, works as a night clerk in order to earn money. Perales worked Sunday nights at Illinois Street Residence Halls.
hanging the cloth towel dispenser, Jeff Holtz, senior in education, performs his duties at the Illini Media Company. This job as a night janitor is one of Holtz's five jobs.

# Late night and odd jobs might be good for the extra money, but they can be tiring for everyone involved. 

story by Michelle A. Johnson•layout by Peggy Christensen

acrificed, whether it be for grades or for money, is sometimes necessary just for one to stay in school. In the latter situation, students may find themselves taking any available employment opportunities - from cleaning classrooms in the wee morning hours to keeping an eye on dorm lounges all night long.

Dee Vaughn, sophomore in LAS, is one of these students who must stay up all night to make ends meet. She works as a night clerk at the Gregory Drive Residence Halls from 11 p.m. to 3 a.m. most nights and from 3 a.m. to 7 a.m. on Tuesdays.
"Thursday nights we get a lot of drunks, but on Tuesday's I hardly see anyone," Vaughn said. "The earlier shift is pretty easy for me, because I've always been a night owl, but the 3-7 is kind of bad, because I end up staying up all night. All in all, it's a good quick way to make money. You get paid for studying and telling people to be quiet."

For Mandy Wright, freshman in CBA, who works 40-45 late night hours a week at Steak and Shake, the situation is not so bright.
"I come from a middle class family of four and can get no financial aid from the university. I work five and six days a week just to take care of myself and to pay my rent. The only day I really have off is Sunday, and I just sleep. I feel I shouldn't have to work this hard, but at the same time, it's helped medeal with reality. It just doesn't seem fair to me that people who aren't even American citizens are given a full ride, and I don't even get the luxury of sleep," Wright said.

The fact is that many students take the late night hours because they are the easiest times to fit into class schedules and are often the highest paying jobs available. For instance, the Department of Operations and Maintenance offers late night custodial work at the rate of $\$ 6.54$ an hour, which is more than what many businesses in the area offer to students, outside of waiting tables where income often fluctuates. But, according to the Department, turnover rates are high due to the fact that students have a hard time adjusting to the hours or accrue too much "convenience" time oversleeping before their shifts.

Late night work is definitely not for everyone, and those who don't absolutely need the money should probably consider themselves lucky.
"I think the first thing I'm going to do when I get my diploma is send a copy to the financial aid department," Wright said. Other needy students denied aid, like Wright, probably share her sentiments.

MADNESS

# The Asian American stereotype is not only being challenged on the college campus, but everywhere. 

story by Toi Walker • layout by Monica Soltesz

s many people know, "political correctness" determines how people refer to ethnic groups or terms that denote sexism like, African American for Blacks or home engineers for housewives. It permeates most of the media, academic and society at large, and plays a large part in the way society labels people or behaviors.

Recently there has been an upsurge on campus for the term Asian for people who used to commonly be referred to as Oriental. According to some, the term Oriental does not give its people a place to claim. It simply refers to the East, so that some feel that calling someone Oriental legitimizes the stereotype that all Orientals look alike. On the other hand, one university student doesn't see the problem at all, and is comfortable with calling herself Oriental. She described all the fuss as basically a waste of time.

One popular oversight is that not all "Asians" are Chinese or Japanese. All Asians do not look a-like. All Asians are not science geeks or computer nerds. All Asian people do not speak their native language just as all people of French decent do not speak French. There are many different countries with different languages, customs and cultures that make up our Asian community here on campus. "I get upset when people assume that I'm Chinese when really I'm Japanese. I don't care whether or not you call me Oriental. I just hate when people conform to stereotypes," Mai Shiozaki, junior in Communications, said.

Racism and sexism in any form is very dangerous. It strips people of the right to be individuals. It makes one person symbolic of a whole group. Like all women drivers are terrible. According the media, only Black people do drugs. Based on cartoons like Tom and Jerry, all Mexicans are drunk. Racism affects everyone and generalizations do nothing but feed stereotypes.

Under the umbrella of political correctness, the university is supposedly trying to move towards multicultural education to promote a multicultural society. The real definition of multiculturalism is when all cultures can live peacefully side by side working together. So the evidence of a truly multicultural society will be when everyone freely displays their own unique cultures. We will be much closer when people start feeling comfortable about asking, What nationality are you? instead of Who cares. You people all look alike!

# Greek students find help and advice among trusted friends in their chapters. 

story by Lainee D. Frizzo • layout by Raleigh Bennett

t's not just wild, beer-guzzling orgies like Animal House anymore. Sure, you've heard about the frat parties, the exhausting summer days of Rush, the exchanges at Kam's. But did you know about the caring, sensitive side to the Greek system? The Greek Peer Advisor program, established to help fellow greeks, is part of this nurturing side and is an asset to every chapter involved.
"Greek Peer Advisors are like RA's, only on more of a peer level," Anne Perry, Graduate Assistant for the Greek Peer Advising office, said. These advisors are practically the same age as the students in their houses, and members from nearly every greek chapter on campus are involved. Perry and her staff in the office of the Student Services Building train these chapter representatives to be peer advisors to their own chapters.
"The format is good as opposed to the dorm RA's because guys in my house know I have a close relationship with the guys here," Thomas Daveoren, Greek Peer Advisor for Sigma Phi Epsilon and senior in CBA, said. Daveoren and other greek peer advisors are approachable because fellow chapter members can feel comfortable discussing their problems with them.
"It's a great program. It provides chapter members with a listener they know they can trust with their problems and can depend on for help," Victoria Lutz, Greek Peer Advisor for Sigma Kappa and junior in LAS, said. "The problems they come to you with depend on the individual. I've had to deal with very, very small problems to very, very big problems." Lutz has had to help her sisters with minor problems such as finding a reference or a phone number. However, on occasion, Greek Peer Advisors like Lutz have to handle bigger problems by finding a support group for a chapter member or helping a student deal with rape.
"Greek Peer Advisors cut the red tape between students and university resources," Daveoren said. Chapter members can go to advisors like Daveoren when they need help with anything from eating disorders to alcohol dependency. They can also consult these advisors about just what resources the university has to offer.
"The Greek Peer Advisors also have a support network of their own so they don't get overwhelmed," Jill Gordon, senior in LAS and member of Alpha Xi Delta sorority, said. Gordon has been involved with Greek peer advising for three yearsone as an advisor in her house and two as a board member. She is in charge of a group of 15 advisors who form a network. By helping these Greek Peer Advisors with any of their own problems, this network ensures that they don't get bogged down.
"We Greek Peer Advisors are here to help our chapters with anything that anyone feels they need," Lutz said. "We basically help people attain their goals."

## A DV ? <br>  FELLOW GREEKS

n a leadership retreat, Greek Peer Advisors took the Cobweb Challenge. Working as a team, they moved their entire group through the cobweb not allowing anyone to touch the web itself.
reek Peer Advisors participate in the Leadershape Obstacle Course. The obstacle course required that the entire group work together to get everyone up on the log.

The Illio has been a major part of this university for the past century. It has undergone many small changes each year of its existance. This gradual change has produced a book that, 100 years later, does not even remotely resemble its first predecessor.
The book was originally more of a literary collection with a few highlights of campus happenings. Photos were hardly used and hand crafted artwork was very important to the overall design. The books were dated two years after their production because the year in the title was the year of the class that produced it. The sophomore class, because of tradition, published the book annually and presented it to the graduating class as a gift.

Eventually the job of production was handed over to the junior cl and the title year became only o more than the year of its actual publication. In 1931 the title dat caught up with the publisning y causing two books to be titled 1 (one book actually made in 1931 and the other book produced by junior class in 1930 but titled 19 This section of the 1993 Illio highlights a few of the last 100 boo Each page contains photos and artwork from each decade with a $l$ information to go along with it. Th large grey numbers behind the pho and captions tell the year of the bo where each image appeared. Hopefully this section will show $h$ the Illio and the university have changed over the past century.

With hopes and aspirations for world peace, 9000 marchers hiked to Westside Park to protest the univerrsity's policy toward the Viet Nam War. The war was also being protested in the heart of campus the same day, October 15, 1969, as students formed a human peace symbol on the Quad.

A U of I student sports the latest fashion of the 70s. Fashion photography and the media industry have always had a big influence on the clothing of college students.

University women protest at the state capitol while lobbying for the Equal Rights Ammendment. Crowds at the demonstration shouted phrases such as "ERA now!" and "200 years too long."

In 1982, pledges from Alpha Kappa Alpha step in line down the Quad. AKAsorority was re-established this year after being discontinued on campus for the past three years.

Where was the first campus library?
In the president's office. Students had to check out their books from President John Milton Gregory.
How did the university's name change from Illinois Industrial University to the University of Illinois?

In 1881 editors of the Illini (the original name of the campus newspaper) changed the master head of their paper to read "Published semi-monthly by the students at the University of Illinois." On June 19, 1885, the Illinois legislature officially changed the name.
What was the first fraternity on campus?
Legally, Delta Tau Delta, was the first on campus, but it was rumored that Phi Kappa Psi may have been secretly established in one of the old residence halls in 1872 when fraternities were still banned from campus.
Why was the Ag Club Quartet arrested by the Urbana police in the 1920s?

The quartet woke up the women of Alpha Gamma Delta sorority one night with a half hour serenade.
What caused the ratio of of men to women on campus to drop almost overnight from 3-1 to 1-4?

The beginning of World War II.
What was the motto of the Anti-Lipstick Society in 1937?
"Lips that touch lipstick shall never touch mine."
What was a cause for being depledged by a sorority in the 1950s?

Nosepicking.
When did the U of I establish the first cheerleaders?
In 1902. Women were first allowed onto the squad in 1950.
When did the university become the first Big Ten school to admit women into the band?
1971.
oy George is velcomed to mbly hall in fall of 1984. Star Course nged for the ndrogonous star and his and Culture $b$ to perform at the university.

# Vanity license plates on a car reflect both the personality of the car as well as the driver. <br> - - - 

story by Holly Bergren • layout by Monica Soltesz
ome people belive that your car tells everything about a person. For University of Illinois students this is no different. With everything from customized paint to personalized license plates many students can pick their car out of a sea of others parked in the streets of Champaign-Urbana.
"Sometimes it is strange to walk around campus and see all of the cars with the personalized plates. It makes me wonder what the people are like who drive them," Kara Kelleher, junior in LAS, said.

Many times people get personalized plates just for the fun of it. It does not cost anymore money to order the plate if it has seven figures in it including at least one number.
"If I had a car I would think about getting a personalized plate because I think they are different," Angela Kotsalieff, sophomore in LAS, said.

Other students drive cars with personalized plates because their parents drove the car first and just did not bother to change the plates.
"My father has always had a personalized plate and when he gave my brother and I the car for school it just stayed on there. It was no big deal except we drive around with 'MR BRES' on our car," Joe Bresingham, junior in ALS, said.

There are those car owners who order vanity plates because they want to remember a certain event or happening in their life. Some people commemorate their graduation or their birthday and even sometimes the completion of a special project they have had to work on for a long time.
"I have a lot of friends who have vanity plates. Most of them got the plate as kind of a joke, but they can be a lot of fun," Becky Sushak, senior in CBA, said.

So, the next time you see a license plate and cannot figure out what it is supposed to stand for, remember that every plate is an individual thing and you do not know what type of person they are. If you want to find out just wait and see.

## Returning students know where they're going.

story by Michelle A. Johnson • layout by Ryan Almon

or many students, attending college seems like the next logical step after high school. However this has only become somewhat of a norm in the last fifteen or twenty years, especially for women and minorities. More and more often students above the typical college age of 18-22 are returning to school to earn undergraduate and graduate degrees.

Students return for a variety of reasons. Some are no longer satisfied in their current careers. Some can make more money in their careers with more education. Some seek the education to increase their number of opportunities, making themselves more marketable. Some take on completely new interests which require different types of education, and some do it simply for the sake of learning.
"I earned a degree in chemistry back in 1975," Terry Goncorsky, junior in LAS said, "and I worked in a laboratory for a number of years, but I just couldn't see how I was going to achieve any other goals without more education. I'd really like to get some literature published, and a degree in rhetoric seems more like a means to an end."

Many returning students report that they feel much more focused than they would have if they had started school at 18 . Having the opportunity to experience the working world and life in general, they feel they have more precise career goals.
"My daughter is twenty-two right now, and she has changed her major probably five times, and now that she is receiving her degree in advertising, she's decided she's going to take the MCAT," Cindy Miller, junior in CBA said, "My company is sending me to school to work in higher management, and I really enjoy the work I do there. I have my career outlined for me."

Anne Cona, sophomore in LAS said, "You make a lot of decisions in life, and in mine, my family was always first. But the key to life is keeping your mind active. Education is lifelong, whether you're fresh out of high school or whether you have ten grandchildren like myself. Just keep learning and challenging your thinking."

Education is for everyone at any age, and is always there for those who seek it, at any stage in life.

## OLDER AN D WISER

24 Hours in the Life 41

## Most students have to get by these people no matter where they have to go to have some fun: bartenders and bouncers.

story by Lainee D. Frizzo • layout by Meg Wyatt

ou've seen the lines. You've heard the excuses. You've smelled the stale beer from blocks away. Yes, we're talking about the U of I bars! Not only the bars, but those hardworking people who let you in and get you drunk - bouncers and bartenders.
"I just love that feeling of power when they wait in line an hour and I tell them they can't come in," Cochrane's bouncer John Sweetwood, senior in LAS, said. Although most of us just take that humiliating walk home (okay, to another bar...) some students actually offer excuses.
"This one guy's driver's license had staple holes in it. So, he said that he held it over a flame to melt the staple holes so the cops wouldn't see it. But, then it got wrinkled so he put it between two metal plates in the microwave to flatten it out, but it still wasn't right so he ironed it. Of course, I didn't let him in to the bar," Sweetwood said.

Still others try to manipulate their way in. "One time this cute girl wearing next to nothing came up to me, but I wouldn't let her in so she grabbed my crotch. I was going to say, 'O.K. You're in. No cover, free drinks!'" Cochrane's manager Nick Ricci, senior in Agriculture, said.

But when the excuses and blatant flirtations don't work, we get desperate. "The worst attempt I know is when a white girl tried to use a black lady's ID," Joe's bouncer Matt Ambrose, senior in LAS, said.

When you finally get inside you grope your way to the bar. So how do you get the bartender's attention? Scream? Yell? Bang your empty glass down on the counter? "I won't ignore the obnoxious people," Eddie's bartender Kevin Vaughn said, "but their drinks will be rather weak."
"The people who aren't tipping are the people you end up ignoring. It's kind of like revenge," Joe's bartender Norma McEldowney, senior in CBA, said. And most of us don't tip - be honest!
"Bottles of beer are a buck ninety-five, and they will wait there for that nickel," Ricci said.
O.K. So we have no money. What's the matter with saving on tips or even trying to kiss up to the bartender to sneak a free drink? "Everybody wants a free drink," Mike Scariano, Kam's head bartender and senior in LAS, said. "One girl even showed her breasts for five shots of Jaegermeister."

ason Gilroy, senior in LAS, verifies a student's 1D outside C.O. Daniel's at the beginning of happy hour. Bouncers must check every ID before a student can enter the annou Subeck, junior in CBA, makes an announcement over the loud speaker at CO Daniel's. Campus bartenders announce last bar during evening hours. calls at about $12: 45 \mathrm{a} . \mathrm{m}$.

ave Frankel, junior in LAS, counts change for a customer at C.O. Daniel's. C.O. Daniel's holds different theme nights throughout the week to entice students to come.
t O'Malley's, Amy Lafoon, senior in LAS, and Amy Howard, graduate student in Education, toast near the end of the night Many times the bartenders at various bars celebrate the end of the night with a "Miller Time" call.

# Residence hall students were issued computerized ID cards this year to streamline cafeteria entry. 

story by Lainee D. Frizzo • layout by Bob Gonzales

any of you may have noticed your pants fitting a little a tighter this year. Not because of water retention or any strange sort of growth, but because of the added weight in your wallet. A good portion of the student body received a new type of ID. Thanks to advanced technology, these neat little cards store information like whether or not you've eaten lunch today.

Currently, one of the few uses for the new computerized IDs are dining room access. "It's not that hard to use them," Heather Peters, junior in LAS and BuseyEvans cafeteria worker, said, "And the only problems I've ever had with the card is when the machine says 'meal already ate,' and the person hasn't eaten yet. But we just write down their social security number and let them in." Fortunately, situations like this happen rarely, and the computer always knows if you have a meal plan.
"Ultimately, these cards will be used for charging expenses in retail stores such as the Illini Union Bookstore, cash food service operations, like Down Under, check cashing at the Union, and admittance into buildings instead of keys," Will Bredfield, spokesperson for Campus IDs and the Illini Union Bookstore, said. However, this process may take a little while. The committee in charge of the new IDs has been pushing this project for nearly five years, so don't try to cash checks with them yet.

The new IDs also look a little different than the old IDs. They're all white, with a very tiny square picture in the right hand corner. Unlike the old IDs, the new ones utilize electronic video imaging to take pictures. Most of us are just as disappointed with our new photographs as we were with the old ones. Because of the photographing process, the picture is cropped to fit faces in a square, making them look bloated. The IDs resemble something like the computerized pictures you can get printed on a t-shirt at the mall. "The pictures are okay, but we look like waffle-iron-grid-faces!" Michelle Morales, junior in LAS, said.

Most importantly, the new IDs don't have birth dates on them. Considering how bad the pictures turn out this could be a good thing - you wouldn't want to use them to get into the bars anyway.

## ADVANCES <br> 

tudents eating at Illinois Street Residence Hall hand their new computerized IDs to a cafeteria worker. Students paying for the residence hall meal plans can now use their IDs to eat in any of the residence halls, the Down Under in the Union, or the Illini Orange Snack Shop.
ictured are a version of the new IDs and a version of the old ones. Currently the new IDs are used mostly for entrance into university cafeterias, but students will soon use them for access into buildings as well as charge cards for university facilities

- Ruth Galvez

A long with the new IDs, there have been many other changes in the residence halls this year. Becky Hebert, senior in Communications, and Paul Yee, senior in FAA, practice a scene for their drama class in the newly redecorated main lounge of Allen Hall.

uring Latino fraternity rush, members of Sigma Lambda Beta talk to prospective members. The fraternity provides its members with an identity within the Latino community.
n the Illini Union, members of Sigma Lambda Gamma discuss possible activities. The sorority was formed in the spring of 1992.

# For the Latino/a community, new organizations help boost awareness and encourage unity. 

story by Toi Walker • layout by Peggy Christensen

t the end of spring semester 1992, a few women came together and discussed the possibility of starting a Latina-oriented sorority to go along with the Latino fraternity already in existence. The sorority would be the first of its kind at the University of Illinois. After months of research, the women found a chapter in Iowa called Sigma Lambda Gamma. The organization was Latina-oriented, but its mission included learning about other cultures, as well as teaching theirs to anybody who was interested.

There was a need to create another organization for Latina women, according to Juanita Secor, senior in Communications who said, "Socially, the predominantly white Greek system is different than that of people of color. We don't interact the same, and no one was dealing with issues unique to us."

The interest in the organization has been quite successful, especially since it is growing fast across the country.
"We wanted something we could take off with. It was needed now. We could not wait. At least now you have a choice. That's what we all want for the incoming freshmen, and current students, to at least have an option," Veronica Castillo, sophomore in LAS, said.
Too often, people assume that the Latino community is simply made up of Spanish-speaking people. Sigma Lambda Gamma gives women of all races an opportunity to learn about Latin American people from a whole range of countries and dialects. People from Puerto Rico may not have the same holidays, food, dances, language, or other parts of culture as people from Mexico.
"I did not know many Latinos on campus, so it's given me a bond with these people now. It's more than just some acquaintances. It's more of a sisterhood. I would recommend getting involved in any Latino organization," Theresa Nezario, sophomore in LAS, said.

The organization most of all gives Latino students and others a chance to identify with others and find out about themselves.
"Students of color may be on campus two or three years before they ever feel a part of something. The campus community is so big that some students find it easy to get lost in the shuffle. It's given me a group to identify with and helped me get acclimated to the university. It's time consuming because we're new, but it's starting to pay off. It's nice to see something that you've helped to start, grow and watch people get excited about it," Heather Rodriguez, junior in LAS, said.

# Volunteering creates better community relations and wellrounded students. 

story by Michelle A. Johnson • layout Ryan L. Almon

or years organizations like Volunteer Illini Projects and Children's Home and Aid Society of Illinois have served the community as liaisons between university students willing to give a helping hand and persons of the Champaign-Urbana area who are in need. Volunteer Illini Projects, serving since 1965, offers students several areas of philanthropic opportunities and possibilities to use their knowledge and interpersonal skills to give something back to the community.

Friendship, a VIP service project, serves to cultivate relationships that provide role models and positive influences in the lives of younger underprivileged children. Friendship volunteers are matched with a boy or girl in the Champaign-Urbana area and provide them support and understanding as a big brother or big sister.

Best Buddies, a national non-profit volunteer service project at VIP, matches college students with persons with mild mental retardation. Here at Illinois, college buddies are paired up with mentally handicapped students from local high schools and middle schools. Activities are primarily on a one-to-one basis, with monthly group outings. Basically, the activities are just like anything you would do with any of your friends-going out for ice cream, going to the mall, etc. Best Buddies is about having and being a friend.
"Being director has really helped me open up to the issues and needs of the community. It is more important that we encourage each other as a whole and stress these issues. It's great to motivate other college students to volunteer and reach into the community because there is such a need," Laura Zika, senior in LAS and Director of Best Buddies, said.

Since 1980, Vis-a-Vis, a tutoring program of Children's Home and Aid Society of Illinois, has been recruiting students from all majors to tutor in the ChampaignUrbana high, middle and elementary schools. Student tutors travel to their assigned school and meet with their students three hours a week, tutoring in whichever field they feel most comfortable. Other students may work as classroom aids through Vis-a-Vis, where duties are defined by the teachers.
"It really makes you feel good that you're doing something concrete to help kids. The fact that it is something to put on a resume or say was some type of experiencethese things are really just by products. Kids are the most important thing," Quintin Anderson, junior in CBA and Director of Vis-a-Vis, said.

For students who have the time and the will to share their talents, or just know how to be a friend, there are many members of the community who are in need. Volunteering one's time serves not only to create better relations in the community, but also builds personal relationships that are not forgotten.

## CAN I HELP?

- Brian Beckenbaugh

embers of the Best Buddies program, a program that pairs University students up with mentally handicapped students, get ready to skate. Partners get together weekly on a one-onone basis.
uring a Best Buddies "group outing" at the ice skating rink, Chris Roberts stops with Best Buddies coordinator Laurie Zika, senior in LAS. Members of the group got together on January 24, 1993, for an afternoon of skating followed by hot chocolate at McDonalds.

embers of the Illini Tae Kwon Do Club entertain the Quad Day crowds with their martial arts skills. Spectators watched the different shows performed on the Quad.
ary Campagna, freshman in Education, and Margaret Schultz, freshman in LAS, sing to a favorite tune for Quad Day onlookers. To showcase theír musical affiliation, WPGUFM provided Karoake entertainment
n an effort to cool off from the heat, C Cramp, graduate student, takes a seat on $t$ dunk tank. Dunk tanks and other speci items like free giveaways are often used attract the crowd's attention at Quad Day.

# Hundreds of sweaty bodies and booths were the sights to see at Quad Day. 

story by Lainee Frizzo • layout by Monica Soltesz

$f$ the humidity or the rain didn't keep you away, you were probably at Quad Day on Wednesday, August 26, along with a couple thousand other hot and sweaty students.
"Actually, I went to get out of the heat in my dorm room. And to relieve my mind of complete boredom," Sharad Satsangi, freshman in LAS, said as he played his guitar for passing students.

The heat was so intense that sweat ran in rivulets down everyone's back. Soggy crescent moons hung in shirt armpits everywhere. The humidity alone made the sticky mass of students seem three times larger.

Quad day is unique because most students are on campus and have virtually nothing to do.
"Quad Day is the last day before we get really busy and can't do anything!" Deepa Pankaj, senior in LAS, said.

Chores like buying books or getting trash can liners can wait. Quad Day is a day to relax, get psyched for classes to start and maybe check out the incoming freshmen.

In all honesty, most of us were probably there just to scope, but a few good people actually came to see what $U$ of $I$ had to offer.
"I just came to see the booths, but I ended up singing 'Stand By Me' at the WPGU booth with my friends from Presby House," Shani File, freshman in Agriculture, said. The WPGU booth was located on the corner of the quad by the Union and the Chemistry Building. It provided a karaoke machine so students could sing along with a variety of popular tunes. Students like File, whose throats weren't too parched, sang for the masses that day.

Still others came to see specific organizations. "I wanted to see the juggling and Unicycling Illini. Plus, I have this thing for karate demonstrations," Josh Ruedin, sophomore in Engineering, said. Besides karate demonstrations, the lllini Dance Team and the Marching Band performed as well. Every organization you'd ever want to join was there, from the Filipino Student Organization to the literary magazine Little America.

And if you were lucky enough to represent one of the 177 groups on the Quad or one of the 135 groups located nearby, you got to sit in the rain. "It's kind of a job," Lorna Henderson, volleyball player and senior in LAS, said as she handed out volleyball fliers.

Organization representatives were compelled to sit through the rainstorm just in case anyone was still interested in their booths.
lllini hockey team member Dave White, senior in Communications, gave Quad Day one of the best summaries when he said, "The festival-like atmosphere and the variety of people made it a fun-filled day for everyone!"

## carousing ON THE QUAD

orting through boxes of beads, Jenny Bashaw, fresman in ALS, Jen Cloney, freshman in LAS, and Lori Sapa, freshman in CBA, shop at Carrie's Vintage Clothing booth. Carrie's is located in downtown Champaign.
etting up fora toss, Sassan Attari, graduate student in Engineering, plays frisbee on the grounds around Assembly Hall. The Expo was used by area businesses to show what they have to offer to students.

# Student Expo '92, an all-day extravaganza, brings together local businesses, performers and students for fun. 

story by Michelle A. Johnson • layout by Meg Wyatt

his year Assembly Hall created something entirely new for the University of Illinois students: Student Expo '92. The all-day outdoor extravaganza featured a myriad of live entertainment, food, games and prizes-all for free. Student Expo ' 92 was designed to introduce members of the local business community to university students who use their products and services while simultaneously giving students an opportunity to see what the local business community has to offer. More than 150 businesses featured products ranging from cars to furniture, provided demonstrations, distributed coupons and even accepted job applications.
"It was a lot of fun, and I got a lot of free stuff. I really liked it. I wanted to stay and check out the bands, but I had to go. If they had it again next year, I'd definitely go," David Tampa, sophomore in LAS, said.

The outdoor festival also incorporated recording artists sponsored by local radio stations. Z-95 sponsored Material Issue and Enuff Z'Nuff. Last Gentlemen, Mitch Malloy and Colorhaus were sponsored by WLRW. WPGUFM sponsored Doc Lawrence and Organic Advisor, and The Byron John Band and Razor Sharp were sponsored by WBCP. To top it all off, comedian Howie Mandel ("St. Elsewhere", "Bobby's World") starred in a free show for students that night in the arena.
"I thought the show was hilarious, and it was amazing that they could get Howie Mandel at the university. He was really good with the audience and could make quick comebacks. It was a great time," Ushio Yuki, junior in Engineering, said.

During 1992-1993 Assembly Hall marks its 30th year of presenting entertainment to university students. Assembly Hall's programming relies on a management staff and is also advised by a committee composed of seven students and four university faculty-staff members who provide ideas and recommendations. This committee serves to represent the student body and community at large. Because Assembly Hall receives funding from student fee support and relies so heavily on students, the staff wanted a way to say thank you, and are planning to make it a tradition.
"I though it went great, and it got excellent revues. We hope to make it an annual event, and have plans for 1993," Wayne Hecht, Director of Assembly Hall, said.

# Students and New Art Theater patrons frolic to the sexy 70's musical comedy "The Rocky Horror Picture Show." 

story by Lainee D. Frizzo•layout by Bob Gonzales

nce upon a time there was a midnight ritual at the U of I. No, not a bunch of loud, boisterous students at $\mathrm{O}^{\prime}$ Malley's singing "American Pie," but rather a bunch of loud, boisterous students singing "Sweet Transvestite" at the New Art Theater. For devout "Rocky Horror Picture Show" fans, this was the place to be on Fridays and Saturdays at 12:00 am.
"We usually had about 50 or 60 die-hard fans here every week for the showexcept on Halloween. Then it was nuts. Halloween is always huge for 'Rocky Horror,' This year we had 300 people," Tom Angelica, New Art Theater owner, said.
"Both of the times I saw 'Rocky Horror' were on Halloween," Michele Pazdirek, sophomore in LAS, said. "It's not a movie you could take your parents to! But it's great how they've taken a movie that is so obviously stupid and raised it up and made it more!"

Based on a hokey plot about a couple of dorky newlyweds who find themselves stranded in a castle with a bunch of sexually deviant aliens, "Rocky Horror" has thrived since its 1975 release. The movie is shown all over the country; therefore no venue is quite the same.
"Every theater's showing is different. There are regional variations," Angelica said.
For example, the number of audience participants who fall down and pretend to be electrocuted when lightning strikes the screen, varies in each theater.
"They did different stuff at the New Art Theater than they did at the Tivoli in University City, Mo.," Panade Sattayatam, junior in Engineering, said.

Another variation is that every pre-show is different, although they usually involve people dressed as cast members intimidating "Rocky Horror virgins" (firsttime viewers).
"It's the kind of movie you don't mind watching over and over again. I guess it's the ambiance," Sattayatam said. And boy is there ambiance. The audience is never quiet. If you're not being pelted by water from a squirt gun (during the rainy scenes) or rice(during the "DamnitJanet" song in the chapelafter Betty Monroe's wedding,) you're picking toast out of your hair.
"Clean-up is pretty awful. It takes about three or four hours, so our staff has to stay until 6:00 am," Angelica said. Clean up is one of the reasons many theaters are discontinuing their Rocky Horror shows. Besides the inconvenience of working weird hours-it's just plain gross!
"I loved it when I saw it a while ago, but I didn't throw toast or anything," Christine Biesiada, junior in LAS, said.

Audience participation is what has kept this movie alive for so long. You can just sit back, relax and scream at the right times or you can get up and dance the "Time Warp" like a real Rocky Horrible. Since theaters are discontinuing the show (and seeing it on the VCR is just not the same), no one knows how long this phenomenon will last. So get out there and see it while you still can, all you virgins!

## MIDNIGHT RITUAL

ctors, playing the sexual deviants from Dr. Frankenfurters castle, gather around "Brad" during their pre-show performance. Pre-show performances vary from theater to theater.
tudents await the cue to throw rolls of toilet paper at the movie screen. "The Rocky Horror Picture Show" is becoming more scarce in theaters because of the mess its audience creates during the show.

# Study group designed so Afrikan Americans can learn more about themselves. 

## story by Toi Walker • layout by Peggy Christensen

n 1989, a study group was formed as an alternative to the history that students receive on campus. One day, some students found they were reading the same book. They decided to discuss it at someone's house. That was the beginning of Nia.
"Nia is an organization that is the first step to letting Afrikans in America know about ourselves, and what we need to do to better ourselves," Noelle Samuels, junior in Agriculture, said.

One way students do this is to discuss books that are written by Afrikan American authors for and about Afrikan American people. Many people wear the $t$-shirts and talk about oppression, but never read anything about the Afrikan American struggle. This tends to trivialize the problems Afrikan Americans face in this country.

Typically, a Nia set is held on Sundays at 5 p.m. at the African American Cultural Center. People start talking among themselves until it is suggested that you meet someone you did not know before. Then some questions are thrown out onto the floor, and people begin to discuss them. One of the questions that people tend to talk most about is: What is the struggle? Many black people are not on the same accord with what the "struggle" is. Is it the African American making it in this white structured socioeconomic system? Is it building our own? Once I have my BMW and big house on a hill, am I through? Is it taking care of myself, or all of us?
"I've been coming to Nia since my freshman year. Its been kind of like going to church to me. I get refocused on larger things in life, and what I should do as a Black man. Its a place where Black men and women can come together and discuss, read, and disseminate information that directly relates to us as Black people," Kayode Olowe, junior in CBA, said.

Anyone and everyone is welcome to come talk and get to know people. If a person just want to listen that is fine, too. A partial book list includes:

1. Part of My Soul Went With Him by Winnie Mandela
2. NAACP: Triumphs of a Pressure Group 1909-1980 by Warren St. James
3. Afrikan Woman: The Original Guardian Angel by Ishakamus Barashango
4. Enemies: The Clash of the Races by Haki Madhubuti
5. Chains and Images of Psychological Slavery by Na'im Akbar
6. March Toward Freedom by James and Cherry Banks
7. The Color Purple by Alice Walker
8. The Cultural Unity of Black Africa by Dr. Cheikh Anta Diop

Sound deep and interesting? There are many more where those came from, so go check them out. These books can be found at most Afrikan American book stores and at the Illini Union Bookstore.

# MEETING PURPOSE 

oelle Samuels, junior in Agriculture, voices an opinion at a Nia meeting. Samuels led part of the discussion.
renda James, junior in LAS, asks questions during one of the meetings. Nia is an alternative study group that emphasizes Afrikan American literature.

— Rick Widmer
Nia participant contemplates the discussion. The meetings were held Sunday nights at the African American Cultural Center.
embers of Sigma Gamma Rho sorority entertain the Homecoming Pep Rally crowd with a lively musical show. The group's performance followed that of the Marching Illini.

llinois Cheerleaders mount a diamond head stunt at the Homecoming Pep Rally held in Assembly Hall on the Friday night before the game. The Marching Illini, as well as other campus organizations, also performed at the pep rally in support of Homecoming Weekend.
lumni, students and family members gather outside Memorial Stadium the morning of the Homecoming game against Northwestern. Tailgate tents sponsored by local businesses and university orgaizations lined the parking lots with food and beer before all of the home football games.

embers of the Dance Team perform at the Homecoming PepRally. The dancers perform at numerous events including Quad Day, the Homecoming Assembly and Parade, and the Dad's Day Variety Show.
xciting the crowd at the Homecoming Pep Rally, Andrea Misiura, sophomore in CBA, performs in unison with her teammates. The dance team works all year on their routine in hopes of gaining a spot at the national competition.

# The Illini Dance Team has worked hard for their premier status in the national rankings. 

-••

story by Michelle A. Johnson• layout by Ryan Almon

hat do thirteen of the best precision dancers at Illinois do when the university refuses to sponsor the Illinettes to compete nationally? They split from the Illinettes and form the Illini Dance Team, a corps currently composed of one captain, Michelle Affrunti, junior in LAS, and twelve team members. They compete primarily at nationals, make guest appearances at Chicago Bulls games and perform at various campus events including "Be a Part From the Start," Quad Day, the Homecoming Assembly and Parade and the Dad's Day Variety Show.

The Illini Dance Team started out on their own during the fall of 1990 with very little funding. Outside of a small sum granted by SORF which is put into the Dance Team Fund, the costs for uniforms, sweats and other expenses are generally paid for out of the team members' own pockets. From the SORF fund, the team can afford enough to have a disc jockey mix and cut their performance music for them. Outside of this, all choreography is done together, uniforms are designed together and they conduct their own tryouts twice a year. So how do they afford to compete nationally? Simply by being some of the most talented women in the country.

Since their first national competition in 1990, the team has taken either second or third place. The competition process begins in February, when they submit a preliminary videotape to the Universal Dance Association. Of approximately 55 tapes submitted, 12 are chosen to attend nationals, and the top four or five are granted free flight and hotel accommodations - which has been the situation for the team two of the three times they haveentered. Upon arrival, the 12 selected teams compete, and the top five aretelevised on ESPN. This year's competition will take place in San Diego, Calif.
"Nationals are a great experience. It's the only time you can see what other teams are doing. It's a lot of hard work, but once you're up thereit'sall really worth it, "HopeBuell, senior in LAS and three year team member, said.

Hard work is an understatement. Team members practice three times a week in the fall semester, which in the spring semester turns into six nights a week perfecting routines prior to competition.
"Dance team has really improved my time management. I'd probably spend more time wasted if it wasn't for the team. It's a big commitment, and sometimes it's a real struggle grade wise, but I wouldn't trade it for anything. It's such a great feeling of accomplishment," Andrea Misiura, sophomore in CBA, said.

ith the help of her bird, Buddy, Jen Grauer, sophmore in LAS re-arranges the contents of her shelves. Students bring many special momentos from home to personalize their rooms.

ersonal touches like a tie dye sheet and carpeting decorate the room of a U of I student. The student was sketching an assignment for his Art and Design 122 class.
reparing to do his homework, Marcel Browers, junior in LAS clears off his desk. Brower's room reflects his interest in 60's memorabilia.

# Students add life to their homes away from home with everything from valences to mirrors. <br> story by Lainee D. Frizzo • layout by Monica Soltesz 

t's home away from home. You want your new residence, whether its a dorm or an apartment, to scream, "I live here! This is me!" so you personify it and breathe a little life into the bare rooms. Because our tastes are as varied and as countless as we are, your neighbor's room may be completely different than yours.
"Our room looks something like you'd see in New England, especially since we have gathered curtains with a draped valance," Darlene Fernandez, junior in ALS and Busey Hall resident, said. Her room glows with white Christmas lights bordering the ceiling. Fernandez has also brought in her own lamps to avoid the harsh fluorescent bulbs provided by her residence hall. Along with pictures of friends from home, she has hung a print of Raphael's "Two Angels" on the wall. The stained wood of the bookcase, desk shelves and refrigerator-table also helps give the room a home-like atmosphere.
"We have a seasonal theme, with pumpkins in the fall and pointsettias in the winter," Fernandez said. Brass potted plants also add to the vegetation.
"Our apartment is very eclectic and random," Deepa Pankaj, senior in LAS, said. Pankajlives in The Gregory with Amera Kahn and Jeulie Sheehan, both seniors in LAS. The apartment was unfurnished so the they brought in their own unique styles when they scrounged for furniture.
"Nothing matches, but it blends in its ethnicity," Pankaj said. The apartment is adorned with Indian tapestries draped over the couches and spread over the hard wood floors. Bean bags add to the utilitarian decor.
"We have only the bare essentials, " Kahn said. "They supplied only three chairs for the dining room, and there're just enough lights to illuminate the rooms."

According to Audrey Gaten, sophomore in LAS and Evans Hall resident, her room is a little trendy. Gaten has placed bronze and gold patterned mirrors around the room. She has also arranged the furniture so that the beds, originally bunked, are now separate, and the chest of drawers is pushed diagonally into the corner.
"We planned over the summer," Gaten said. "I brought the TV, and (my roommate) brought the stereo system." Both the TV and the Aiwa ${ }^{\mathrm{tm}}$ stereo system are piled onto the chest ofdrawers like a home entertainmentsystem. The two also coordinated bedspread colors and supplied their own refrigerator.
"Our room represents every facetof the imagination, "ChiliShears, junior in LAS and Busey Hall resident, said. "We have everything from black construction paper to Minnie Mouse!" Cartoon figurines of Foghorn Leghorn, Fred Flintstone, Gumby and Pokey sit above the window frame. A Minnie Mouse balloon also sits on Shears' desk.
"We have a lot of art, too. Everything from Van Gogh to O'Keefe," Shears said. Besides the prints, there're also black and white photos. Shears even created her own charcoal pictures in maroon, blue, rose and black to match her bedspread.

While some people carpet, re-paint and wallpaper, others are satisfied with a few pictures and a beanbag. So, don't feel bad if the only touch of personality you've added to your room is a picture of your dog! If you feel more at home than you did when you moved in, you've decorated!!!

## DO IT <br> YOURSELF

he Big Bad Wolf interrupts Little Red Riding Hood's adventures in Alpha Phi and Sigma Pi'sperformance of "A Twisted Tale." Atius-Sachem provides many with the opportunity to shine on stage - if only for one weekend.

hen Sally and John's mother leaves for the cay, the Cat in the Hat shows them how to play. Kappa Delta and Delta Upsilon's performance of "The Cat in the Hat" received second place in the 1992 Atius Show.
elta Zeta and Triangle retaliate against the health food craze as they perform "The Enchanted World of Candyland." They were one of ten teams who made the final show Mom's Day weekend.

# For Illinois Greeks, it's more than just a song and dance during the Atius Sing. 

story by Michelle A. Johnson • layout by Mîke Krupicka

#### Abstract

thought it was a gym shoe until tonight," one proud mother concerning the annual Mom's Day Sing said. For many, the term Atius is not a part of everyday language, but for the Greek students who put months of hard work into this event, it is one of importance. At the end of the fall semester, participating sororities and fraternities pair off, and directors begin brainstorming on song and skit ideas. In January, the meetings and practices begin two to three times a week with polished performances prepared for Mom's Day. The show itself, performed at Foellinger Great Hall, consists of ten pairs of sororities and fraternities who compete for the best performance. There is no theme, per se, so the outcome of the performance is completely in the hands of the directors. Spring 1992's winners were the sororityfraternity team of Alpha Epsilon Phi and Alpha Delta Phi with their rendition of "The First Date." "We thought of what everyone in the audience could relate to and would enjoy," John Aldworth, junior in Education and Alpha Delta Phi Atius Director, said. "It was my first real leadership experience, and it was great because there weren't any real restrictions on our creativity. I thought it would be hard to motivate people, but it turned out to be a lot easier than we expected. If you keep using positive reinforcement, you can see people continue to improve. It was great," April Sugarman, senior in LAS and Alpha Epsilon Phi Atius Director, said.

Other big winners were Delta Upsilon and Kappa Delta taking second place with "The Cat and a Hat," and Sigma Tau Gamma and Pi Beta Phi landing third with "Cool Beans." But for most, the spirit seemed to be more than just competitive. "It was interesting getting to know and work with all of the people in one house, and also seeing what people in other houses came up with. More than that, it was great performing for my mom. All the hard work pays off when you do finally perform, and it doesn't really matter whether you win or lose. It's just a lot of fun," Jenny Blink, senior in ALS, said. Even so, that feeling of first place excitement is a hard one to beat. "After we received the trophy, both of our houses attacked us as we left Foellinger. It was a real high," Aldworth said.

So for Greeks, Atius means more than just one night on stage in front of mom. Atius involves months of hard work, and the product means something different to each person who participates (and it's definitely not a gym shoe, for moms who are still unsure).

## Afrikan American women stage a lock-in to discuss relevant issues. <br> story by Toi Walker • layout by Monica Soltesz

omen have been notorious for coming together to discuss issues unique to them when no one else will. On September 18, 1992, a group of Afrikan American women came together at Allen Hall to provide an all-night forum for Black women called "Sistahs Gonna Work It Out." The women spent the night, ate pizza, watched movies, acted outskits, had discussions, laughed, danced, cried, and formed a permanent bond. About 20 women, freshmen through seniors, stayed the entire night, and all agreed that they would do it again if asked.
"We have to clean our own houses as Black women before we can coexist efficiently with Black men. That's why the lock-in was for women only," Christin Hill, sophomore in LAS said.

According to those involved, the night was not simply for male bashing. The night was orchestrated so that they could lay all the cards on the table and start talking about solutions to the problems between Black men and women.
"Everyone discusses the problems, now it's time to figure out some answers! I realize that my life would not be the same without the help of a good Black man. That's why we need to work on building strong relationships with each other so that we can foster strong families in the future," Ronda Brookins, junior in Education, said.

At around 4 a.m., the women at the lock-in formed a mission statement to describe their organization of strong sisterhood: "To create a new order of sisterhood through consistent campus and community work."

The organization the women formed that night was called the Black Organization of Strong Sisters (B.O.S.S.).
"I think B.O.S.S. is an organization that is long overdue. From my understanding, there are only a few organizations which actually address the solutions to problems of Afrikan-American women on campus. I feel that it is our duty, as AfrikanAmerican men, to support organizations like B.O.S.S.," Paul Hutchinson, senior in Engineering, said.

Too often, people walk up and down the quad and never take time to really talk. People are hurriedly rushing to class, thinking about tests, worrying about tuition fees. That's why programs like the lock-in are so important. It gives people a time to relax, laugh, and get to know others, according to Daynia Sanchez, sophomore in LAS, said. "It was pleasing to see a group of women of color sit down and share their experiences and things that affected them. It was real people sharing. I was very moved by the experience."

## SISTAHS OUT

icipants perform skits in order to share experiences. Those at the lock-in brought her their personal opinions and iences to help deal with issues facing the as a whole.

s Maurice Young sophomore in LAS, sings his lead to the crowd, Christin Hill, sophomore in LAS, Olivia Dawson,seniorin Communications, and Ronda Brookins, junior in Education, sing and dance backup.

elling at David Hutchinson, graduate, Olivia Dawson, senior in Communications, gets her point across. Dawson's character, Effie, had to relinquish her singing lead after Hutchinson's character, Curtis, became their manager.
n the stage at Assembly Hall, the backup dancers perform one of the numerous dance routines throughout the show. "Dreamgirls" was the 75th Illini Union Board Spring Musical to be performed.

# The 1960s "girl groups" and their impact on this nation's music scene was showcased in "Dreamgirls." <br> story by Toi Walker <br> layout by Meg Wyatt \& Jill Kogan 

n April 10th \& 11th at Assembly Hall the 75th annual Mom's Day IUB musical, "Dreamgirls", was performed. "Dreamgirls" is a Tony Award winning Broadway play based on the trials and tribulations of the Supremes. The original show was supposedly so realistic, that it was rumored Diana Ross would not allow her children to see it.

Dreamgirls is about a singing group called the Dreamettes. The group includes Deena, played by ChristinHill,Lorrell, played by Ronda Brookins, and Effie, played by Ernika Jones. They were childhood friends with grandiose dreams like Diana Ross, Mary Wilson and Florence Ballard. The Dreamettes began a singing group and got tangled up with a scheming manager named Curtis, played by David Hutchinson. He changes their names to the "Dreams" because their previous name was too 'girlish.' "You're women now!"' exclaims Curtis. Berry Gordy changed the Primettes to the "Supremes."

The "Dreams" quickly started climbing the charts and making it big, but the tensions were rising inside the group. Effie, the lead singer, had to step back so that Deena could sing lead. Deena, who is in love with Curtis, starts seeing him behind Effie's back. Diana Ross also had an affair with Berry Gordy when the group's name was changed to Diana Ross and the Supremes. By the end of the musical, The Dream Girls became Deena Jones and the Dreams.

Other girls also fell in love. "My character, Lorrel, was much like Mary Wilson. I was the youngestand falling in love withanolderman. Iloved playing that role. Thevulnerability and innocence of young girl groups whenthey'refirst starting out was portrayed very realistically. It was pertinent to today's music world," Brookins, junior in Education, said.

Eventually, relations between the girls are so bad, that Effie is asked to leave in favor of a younger, more glamorous singer named Michelle, played by Toi Walker. Florence Ballard was replaced by Cindy Birdsong, after Diana Ross became lead singer.
"Dreamgirls was perhaps the most time consuming musical that anyone in the cast ever performed. We knew that it was the 75th annual show, and being an all black cast in an IUB musical, we had a lot to prove. So naturally, the feeling of accomplishment we had at curtain call was monumental," Christin Hill, sophomore in LAS, said.

The hard work was evident according to Dante Booker, sophomore in LAS, who said that the musical was really good and performed very well. He could tell it took a lot of time and came both nights.

# Trying to pinpoint student's tastes proves difficult as survey covers wide variety of interests. 

story by Michelle A. Johnson• layout by Jill Kogan

hen it comes to media preferences, no one's tastes are the same. We thought we'd get some fresh opinions from students, and run, sort of, a survey. Figuring the University Information Desk was probably a good place to start, we met Charlie Stratton, graduate student, and Leo Berk, sophomore in LAS. Stratton's Stats:
Music: Happy Mondays, Stone Roses, Sinead O'Connor
TV Favorites: "The Simpsons", CNN, "The McLaughlin Group"
Feelings: "I'd rather listen to the Emergency Broadcast Service than Champaign radio."

Berk also likes "The Simpsons" and reported that The Discovery Channel has a great series on sharks. He agreed with Stratton on Champaign-Urbana radio, "Entirely too much Led Zeppelin," Berk said.

Sujal Shah, freshman in LAS, said he only watches sports, doesn't listen to radio much, and feels the area news is informative and unbiased. Brad Wackerlin, junior in Communications, tends to disagree. "The local news personalities need personalities." Wackerlin's TV favorites include "Liquid Television" and "Jeopardy".

Tracy Mayer is another student not completely pleased with the area news. "I feel C-U news is too local, and not national or international in scope. There's nothing that applies to me as a student or as someone from Chicago."

Feeling the survey was not quite complete, we continued our queries. Chris Michiels, freshman in Agriculture:

Favorite Music: Nitzer Ebb, Front 242, New Order, doesn't listen to the radio
Feelings: "I think The Onion is more informative and less opinionated than the DI." Mark Gerard, freshman in Agriculture:

Favorite Music: The Cure and U2
On TV: "I turned on the TV for the first time last night."
The last participant in the survey said that she wished to remain anonymous, but wanted to be heard. " 1 listen to Prince and Lorenzo Music almost 24 hours a day. I refuse to listen to anything else." Hmm...

Well, anyway, it seems there is something for everyone, and media opinions are highly mixed. After statistical review, experts decided this would probably be the only place on earth these survey results would ever be published. It might not be Billboard, but it is a sampling of the different tastes here at Illinois.

ith her puppy, a U of I student takes advantage of the nice weather on the Quad to read a book. Many students sit outside on the Quad during the nice weather.

group of $U$ of I students relax at a cafe listening to a guitarist. Musical preferences of university students are very diverse.

# We would be rather inconvenienced without them, but sometimes cars are just not worth it. 

story by Michelle A. Johnson•layout by Peggy Christensen
ost people would agree that having a car in Champaign-Urbana has its conveniences, but can also be a genuine headache. For students who frequently travel home, having a car beats going Greyhound any day. For students in houses and apartments, grocery shopping without a car can be quite an experience. But with a general parking shortage and an abundance of police types to ticket cars, many students find their vehicles fenced in one of the 20 towing establishments in the Champaign-Urbana area.

A common phenomenon related to students seems to be the 10 minute tow. No one knows how cars can be towed so fast. "I parked at IHOP for 10 minutes to run into Gully's, came back, and the car was gone. It was unreal," Jill A. Johnson, senior in Communications, said.

Laura Major, junior in LAS, experienced the same, but had to deal with guard dogs. "I parked next to a dumpster for 10 minutes when I came back, there were three frat guys sitting on my car as it was towed down the street. Thinking that in itself was bad enough, when I went to pick it up the next day, the company's guard dogs broke loose and came after us while we were waiting for the owner. It was scary, but the owner ended up giving us the car back for free," Major said. What's a little life-threatening fear if it saves you some money, right?

Probably the worst type of tow is the public tow, where anyone can decide to take that initiative, and tow you. Marina Franklin, senior in LAS, experienced this. "This summer Devonshire Realty allowed us to park our car in their lot. As soon as we turned our backs, the secretary had us towed. I swear she just did it to be evil," Franklin said. Regardless of the type of tow, shelling out that extra money is irritating and usually is not in a student's budget.

But according to April Sugarman, senior in LAS, she'd rather take the risk of towing than be here without her own transportation. "It's lot better than taking the bus. It really makes you feel like you're at home when you have your car down here. It gives you freedom."

Heather Almer, junior in LAS, saidhaving access to a car means spiritual freedom. "On days when C-U is too much, we [she and her roommates] can drive until we see it no more."

Often this is the popular sentiment. Students have enough things to worry about without the added stress of parking enforcement and their towing cousins. Many students feel they already pay enough money to the university without the revenuegenerating parking enforcement/towing conspiracy. Unfortunately, students' only defense is to park legally, which at this overpopulated university can be almost too much to ask.

## HARD TO HAN D LE

# Black alumni and undergraduate students unite to celebrate the academic success of selected students 

## story by Shuntitta Wallace and Tina Jordan layout by Amy A. Dooley

welve years of success best describe the University of Illinois Black Alumni Association (UIBAA). The organizaton's 12th annual reunion banquet was held at the University Inn on September 26,1992. The dinner reception reunited the university's Black alumni and developed new ties with Black undergraduates.
"There's a need for annual Black Alumni events/affairs. These functions represent an opportunity for [alumni] tosupportand energizefellowalumniand undergraduatestudents," Donald Sloan, an AT\&T sales manager and 1979 alumnus, said.
Benjamin Duster, founder and president of Cimply Complex Communications Cystems Corporation, wastheguestspeaker. Hismainpointsincludedracism, thecolor-linetheory, and the value of a strong, Black family structure. Duster, commenting on the color-line theory, inspired by activist W.E.B. Dubois, said, "None of us will be free untilall of us are free." When speaking on the black family value structure, he included the subject of slavery, saying that it "strips us of family structure and culture." Duster then went on to explain what is being expressed in the Black Nation Anthern, "Lift Every Voice and Sing"; 'It's about struggle and staying true to Afrika. We must continue in the struggle."

The banquet also offered achievement awards, including the Earl B. Dickerson award, Outstanding Achievement, and theKlemick Scholarships. TheEarl B. Dickersonawardswere granted to seniors Byron Mitchell, Bruce Bradford, and Wilson Terrel, and junior Michael Williamson. Outstanding Achievement award winners were sophomores Kenneth D. Lewis and Earl E. Strayhorn. The Klemick Scholarship award divided $\$ 10,000$ among the top ten Afrikan undergraduateseniors whoare preparing for graduateschool. The KlemickScholars recipientsincludeMajiFord,CarminFrederick,KamauMuata,NicoleSaulsberry,Nafonwyck Williams, Cory Radley, Joy Williamson, Tiffany Arnold, Charles Petty, and Wilson Terrel.
"The Klemick Scholarship helps cut the cost of graduate school. Without the generous financial aid of the Klemicks, my graduate school career may not have been possible," Joy Williamson, senior in LAS, said.
"The UIBAA banquet illustrates the fact that therearemany Afrikan-Americans who have been successfulat the $U$ of $I$ and continue to be so in their respective communities. This event linkspresentblackUofIstudentstothosewhohavepaved thepathwaybeforeus," Nafonwyck Williams, senior in LAS, said.

According to Sandra Kato-Wright, education administrator at U of 1 , current Ph.D. candidate, and U of I alumna, the banquet was an completesuccess, largely owing to the large number of students who were in attendance, the ten scholars who received the Klemick scholarships, and the "timely, eloquent and thought provoking presentation by the guest

## speaker, Mr. Ben Duster." <br> BANQUET OF SUCCESS

peaking at the Black Alumni Banquet, Dean Clarence Shelley begins to introduce the next speaker of the evening. Shelley is the Dean of Minority Student Affairs.
hannon Wilson, president of the Black Alumni Association, discusses important issues concerning Afrikan Americans in America. Wilson was the event's hostess.

# Comedy clubs around campus draw big crowds as well as big laughs. 

story by Lainee D. Frizzo • layout by Ryan $\mathbb{L}$. Almon

rades getting you down again? Depressed that the person you scammed with this weekend never called? Well, pout no more! There are some places on campus that can cheer you up by making you laugh.

Theses laughs come in all sizes and shapes at the various comedy clubs throughout Champaign-Urbana. The newest addition to this scene is Guffaw's, which held its Grand Opening on August 7, 1992. Currently, they feature only professional comedians who have appeared on TV shows such as Evening at the Improv, Caroline's Comedy Hour or MTV's Half Hour Comedy Hour. Each week they offer a feature comic and a headlining comic who perform all week for a total of nine shows.
"Although we've had no student performers yet, we're starting open auditions for a comedy clinic. This is the ONLY free comedy clinic in this area that I've heard of," Naj Du Puy, Guffaw's full-time manager, said. This clinic will be taught by comedy writers and stand-up comedians who will critique the students' material. Then the students will perfect their act and work on timing.
"Our goal is to refine them into good opening acts and to book them in other comedy clubs," Du Puy said.

Open Mic Night at Down Under also gives students a chance to perfect their acts. The Program Department in the Illini Union holds this once a semester as a part of their One Night Stand Program.

But for those who just want to sit back and watch, the One Night Stand Program brings comedians such as David Orion and Ali Leroi from Chicago to the Down Under.
"When I went to Down Under, it was really funny-if you understood the mentality of Central Illinois. It was really localized humor," Stephanie Jones, senior in LAS, said.

Other places on campus feature comedians regularly, too. The Alley Cat features comedians every Wednesday and Friday night during Grazeland at the Down Under.
"The Alley Cat puts on a good show. I saw at least four comedians there one night. The owner even did this corny sing-along," Sital Patel, senior in LAS, said. "I definitely think more students should check it out!"

# JUST FOR LAUGHS 

# If your spring vacation deal of a lifetime sounds way too good to be true, then you know it probably is! 

story by Michelle Johnson • layout by Monica Soltesz

ext time you're flipping through the newspaper and stumble upon that amazingly inexpensive spring break vacation, you may want to be careful. According to Susan Hessee, attorney at Student Legal Services, more than a few trusting students have been taken for a ride-without ever departing ChampaignUrbana.
"It is important to look at the contract. Some agencies can be very vague about accommodation details and the number of people per room. Also look out for agencies who want large cash advances. At least if you charge it and the agency is fraudulent, you can issue a complaint and the credit card company won't pay for the trip," Hessee said.

Apparently, agencies have even been using student representatives to wheel and deal. Students are offered a free trip to the same vacation spot they are selling if they meet a certain quota. Usually these student vendors are as well informed about the vacation details as the students who buy from them.
"This guy asked me if I wanted to buy a trip from him to Puerto Vallarta. I asked him about the details and he seemed a little hazy, but he was excited about getting a free trip if he sold like 10 or 12 vacations. I asked him if he minded if I checked it out through the agency, and he got a little irritated because he thought I was going to sell trips too. What a moron," Michael Brosnan, senior in LAS, said. Students are also at risk because for the most part, after you pay the fees, there is limited success in getting your money back. The agencies fold and the agents disappear.
"When I was a freshman, I paid $\$ 400$ to a guy named Max for a trip to hell and back," Andrea Brady, senior in LAS, said of her trip to Daytona Beach, Fla. "Our 'transportation' was a Greyhound full of stoned, drunk and vomiting frat guys. Our 'accommodations' for six was a sleazy motel room for four. The doorknob was ripped off, the bathroom was flooded, and no one changed the sheets the entire time we were there. I tried to locate this Max after the trip, but he was nowhere to be found. I wished I would've listened to my mother," Brady said.

Student Legal Services also warns students to be wary of out-of-state agents. "Those agencies that are registered in Illinois should also be registered with the American Society of Travel Agencies," Hessee said, "And never send money to a post office box number-always get a street address."
"Never trust a man named Max whom no one can produce a last name for," Brady said. Brady's advice is probably applicable to a number of situations in life, so student's beware! Spring break is designed for enjoyable time off from school, not financial tragedy.

tudents take a break from their studies under
sunny skies and palm trees. Warm and sunny places, such as Kokomo Beach, Fla., one of the Florida Keys, are favorite spring break destinations for students.
any enticing vacation brochures are printed up each year. The brochures allow students to ask questions before purchasing their vacations.

# Mom's Weekend 1992 was activity filled and made missing mom subside for a little while. 

story by Lainee D. Frizzo • layout by Meg Wyatt

ou miss her cooking. You miss her money. And you probably even miss her nagging. We all know what it's like to miss our mommies! So when Spring came and Mom's Day rolled around, we U of I students shook out the welcome mat (and cleaned our rooms) just for good ol' mom.
"We always have plenty for moms to do," Pam Anderson, Parent Program Office worker, said. On Friday night the Mother's Association crowned Queen Mom at their annual banquet. Book awards for academic scholarship were also presented to students.

The Atius-Sachem Mom's Day Sing, an event in which the fraternities and sororities pair up and perform musical skits, was held both Friday and Saturday nights. And, if Mom was still starving for entertainment-or maybe just trying to avoid the bars - "Dreamgirls," the Illini Union Board musical, was scheduled all weekend at Assembly Hall.

If you were really lucky, Mom woke you up early Saturday morning to take you through the Union to see what bargains she could snatch up at the Mom's Day Craft Fair. Finally, unless she had worn you out, she probably had you escort her to the Horticulture Club's Flower and Garden Show.
"I took my mom to everything," Lisa Anderson, senior in Engineering, said, "We saw 'Dreamgirls,' the Black Mom's Day Fashion Show, and the Black Chorus Show!"

But, even if you didn't check out the U of I's schedule of events, you could still have a good time with mom. "We didn't really have anything planned, but it was still cool to have her around," Sarah Schmidt, junior in LAS, said. "I always have my mom come up with other moms. We always go to the plays, and I give her the tour and tell her, 'This is where I work, and this is where I play.' Then I make her buy me groceries."

And for those of you who said, "No way did my mom come down! I didn't even tell her about it; she'd probably want to stay or something," you're in big trouble. You had better hope she doesn't find out, or you'll be grounded with no television for a week!

## U of I celebrated its annual fatherly escape weekend with a big football win and lots of laughs.

story by Michelle A. Johnson• layout by Meg Wyatt

nce a year, every fall semester, Illinois dads everywhere migrate to Champaign-Urbana for Dad's Day Weekend. This year's big weekend highlights were the football team's come-from-behind-win over Purdue, 20-17, the Dads Day Variety Show at the Illini Union, and the Varsity Men's Glee Club Dads Day Concert at the Krannert Center.

For many dads, especially alumni, Dad's Day Weekend is also a time to relive those college years of old. The alumni dad is often reported dragging the family to various sites on campus, sometimes shedding tears over sentimental localities which are no longer existent.
"My dad piled all of us into the car and started driving, slowing down at every building he ever had a class in, backing up traffic. When we got to the point where the old baseball field used to be and he saw it was no longer there, he pulled over and just about broke down. It was starting to get kind of sad, so I got behind the wheel and sped him off to Gully's. He soon forgot the whole incident, and we had a pretty good time," Oliver Brown, junior in LAS, said

Many dads especially enjoy reliving the "free spirited party years" by patronizing as many drinking establishments as possible within the two day escape.
"My dad was supposed to go home Saturday night and would not leave. He kept walking into random bars, and I had to follow him," Tracy Mayer, senior in LAS, said.
Students also reap the benefits of having dads down for the weekend, which often includes free meals out, free drinks, mall excursions and trips to the grocery store.
"After the game and dinner, Dad was kind of worn out from the cold weather, so he passed out the credit cards, and Mom and I headed for the mall," Kristin Dolling, senior in LAS, said.

Overall, Dad's Day Weekend is the annual event Illinois dads look forward to most. As one dad put it, "Sure beats the flower show!"

# Vegetarians are sprouting up all over campus as students start thinking about their health. 

story by Michelle A. Johnson • layout by Meg Wyatt

ome may see vegetarians as ' 90 s hippies or animal rights fanatics, but, in fact, vegetarianism is more than just a recent trend. Many may believe that vegetarianism sprang up in the '60s, but the roots of vegetarianism run as deep as ancient India, classical Greece and Rome, and the biblical era. Widespread vegetarian movements in 19th century America and England attracted scores of prominent writers and reformers. Well known vegetarians of the past include George Bernard Shaw, Franz Kafka, Leo Tolstoy, Leonardo DaVinci and the great Indian leader Mohandas Gandhi, who believed vegetarianism was not only a way of eating, but a way of life contributing to one's spiritual progress.

Most vegetarians have different reasons for refraining from the consumption of meat, whether it be based on religious creed, environmental consciousness, or for health concerns. Vegetarians often vary in the degrees in which they define the guidelines of their diets, some refraining only from red meat, some refraining from all animal related products, eating only vegetables and some even claiming that vegetables "scream" as they are uprooted from the ground, eating only fruits and vegetables that die naturally when they fall to the ground.

Vegetarians choose the non-meat way of life for different reasons. Some are influenced by family and friends while others think it is environmentally correct.
"I just became a vegetarian five weeks ago, for no good reason. My friend Rick and I thought that meat was making us feel heavy. Being a vegetarian makes me feel like I've lost weight, even though I haven't," Jim Harper, junior in LAS, said.
"I've been a vegetarian for four years. I began by researching vegetarianism in books and magazines, and gradually phased meat out in about month. My mom got freaked out and started preparing more meat dishes for dinner. Eventually she accepted that this was going to be permanent. It's great because it's something positive you can do on a daily basis," Michael Graham, junior in Agriculture, said.

For some, meat is something that is too difficult to give up. Even historically, long time advocates of vegetarianism like Henry David Thoreau and Benjamin Franklin were, at best, inconsistent practitioners.
"I went to Burger King because I was going crazy and had a fish sandwich. I took one bite and began vomiting, and later, hallucinating about various members of the animal kingdom and hot cocoa,"' Harper said, jokingly. Perhaps Thoreau was a bit more eloquent in describing his experiences, but vegetarianism is more than just a trend for many who follow it. It is a way of life.

## THE "NEW" VEGGIES

Mexican students come together and give the campus a taste of Mexico during Latin American History Month. story by Tina Jordan•layout by Bob Gonzales
uring Latin American History Month, many exciting activities were exploding all over campus. On October 15, at 7:00 p.m., La Casa Cultural Latina and various other organizations sponsored an authentic "Taste of Mexico Fest." Delicious gourmet meals such as Capirotada \& Agua de Horchata, tostadas and enchiladas were served to approximately 100 eager students. While eating, the students indulged in polite conversation, danced, and listening to various rhythmic Latin American tunes.
"I think it's important to provide a comfortable and welcoming atmosphere for all students. This is an example of that. It's equally important to make this campus as comfortable as possible for Latinos/as. La Casa is here for that, especially in light of the fact that this university makes a very uncomfortable atmosphere for Latinos/ as. This also provides an opportunity for all students to come together and learn a certain aspect of Mexican culture," MariCarmen Moreno, junior in LAS, said.

The groupthat gathered to celebrateand experience Mexican dishes was extremely diverse. There were people from Puerto Rico, Africa, Jamaica, Cuba, Venezuela and various other places. "I learned that different kinds of people are indeed interested in Mexican culture. Also that individuals can come together and mingle with no problem at all. The food of Mexican culture can even be good when made by loving student hands," Heather Rodriguez, junior in LAS, said.

At theend of the evening, there was an enlightening presentation given by Imelda Estrada about Mexican culture - not just its cuisine, but it's also history, struggle and independence.
"Cultural events are very important because they reinforce our national identity as Mexicans, Puerto Ricans, etc. In this university atmosphere, our ability to feel welcome and identify with a program is vital for our development and success. All cultural programs are important because they help sensitize other people, and because they maintain and give us pride," Juan Rico, senior in LAS, said.

U of I student tastes a plate of Mexican food at the Taste of Mexico. There were approximately 100 students in attendance.
tudents gather around a table of Mexican cuisine during the "Taste of Mexico Fest." This was one of the many events sponsored by La Casa and other campus organizations during Latin American History Month.

## Ugh!!!! What were you thinking when you said "yes"? You don't even like this person! You're too

 nice. That's what it is. Now you have only a matter of hours before $I T$ will be on your doorstep, escorting you out on a DATE FROM HELL. There are a thousand other things you could be doing with your evening. A thousand other things you would rather do. Like trying out that new shampoo sample you got in the mail. Like renting the Star Wars trilogy. Like going to the supermarket and tasting all of the samples. Or maybe tonight would be a good time to rearrange your furniture. ANYTHING but a night of bad jokes, forced conversation and that absolutely awful moment when he or she is going to want a kiss. How will you get out of this? What will you say to him/her?"Since I'm into music, I just tell them I'm practicing," Katie Medder, sophomore in FAA, said. Practicing is a great excuse if you play an instrument. Heck! If this person doesn't know you very well, PRETEND you play an instrument. Studying is also a plausible excuse, especially if it's a weeknight. But what about a great all-purpose excuse?
"I always just say I'm sick," Tim Hughes, junior in Agriculture, said. This works wonderfully if you can pull it off. You can even make your date feel sorry for you. However, this maneuver requires a bit of acting. Coughing up phlegm, feigning nausea and moaning are recommended.
"I always make up something on the spot. My theory is if you're going to ditch someone, at least be creative," Marcus Jarboe, sophomore in LAS, said. Creativity is helpful. Sometimes if you are creative enough, the person will leave you alone forever. For instance, if your date asked you to go to the movies, tell them that the smell of buttered popcorn makes you violently nauseous. Or if they asked to take you out to dinner, tell them you are still learning how to use utensils properly and that it would be dangerous to eat within an eight-foot radius of you. Or maybe you'd prefer the polite, indirect approach.
"If I've told someone to call me, and I don't want to go out with them, I just screen my calls," Christie Hwang, senior in LAS, said. This would seem to be the most sensible approach. They never get the feeling you've lied to them, and you never have to talk to them. But this approach is basically copping out. And when your friends call they usually hang up when the answering machine comes on anyway. Then you're left with an endless stream of hang-ups. So maybe the best approach is to just tell your date you don't want to go out with them. Or say no to the date in the first place....NAH! The honest approach is no fun anyway!

# A mean, green mother from outer space starred in this year's lllini Union Board Fall Musical extravaganza 

story by Lainee D. Frizzo•layout by Ryan L. Almon

uring Homecoming weekend, a big green plant from outer space took over the world - or at least Foellinger Great Hall, on Friday, October 23 and Saturday, October 24, because Little Shop of Horrors was the 1992 Illini Union Board Fall musical.
"Little Slop of Horrors was completely run by students, "Jason Trubitt, sophomore in FAA and Executive Producer of the show, said. "We had a cast of 15 members, freshmen to seniors, whose majors ran the gamut. Not just theater, but everything from English to Business."

These cast members do not get paid - except by the sheer excitement of performing. However, the staff and the band were paid for their services.
"The show went very well because everyone was incredibly talented. We rehearsed for six weeks, and I don't mind telling you I'm glad it's over. It was hard work and a big commitment," Trubitt said. The cast rehearsed every day, Sunday through Thursday.

If you are interested in making this kind of commitment, you can get involved in an Illini Union Board Musical production. "We advertise in the Daily Illini for production staff," Trubitt said. "And you can apply directly for positions like Director or Choreographer. These directing positions are purely volunteer except mine [Executive Producer], a position that stems from the lllini Union Board. Cast auditions are highly publicized, too. We're always looking for new faces!"

Although the cast agrees that everything about producing the musical was fun, they said that the most exciting part was working with the plant puppet. Rehearsals were a bit awkward, trying to visualize what this plant would look like.
"The plant was great! Our puppeteer, Jeff Sterbenc, had to stand inside the plant with a harness around his neck, grabbing a rope and lifting a bar just to open the puppet's mouth. He must have lost 10 pounds because he was always covered in sweat when he got out. Everyone was sad when we had to return the puppet; we all got close to it," Trubitt said. This plant is the one from outer space that grows from a tiny, flower-like object into a huge blood-thirsty beast in the musical.
"They did a very, very good job of reproducing the plant and working with it. There were also a lot of good vocals, and they had a lot of spirit. 1 like the ending better than the movie's ending. In this musical, the plant kills everyone, and they sing this cute song called 'Don't Feed the Plants,'" Amy Moore, sophomore in FAA, said.

If you'd like to learn a little more about IUB's musicals without actually being in the show, watch for their Quad promotionss. In the weeks before the performance, there are always two sneak previews in which the cast members perform excerpts of the show. Besides providing good publicity, it also gives students a chance to get autographs before the rush!

# Mock trials offer different teams of students hands-on training and practice to promote their interest in Law. 

story by Lainee D. Frizzo • layout by Meg Wyatt

ou don't have to watch "L.A. Law" to know that being a lawyer is hard work. For ambitious students interested in law school, the $U$ of $I$ has a mock trial program to give them hands-on training. This program has been offered for six years and has grown from one team to four teams, consisting of about six to eight students per team.
"Mock trials give students training in trial law and familiarity with litigation," Joe Wenzel, professor and mock trial advisor, said.

- Students are presented a case by the American Mock Trial Association (AMTA) containing the charge, summary of facts and affidavits by witnesses on each side. One team, for example, would consist of three students on prosecution for the plaintiff and three witnesses. In the next trial the three witnesses will become defense attorneys, and the other three will be witnesses.

Under Wenzel's tenure as coach during 1991-1992, the U of I sent two teams, the maximum allowed to qualify from any one school, to the National Tournament. Before this tournament there are regional preliminary tournaments and then the annual tournament sponsored by the AMTA. The U of I's teams have been attending these tournaments for six years, three of these under Wenzel's guidance. The mock trial team has been successful because of his assistance as well as that of Scott R. Paulsen, their attorney coach, who travels from Peoria to help out.
"Mock trial training is invaluable because it improves your argumentation skills," Nerissa McGinn, junior in LAS and vice-president of the U of I Mock Trial Team, said. McGinn and the other members participate in four trials, consisting of two prosecution cases and two defense cases. Real practicing attorneys and judges give these students useful feedback in their critiques of the trials. McGinn said that, besides learning the general, mundane laws, the trials teach them how to use a leading question in direct examination.
"It's the best program I've ever been involved in," Ari Fisz, sophomore in LAS, said. "It's applicable to real world litigation. It gives us a definite advantage over other students going into law school."

Fisz claims that the trials teach students things they would otherwise have to wait to learn until law school. The trials are also beneficial since they are held nationwide and are structured and very competitive.

Mock trials give hands-on training that even law school cannot provide.
"Law school only teaches you the laws, and trial law can only be learned through experience," McGinn said.

If you're interested, or if you're just inspired by the moving arguments on "L.A. Law," you can get involved through Speech Communication classes or by contacting Professor Wenzel.

rawing blood from the arm of an anonymous patient, a nurse places a tube to catch the sample. HIV tests are given at McKinley Health Center for free to any student

iles of blood wait to be tested for the HIV virus that causes AIDS. All testing is done anonymously for the safety of the patient.

# College students predicted as the next major statistic to be affected by the battle against AIDS. 

story by Michelle A. Johnson • layout by Raleigh Bennett

he "I'm not gay, and I don't use intravenous drugs, so I'm not going to worry about it" theory no longer holds water in today's society, especially not on a university campus when it comes to spreading the HIV virus. According to Public Health District statistics, there has been a 132 percent increase in persons diagnosed with HIV in the last year with the only risk factor being heterosexuality. And with the additional factor of being female, chances of contraction are 18 times higher. Although no statistics can be released about the numbers of infected students here at the U of I, a recent study jointly performed by The Center for Disease Control in Atlanta and The American College Health Association offers some indicators.

The study was conducted on 35 private and public college campuses around the country in a random sample that anonymously tested all blood samples drawn for any reason at student health centers. The results showed that, on the average, two in every 1,000 students tested HIV positive. Some campuses ranged from 10-12 students per 1,000 testing HIV positive while others had zero per 1,000.
"It's a reality on college campuses, but we don't know the best way to reach students. The week of November 16th was AIDS Awareness Week, and we had very minimal turnout," Deborah Richie,Sexuality Education Coordinator of the McKinley Health Department said. "I think people have been so bombarded by the media, they just don't want to hear about it anymore. Unfortunately, the media isn't changing the way they go about sex."

Due to the fact that it takes the virus 7-10 years to germinate, today's students are expected to be tomorrow's statistics. In Illinois, statistics through September 1992 reported the largest number of AIDS cases to be in the 20-29 age group.
"Things like Visual AIDS' A Day Without Art and local concert benefits for AIDS research are good in that they reach a specific audience, but the art community, which is composed of many homosexuals, is already aware and sensitive to the issues," Amy Patlan, junior in FAA said. "The average Joe who hears of contracting HIV by shooting up will say 'Wow is that scary' and then turn around and have unprotected sex the next night. The message needs to reach everyone."

The message that students need to understand is that anyone can acquire HIV, and everyone who fails to use protection is at risk.

 voiced itheir opinions and cast itheir votes for three interesting candidatesIt was the season of the potato. For many voters, Vice President Dan Qua misspelling of the word "potato" determined how they would cast their vote Super Tuesday, November 3. However, for U of I students, this election year a little more important. Most of us followed the campaigns religiously and vot carefully, realizing that whoever we would choose would be in the White Hot while we're on the job market.
"This was my first time voting. Although I was excited about that, I can't say In excited about any of the candidates," Jennifer Marsh, freshman in LAS, said. L Marsh, many students had a hard time choosing a candidate, hoping that th would be electing the lesser of three evils: Bush, Clinton or Perot.
"I voted for Perot. He had a real chance of winning, too-before he dropped ou Scott McMillan, freshman in LAS, said. Perot's unique home-town politics a goofy sayings made him a favorite, and he became the most successful independ candidate for president ever. However, he lost much of his support when dropped out in June and then attempted to re-join the presidential race in "October Surprise."
"I wasn't enthusiastic about any of the candidates, but I wanted Bush to win didn't like Clinton because he dodged the draft, and at first the scandals about $h$ were funny. But they just dragged on too long, "Michael Perez, senior in Engineeri said. This year's election offered some of the juiciest gossip around. From Clinto affairs and draft-dodging to Perot's paranoid assertions that someone in his ye tried to murder him.
"Clinton and Bush skirted around the issues. At first they said family values w important, then they didn't matter, then they mattered again," McMillan sa Family values became a hot topic in the '92 election. After witnessing the birth single-parent Murphy Brown's child, Vice President Quayle announced that show undermined the importance of fathers and, consequently, showed no rega for family values. However, none of the candidates really determined what act family values were.
"A lot of students think that politics is something that you worry about later. we've been trying to show how the candidates we elect will affect the future," Jc Bagwell, President of Young College Democrats and senior in LAS, said. This y the Young College Democrats tried to educate the students more than campaign the Democratic Party, focusing on getting students to register before the deadli
"We feel the Democratic party was so successful because they had a lot of str voices for a change," Bagwell said. The Young College Democrats sponso Hillary Clinton's Rally on the Quad, and they joined other campuses around country in a satellite hook-up meeting with President Clinton. They also atten the Young Democrat's Rally in Chicago and met Al Gore in Vandalia during his tour.
"It was fascinating to see how the election of '92 wrapped up," Sharon Ya junior in LAS, said. "I'll always remember the scandalous affairs, ambiti billionaires and the word 'potato.'"

ords of the future are spoken by Hillary Clinton at a speech on the Quad. During President Bill Clinton's second week in office, he appointed his wife Hillary in charge of health care reform.

## tory by Michelle A. Johnson • layout by Meg Wyatt

The 1992 election day brought cold cutting cloudbursts, which were especially sid for voters who waited hours to exercise their constitutional right at Skelton ce, 302 S. Second St. in Champaign. By 6:30 p.m. WCIA, Channel 3 News, was ing the cameras over numbly saturated Precinct Seven voters whose spirits, vever, would not be soaked. The Precinct Seven Voting District consists dominantly of university students living from Third Street to Oak Street between niel Street and Springfield Avenue.
Directly following the close of the election polls, controversy began fueling und Dennis R. Bing, County Clerk and his poor planning concerning the adling of all of the registered voters. Bing, a Republican, apparently informed his ty members on election eve that the Seventh Precinct was going to be hard to deal $h$ due to the number of registered Democratic voters. Laurel Prussing, former ditor who ran for State Representative, suspected that the waiting lines were no ident.
"Bing knew the number of registered voters in the precinct, and also knew that dents wouldn't want to wait in line three and four hours to exercise their stitutional right to vote. No one should have to wait that long. This is America," issing said.
However, to Prussing's surprise after trailing behind contestant Republican Greg zad most of the evening, the precinct's tally put Prussing over the top, winning election by just 34 votes. Cozad demanded a recount of the votes immediately. December 1, the results of the recount, in fact, revealed that Prussing had gained vote over Cozad.
"I nearly froze to death, but it is my right to vote, and no one can take that away. er waiting two hours I wasn't about to leave," Mina Mun, junior in LAS, said. "It med like something fishy was going on, but I wasn't disheartened. I finally got rote at about 8:00 p.m., after arriving at 4:30 p.m. It didn't matter; I just wanted id in getting Bush out of office."
Election 1992 was considered the election of change. With more women and ple of color in office, students and the public in general may be looking at a new enda for the country. And during 1992, students definitely made the difference, ally and nationally.

> Voters at Skelton Place waited hours to EXERCISE their riqtr.

inging phones, television reports, and victory cheers filled the Democratic Headquarters on Election Night. The headquarters are located at 44 E . Main in Champaign.

# The first black sorority returns to campus to let the world know about the Pink and Green legacy. 

story by Toi Walker • layout by Peggy Christensen

lpha Kappa Alpha (AKA) Sorority was founded at Howard University in 1908. It was originally a social organization that grew to be a political sounding board for African Americans with over 750 chapters world wide. The sorority incorporated in 1913, which was the same year that the Gamma, or third, chapter of the organization was founded at the U of I.

For the last three years, however, the chapter was inactive because of procedures put in place by its national headquarters.

With 20 new women to uphold AKA's legacy of service to all mankind, fostering better relationships between collegeeducated women, uplifting the Black community, and cultivating high scholastic and ethical standards, the chapter plans on becoming a force once again on college campuses..
"I love Alpha Kappa Alpha Sorority's goals on the national level and the traditional base that it provides for Black women," Lori Langston, sophomore in LAS, said.

Nationally, Alpha Kappa Alpha Sorority, Inc., has six targets: Health, Arts, Black Family, Economy, Education and global perspective. Most community service projects that AKA Sorority sponsors are aimed at these. "The thing that I love the most about Alpha Kappa Alpha is that it is an organization of Black women that are united through their dedication to serve the campus community and the community at large. Through this work, we demonstrate our strengths and talents as Black women. This is vital to uplifting our people as a whole," Tracey Lee, senior in Communications, said.

Before its probation, the Gamma chapter worked with many differentorganizations on campus and the new members plan to continue this tradition. Some of these activities include Nite Rides, YWCA Junior Pal Program, AKAdemics, can shakes, walk-a-thons for the Juvenile Diabetes Foundation, Christmas caroling around the Champaign-Urbana area (including the nursing homes, hospitals and residence halls) and a campus-wide book and magazine drive for the African American Cultural Center.
"I hope through Alpha Kappa Sorority that we can help bring the Black community together at least here in Champaign-Urbana. I also hope to help unify all of the other Black Greek organizations," Danielle Cox, junior in Communications, said.

## THEY <br> ARE BACK

lpha Kappa Alpha sorors march onto the Quad before the November step show. Each neophite received gifts from all of the other Black Greek Council members.

# U of I students participate in the time-honored tradition of alcohol folklore. 

story by Lainee D. Frizzo - layout by Ryan L. Almon

ou remember the first time you tasted beer? "Yuck! Geez, who can drink this stuff?!" you wondered. But now that you're a little older, it doesn't seem to be quite so yucky. In fact, these days, it has become a past-time of its own. U of I students flock to the bars to stand in line like laboratory rats waiting for food pellets, just to satisfy their desire for the king of all beverages-alcohol. With this desire comes inhibition, incapacitation and ... some really great stories to tell your friends the next day!
"I have SO many good stories. Like the time I drank two bottles of whiskey on St. Patrick's Day. Ispilled whiskey allover my Irish sweater and let some girl Ididn't know borrow my leather jacket. Then, when we were sitting around the campfire, my boots caught on fire and the shoelaces burnt up," Michael Conniff, freshman in LAS, said. Conniff tried to extinguish the fire with his hands but, luckily, no one was injured.
"TheTuesday before Thanksgiving my roommatedrank over a liter of Jim Beam, and we thought he was going to hurl when he became incapacitated. So we sat him on the front porch, but he rolled down the steps and landed face down in the mud. He was so butt-wasted that he was drunk the next day, and we weren't going to drive him home for Thanksgiving," Jason Hart, sophomore in Engineering, said. Hart's roommate recovered enough to ride home. Unfortunately, he was still drunk for Thanksgiving.
"I went to a New Year's Eve party in New York City where I drank half of a bottle of champagne and half of a bottle of scotch. This girl attached herself to me, and my friend tried to warn me, but the goggles were on pretty thick that night. I woke up the next day in BROOKLYN with the bottle of scotch," Eric Pelz, freshman in LAS, said. With no money and no ride home, Pelz also had a hard time getting home for the holidays. When he finally got home, his parents noticed the huge, purplishblemish on his neck and from then on referred to the mystery girl as "electrolics-lips."
"Some girl I didn't know gave me a hickey, too! I was at a Mardi Gras party at C.O.'s, and $I^{\prime} d$ been there since about 2:00 in the afternoon. I met the girl at $9: 00$ p.m. and she gave me a hickey-right in the middle of C.O.'s!" Conniff said.
"After a party on FirstStreet,I went to a Fiji's after-hours where I swam in the hot tub and ordered a pizza to the hot tub. I also drank too much at a Lincoln and Main party and square-danced until the owners of the house kicked us out at dawn. But the best story I have is when me and my friends drank champagne and swam in the State Capital fountain," Jennifer Lester, senior in LAS, said. Lester, one of the few women willing to share her alcohol stories, remembers being terrified that the police would find them and arrest them for trespassing.
"Istarted drinking before I came up here, and I only drink every week orso. Not that often. Idrink in moderation, soI don't have any good drinking stories," Jacqueline Blue, junior in Education, said. Many students, like Blue, can't boast tales of enormous hickeys or nights of skinny-dipping. Many U of I students seem to just enjoy drinking in moderation ... even if it's not as entertaining for the rest of us!

## KING OF BEVERAGES

hile drinking at Kam's, students reminisce about past drinking experiences. Kam's hosts many different events for the various organizations on campus.

# The Champaign-Urbana community remembers Dr. Martin Luther King Jr. in grand style. 

story by Tina Jordan • layout by Monica Soltesz

groups, advary advocated by the Civil Rights leader Dr. Martin Luther King Jr.. As an African-American who fought against the racism in the U.S., King believed in equality, as well as the integration and unity of all mankind. King is respected and honored for his nonviolent leadership.

In remembrance of these ideals, the Martin Luther King, Jr. Advocacy for Justice Committee sponsored the "Where Do We Go From Here" celebration at Assembly Hall. Thousands of people gathered to pay their respects to a man of principle who was assassinated in 1968. The entire evening was filled with joy, tears and reflection. Various community choirs sang spiritually uplifting songs and various church reverends gave motivational speeches.

To make the annual event complete, the "Living The Dream" Scholarships of 1993 were given to Champaign-Urbana's brightest high school students. The scholarships were awarded on the basis of financial need. In 1993, for the first time, eight annual scholarships of $\$ 8,000$ were given to high school students to attend the University of Illinois or a Black four-year college with whom there is an agreement. Or $\$ 6,000$ to those who attend Parkland College for two years and then the $U$ of I for an additional two years. The 1993 Dr. Martin Luther King, Jr. scholarship recipients were Charles Bridges of Urbana H.S., Theodore Carter, Jr. of Urbana H.S., Tu Diep of Centennial H.S., Jennifer Franco of Centennial H.S., Rachelle Franco of Centennial H.S., Aaron Gordon of Urbana H.S., Nicole O'B'rien of Urbana and Carisma Simmons of Centennial H.S.

With scholarships and events such as these, equality in the educational system and around the world can be achieved regardless of race, gender, or social class. King's dream will be kept alive.

# Senator William McKinley's vision lives on at the foundation that remembers his ideals. 

story by Michelle A. Johnson • layout by Meg Wyatt

ou may have stopped in for coffee or Saturday night jazz at the One World Cafe, but you may not know the history of the corner of Fifth and Daniel Streets, or all it has to offer students. The McKinley Church and Foundation, was the first church and foundation built exclusively for students at any state school, and still continues, 82 years later, to provide for students. Senator William McKinley, whose father had been a minister, granted the funding to construct the McKinley Presbyterian Church in 1911. In addition, he commissioned the famous Louis Tiffany to create a window in the chapel depicting the story of the Good Samaritan; still today the only Tiffany existing in Champaign-Urbana. Presby House, also built in 1911, was the first women's residence constructed on a university campus, and today is open to all women. In 1929, the "I" shaped Foundation was built for students through the funding of Presbyterians around the state.
"The stress however, was not on Presbyterianism," Steve Shoemaker, director since 1982, said, "but on openness to all and social activity."

Historically, the Church and Foundation have worked in that spirit. In the late 1950s and early ' 60 s, members worked for Civil Rights for Afro-Americans, women's rights, lesbian and gay rights, and minority's rights. Today the McKinley Foundation offers a Gay/Lesbian Support Group, self-help groups and counseling. The Foundation offers community services such as the winter emergency shelter for homeless men and Scot Free, a clothing recycling-exchange center that receives clothing to provide for the needs of students, international visitors, needy families, refugees and the homeless. These community services also serve as opportunities for student volunteerism. Each February they sponsor a volunteer fair when national and international volunteer organizations come to recruit students who are interested in long-term volunteer work. Through their Intercambio Cultural Maya, students can take a two week trip to the Yucatan in Mexico to work on service projects. They offer internships, and opportunities for talented students to show their art in a weekly display.
"I've been here for almost four years now, and I never realized all of the activities the McKinley Foundation offers. I think it's really unique what they're doing," Beth Block, senior in LAS, said. "It seems more like what a church should be - a place where people can help themselves by actively helping others."

> HELPING $H A N D$

## academics

U of I students often follow academic tradition, choosing trustworthy majors like Economics, English, or Engineering and taking general classes, such as Rhetoric 105 and Economics 102. Ambitious Illini often opt to pursue a slightly different academic path by scheduling a fun kinesiology class or flower arranging. Others seek creative majors like theatre and urban
planning.
Those who welcome change and alternative routes to success find the college experience stimulating, promoting strength and growth. Unfortunately, trudging through snow to overcrowded classes and early labs, after all-nighters before impossible exams, can drag us down. At the U of I , we rise above the monotony of routine by discovering innovative and fun ways to get relief. During long, boring classes, some students vent their emotions and philosophies by writing on old desks. Others break the pattern of studying at the library by scoping out unusual study spots, such as academic buildings and coffee shops.

Students also creatively conquer the stress that accompanies everything from maintaining a good GPA to solving the mysteries of the opposite sex. Socializing with friends, exercising at IMPE, or just listening to some favorite music help us keep our sanity and spirits. Academics are more than textbooks and lectures. With a little motivation, dedication and creativity, students can confidently challenge tradition and successfully design their own slightly different college experiences.

a mask is being painted on her face, ine Kavanagh, sophomore in FAA, keeps $r$ eyes closed for protection. The masks, aich took about 10 minutes to put on and out 30 minutes to dry, were used in the cond year makeup class.

Durínga NAACPworkshop, KimMalone, sophomore in CBA, laughs as she listens to other students speak about their experiences. Local high school students participated in the discussions.

While discussing one of the topics at the workshop, an Illinois student shares his own views on the subject. Some of the topics of discussion were family planning, sex and relationships.

— Rick Widmer

> N A A C P SPONSORS A WORKSHOP TO EDUCATE L O C A L STUDENTS

# EDUCATING FOR THE FUTURE 

On January 24 the University of Illinois chapter of the National Association for the Advancementof Colored People (NAACP) held a series of workshops through its Mentorship Program. Local high school students came to discuss subjects they may not feel comfortable asking their parents or teachers about. The topics that were talked about were family planning, sex and relationships and communication between men and women.

One of the meetings biggest messages brought up the fact that in this day and age, children are basically being raised by the television, and with all of the media hype about safe sex, condoms and AIDS, people think that today's high school students should be pretty well-versed or the
subject. Many of these students still think that the best people to get quick answers about sex from are the other kids that they think have more sex than they do.
"We thought it was really important that students did not think it was okay to let the blind lead the
blind,"
Maji
Ford
junior in LAS, said.

Fittingly during the sex workshop questions about birth control and sexually transmitted diseases were candidly discussed. One Centennial High school student asked about whether it was true that if a person had syphillis
and gonorrhea, their lips would turn green. Other students questioned what they thought was common knowledge that a person can become pregnant standing up. The workshop tried to make clear such inquiries.

During the family planning workshop, t h e students pulled random numbers in pairs of 1-6 to tell who in the room they were married to. Courtney Smith, junior in LAS said, "I wish all students could get reality checks like this more often." The students then pulled random occupations to tell what salary range they were in and at the
end of the workshop the students made a budget according to how many children, what jobs they had and where they lived. The students were caught completely by surprise by the reality this imposed on them. "One girl never thought she would have to buy toothpaste or toilet paper," one of the counselors said.

The day turned out very productive with a lot of questions finally answered. Through honesty and laughter, being someone's mentor is well worth it. Kim Malone, sophomore in CBA said, "The reason I like being a mentor is because it feels really good to know that you have an impact on someone's life. It's being a friend, a big sister. It's always worth it."

# EVER BEEN TO KAM? 

Everyone tells you to take advantage of this wonderful university. The educational potential of the museums, special lectures, and other facilities are practically crammed down your throat by parents ("When I was your age...") and professors ("This week's assignment will be a trip to..."). As a fellow student, I'm not going to pressure you. Butlamgoing to highly suggest that you take advantage of one of the $U$ of I's best kept secrets: the Krannert Art Museum and Kinkead Pavilion.

Asian, Medieval, Greek and Roman, African and Pre-Columbian art are just five of the eight permanent collections at the KAM. Anyone who likes Contemporary Japanese Calligraphy, GraffitionClay, or Cooked Europeans, Raw Americans is out of luck.

These exhibits were displayedtemporarily inFall 1992 at the KAM.

Linda Duke, Director of Education at the museum, is optimistic about offering the facilities to students. "I'd really like
t o encourage undayadue instructors to use the museum more. There's an excellent Resource Center which provides videos and reproductions. The permanent collection isgreat for humanities classes. I'd also like to see more collaboration between FAA and the museum."

The offerings for young
> "A visit to the museum is full of feelings and thoughts. Everyone brings their own experiences when they visit."

## - Linda Duke

children, senior citizens, students and the general community areendless. "The KrannertArtMuseumprovides different educational possibilities to people of all agesandbackgrounds," Diane Stumader, Coordinator o f Volunteer Activities,
s a i d.
"Many peopleare attracted by the temporary exhibits, and then stay to see the rest of themuseum. It'sgreattowatch people learning through experiences."

Once you step into the KAM and Kinkead Pavilion, you'll realize that there is much more to experience
then viewing paintings and photographs hanging on the walls. There are musical concerts, guest lecturers, the Palette Cafe and Bookstore and also activities for children and families. "A visit to the museum is full of feelings and thoughts. Everyone brings their own experiences whenthey visit, and every reaction to the art is different," Duke said.

Because any Art Education or FAA student can tell you what you're missing, I won't continue to pester you. I simply wanted to let you know that you may be missing out on some of your peers' greatest artwork (so you can say, "I knew her when..."), the wonderful temporary and permanent exhibits, and most of all, a refreshing learning experience.

Students watch a historic preservation film. Urban planning majors not only study the problems of city life, they try to solve them

- courtesy of Ken Reardon

## We're planning YOUR WORLD

Most of us just take for granted that a new shopping mall is being built, or that streets run parallel to each other. We never think about where the ideas come from or why buildings and streets are placed the way they are. Well folks, they do not just appear out of nowhere - each building, street home and shopping mall is strategically thought-out by an urban planner.

Urban planning is one of the more interesting, yet least known about majors. They begin their studies by learning how cities were designed and run in the past. Through these studies, students can figure out which city designs and methods of transportation worked well, and then
decide which methods should be continued or discontinued.

Carrie Havey, freshman in FAA, said, "It is interesting to compare the cities of today to those of ancient times and see how much they a $r$ e actually alike."

## Along

 with the actual layout of the cities, urban planners also look at the social problems residents face in big cities, such as overcrowding, inadequate transportation systems and poor economic situations.A class called Urban Planning 260 specifically addresses each of these issues and tries to offer solutions. Some of the problems
> "The importantaspect of being an urban planning major is that I have chance to better society."

— Jeff Kaminsky differen ways to redistribute money to the poor and underprivileged families.

According to Jim Herbick, junior in FAA, he chose to become an urban planning major because it
was very interesting to him to learn how to be able to help solve the many problems that society faces in today's world.
"The most important aspect of being an urban planning major is that I have a chance to better society. I can also directly see the results or effects my work hason society and the people involved," Jeff Kaminsky, senior in FAA, said.

So next time you get annoyed at curving streets that seem to lead everywhere but where you want to go, remember there are good, researched reasons why they are that way. Either that, or those urban planners have not done their jobs!
story by Debbie Williams layout by Monica Soltesz

A variety of glassware, including faces, vases and pitchers make up student projects created for glass blowing classes.

Fiery heat is within a glass blowing oven at the South Farms' lab. Kilns are used to heat the glass before it is ready to be shaped

Manipulating some glass at the end of a blowstick Matt Brod, graduate student in FAA, uses newspaper to shape his piece. The university has one of the top glass blowing facilities in the world.

# A FRAGILIE SUBJECT 

With all of the majors and different classes that are offered, student is rarely aware of their many options. Some students tease about "under-water basket weaving" and other obscure topics in which students probably cannot major. It is unlikely that those students know that they can major in glass blowing.
"It is strange working with a material that is usually so fragileand precious, in liquid form," Tracy Code, junior in FAA, said.
The glass is in molten form in the gas furnaces at the South Garage and at the South Farm's Art and Design facilities. It is then "gathered" from the furnace onto a blowpipe, blown and shaped. The glass can be shaped by hand using newspaper that is saturated with water, which is quite a feat considering that the gathered glass is about 2,000 degrees Fahrenheit.

The glass can also be shaped on a steel slab called a marver. The artist continues to blow and shape the glass until it is in the desired form. The piece's neck is then cooled by using a tool called a "jack" which make a sharp line where the piece is to be chipped off the blowpipe. An assistantthen brings a small gather of molten glass which is on the end of a steel rod called a "punty." The punty is connected to the base of the piece, and the piece is then chipped off at the neck and taken back to the furnace to be reheated. The piece must, of course, be
continually reheated throughout working to prevent cracking. It is now on the punty, and the lip can be heated and worked to the desired form.
"The best part is, unlike painting or something, if you don't like what you've made, you can just break it and shovel it back into the furnace!" Cheryl Long, junior in LAS, said.

Glass differs from other media in many ways. Although it is worked in a somewhat liquid state, it is still in a sense fragile because cracking is always a concern. The artist is continually working to keep the shape on the center on the blowpipe. It is also different because there is always a chance of being burned since the
artist works closely with a 2000 degree piece of material.
"Joe Grindley, who is a professor

> It is really strange working with a material that is usually so fragile and precious, in liquid form.
> - Tracy Code
here, designs most of our equipment, such as furnaces and kilns and specialty equipment, and it takes a team of five about one week to build a furnace," Richard Whiteley, graduate student in FAA and a teacher in Australia, said.
$U$ of I has one of best equipped glass education programs in the world. Both facilities are equipped with furnaces in which the glass
is melted down and gathered from aneelers. They are heaters that heat the glass until it is an even temperature and then gradually cool the glass evenly without cracking. Glory holes, which are like heaters, reheat the glass as it is worked. The South Farms facility also has equipment to mix theirown colors and kilns to work glass without actually blowing it. In kiln working, the glass is melted into plaster and silica molds.

After being evenly cooled, they can be cut, ground, polished, sandblasted and manipulated in different ways to achieve a totally different finished piece. The cold working facilities are also very well equipped. There are different types of grinders such as wheels and belts. There are also several large diamond bit saws to cut glass. Students also have access to a sandblaster and polishers.

Coldworking offers a totally different way to work the glass. There are many well known artists who do not even work with molten glass, only coldwork unblown glass.
"I am very particular a bout coldworking my forms," J er ry Williams, senior in FAA, said.

According to Whiteley glass blowing was only developed in the United States in the late 1960's and early 1970's. And Bill Carlson, who is a world renowned glass artist and also a professor at the $U$ of I, served as a catalyst to bring the program here to the standard at which it stands today.

Due to the high quality and talent of students and
faculty at the university, many well known visiting artists work at the U of I , and most of the glass professors are highly regarded in the art field. Jose Chardiet, who is the head of the glass department, has work in shows throughout the country. Also, Chuck Savoy, a student and teacher in glass blowing, is one of the top glass blowers in the world.

Students come from all over the world and the United States to further their study in glass. They have come from as close as Connecticut and as far as Sweden, Japan, England and Australia.
"I was drawn to the program here because of Bill Carlson and the exposure of his work," Whiteley said.

Because of the university's well known artists and students, visiting artists come from all over the United States, Italy and Australia as well. Leno Tagliapietra, who works closely with and is friend to the U of I's Chuck Savoy, is the most respected and most versatile glass blower in the world and comes every year from Murano, Italy, to work with students and friends.

Beginning Glass at the university is a course that, although not very many people know it exists, is open to anyone and has no prerequisites. Visiting artists can always be observed, even by students who are not able to take the course. With all of the art talent right here at the university, students can always go out to the South Farms and watch artists working. Glass is an art form that unfortunately, not many people actually get to work with. It is a beautiful and dramatic substance whose qualities and possibilities are endless.

Janice Moi offers a spoonful of pumpkin seeds to a visiting student. A sunny afternoon at Illini Grove provided a nice background for an Asian American Association social event

# A S I A N S CELEBRATE THEIR CULTURE W H I L E DISPELLING MYTHS ABOUT THEIR RACE <br> <br> MAKIING THE GRADE <br> <br> MAKIING THE GRADE at the big u. 

 at the big u.}

If you're Asian American, outgoing and want to know about the best parties around, join the Asian American Association (AAA) where Asian Amercians celebrate....culture? This was AAA image six years ago. Now, half a decade later, it has switched to a more educational purpose. It is still a social group, but now the newco-presidents, Ho Chie Tsai, senior in Engineering, and Anna S. Hui, senior in LAS, and their 20 officers, have expanded their image to stress education and the importance of Asian culture.

AAA has about 280 members. With so many members, one might think that AAA is a support group where smart people come together, stress education, and define their own meaning of success. Such stereotypes from other
people, as well as other Asian Americans and how they perceive themselves are also an AAA concern.
"We want people to be more knowledgeable of the association in order to increase our exposure on campus. A lot of other Asian Americangroups work with our g roup because we are trying to develop a direction t hat concerns education and cultural awareness for our culture," Tsai said.

One of $A A A^{\prime}$ s causes is to push for an Asian American Cultural Center and Asian American Studies course. "Celebrating cultural diversity is difficult to do when there is no place to celebrate. What better
way to do this than to have a cultural center, where everyone can see art, read from a well-stocked and current library, and attend meetings or obtain information about various ethnic groups? Moreover, the presence of an actual

> Celebrating cultural diversity is difficult to do when there is no place to celebrate. - Jessica Chen
facility
suggests permanence on the part of the University to commit itselftoward s u c h celebration," Jessica Chen, senior in LAS, said.
Along with breaking the stereotype on campus, another concern is the "model minority." "Model minority" is a term used to single out the alledged "best" or most intelligent minoritygroup. "We're out to show that we are not a
homogenousgroup. We're not a model minority, it's not true. It's more harmful than helpful. People think that it is a good thing, but it's really a bad thing. If you looked into the model minority myth' history, it never existed before 1960. But during the civil rights movement, the 'white man' used the term to kill the struggle for African Americans. It's kind of a divide and conquer strategy. The white man is saying, 'Look at this group of people, they've succeeded, why can'tyou?' There's no real substance to it," Tsai said.

AAA's future activities focus on doing more for the community and the homeless. Along with this they are working on being with other people of color groups and uniting together on multicultural issues.

## Aspringlareers

Whether it be on stage or behind the scenes, theater majors receive top notch perience to help prepare them for the world of show business.
In order to become a theater major, students must audition for a position in the program. These ditions are held in cities all over the country and are extremely intense and competitive. Once the program, students must audition again each year in order to remain in the department. "One Ipful thing about the auditions is that they give you feedback on how to improve yourself," said nia Kazarov, freshman in FAA.
The undergraduate theater majors are fortunate because they are allowed to devote a lot of time their major, while getting a taste of all of the different aspects involved with the theater. While ey are exploring their major, undergrads are required to take many different types of classes such acting, lighting design, scene design and costume design. One of the classes they have to take a freshman is Theater 108, a year long class broken up into eight week sections. Each of these ctions is devoted to a different aspect of the theater, including acting, set design and lighting sign. The class gives students a full appreciation of each part that is needed in order to make a oduction successful.
Theater majors are eligible for a Bachelors of Fine Arts (BFA) or a Masters of Fine Arts (MFA) which cludes specialization in acting scene design, costume design, lighting design, sound design, stage anagement and theater technology. Since both of these degrees are professional training degrees, aduates are qualified to do anything in the world of theater, from acting to stage management. The eater department also offers a Masters of Art (MA) and Doctoral (PhD) degrees in both theater erature and criticism.
David Knight, theater department head, said, "A student who receives a theater degree from U I will be successful because the degree we give is one of the best in the country."
Each year, the theater majors must produce eight plays that are performed at Krannert. The idents act, design and build each one of the productions themselves. The productions are of a ofessional standard. Students also put on plays at the Armory Free Theater. These productions e originated and run entirely by the students. Through these performances, the theater students rn their degrees and gain valuable experience.
The theater department is very special in many ways. For one thing, the students have an traordinary facility in which to gain knowledge of the world of theater. The Krannert Center for e Performing Arts, which is considered one of the top 10 performing arts centers in the world, ovides up to date equipment as well as a television studio in which students learn acting and lighting design specifically for television. Krannert also provides a top computer design facility with which students design lighting, costumes and scenery entirely by computers.
The department brings in professional actors and directors to enhance the educational experience. The $U$ of I's BFA gree is the only one available in Illinois and one of the best in the country. "The best thing we ive to offer students is the intensive training by a professional faculty who is extremely dedicated the students," Knight said.
"The most important thing about the theater department is that each department is unified. eryone realizes that each department is an integral part of the show and each department deserves e utmost respect form everyone," Kazarov said. This is part of the reason why the theater partment is so successful.

## NewPealms

At the Krannert dance studio, Bebe Miller, artist-inresidence, instructs a dance class. Miller's work, Sanctuary, was performed in Jaruary at the lllinois Dance Theater's Festival '93.

When most people think of dancing, they usually tend to picture a crowd of people out on the dance floor either at a party or in a bar. But for a dance major, dancing is much more than just having a good time - it is a way of life.

The dance department may be small, but it is highly respected. Original student work are featured in national programs and competitions each year and they also share and display their creativity through different university productions held throughout the year.

Each faculty department member has danced professionally. Along with the experienced staff, the department usually brings in outside guests to enhance the learning experience of the students. Bebe Miller, a post-modern choreographer, was ar instructor-residence during October and November. She taught a series of maste classes and presented her recent work, Sanctuary, to students in the department to be performed at the Illinois Dance Theater's Festival '93 in January. The faculty is smal in size, but this enables them to work on a one-to-one basis with their students.

Patricia Knowles, head of the dance department, said, "The best thing about ou faculty is that each one of us shares a unified philosophy about dance. We are dedicater to training our students not only to be good dancers, but to be sensitive to the societ outside of the dance world."

In order to receive a Bachelors of Fine Arts or a Masters of Fine Arts in Dance, student are required to take both ballet and modern technique classes, as well as improvisation and composition classes. The students are also encouraged to pursue study in jazz and tap. Emphasis, however, is placed on the students' own creativity and expression Besides inside the classroom critiques, the dancers have many opportunities to perform in shows that showcase their talent such as the Studiodance and the Illinois Dance Theater productions.

Olga Tragant, graduate student, said, "The experience of performing makes me fee alive, as well as fulfills my need to express myself."

One unique aspect of the dance department is that the students are encouraged ti create different collaborative projects with the schools of music and theater. This give the students a chance to explore new ideas and possibly push art and dance into a nev area.
"The best thing about being a dance major is the opportunity to explore, discover anc question both new and old works in order to further develop myself and my work," Tragant said.

As far as future plans go, dance majors have many choices. Some move to the big cities around the country such as Chicago, Minneapolis, or even Amsterdam, Netherlands in order to continue to study, or to dance with a professional company. Students may

## A World

 also open a private dance studio to teach, or get certified to teach dance in publi schools."We hope that each student has been inspired enough to be resourceful and successfi in the future," Knowles said.

# ANIMAL crackers 

So you've always wondered why those southerly winds smell like cows and horses and pigs and..
"Old Mac Donald had a farm, ee-i ee-i oh. And on that farm he had some chickens..." As you may already know, the $U$ of $I$ also has a farm. All you have to do is head south of St. Mary's Road and you will be able to find cattle, horses, pigs and among them assorted students and faculty milling about the South Farms. Students and teachers are there for one specific purpose: to further their knowledge in the area of Animal Sciences. Over 350 undergraduates are enrolled in either the Science Option or the Management Option of Animal Sciences.

Although
the Department of Animal Sciences focuses mainly on animals, there are various things students can do once they obtain their Bachelor
of Scence degrees. "It's a very open field," Phil Perzee, junior in the Management Option who is from a dairy farm and has worked with cattle for about 12 years, said. "I may even decide to work with the U.
S. Department of Agriculture."

For many students though, $t h e$ ultimate goal is to apply and g e t accepted t o veterinary school. Margaret A. Post, freshman in the Science
> "Animal Science majors don't just study pigs and cows. There's a scientific side to it - not everyone is a farmer."
elsewhere."
Kimberly Ford, sophomore in the Science Option, is also considering veterinary medicine. She intends to specialize in the field of oncology, primarily because shehad cancerous dogs as a child. She wants people who know little about the Animal Sciences to be a ware $t h$ a t "Animal Science majors don't just study pigs and cows. There's a scientific side to it - not everyone is

## - Kimberly Ford

 Option, isinterested in becoming a veterinarian. She likes to work with the Department because "it's not simply a pre-Vet program - it gives me some real animal experiences I might not get

## farmer."

Old Mac Donald and the South Farms, however, do have their disadvantages. Neither deals with exotic animals. "The Animal Sciences

Department hasn't helped me accomplish my goal of learning about and working with small or exotic breeds," Nicole Neighbors, junior in the Science Option, said. Neighbors, as well as Ford, are somewhat disappointed with the lack of training with the more exotic animals. "This is as well rounded as the $U$ of $I$ is going to get, although 1 wish there was more," Ford said.

In general, the Department of Animal Sciences offers a wide variety of classes and experiences to its students. Students can choose to become certified in artificially inseminating cows, while others might take classes in the area of meat inspection. Andwho knows? Maybe someday one of these people will be working with that famed animal scientist himself Old Mac Donald!

Explainíng a piece of anatomy to her class, a teaching assistant uses a bone model for a visual effect. A lot of human anatomy classes are held at night

During their night class, students work on one of their required lab experiments. Students have to complete each lab withín a three hour time period

## COPING WITH <br> STRANGE CLASS TIMES CAN BE DIFFICULT

## IS CLASS ON SATURDAY?

While most of us are home studying or tching TV, or even ing the bars early, ne students are still in ss. Yes, classes at ht and on Saturday do st and some students e to take them. Some these night classes n begin as late as 9

Why would someone ide to take time away n rest and relaxation head out to class? fortunately, some dents can only take se classes at these es because they are y offered at such es. Others opt for a urday or night class avoid unending fflicts with their edules. Whatever the son, most people do like having class at
night or on Saturday.
Stephanie Alsberg, sophomore in ALS, said, "I hate having my physiology lab at night because it makes the day $t h a t$ much longer. By the time I get b a c k home I just do not feel l i k e studying anymore."

Another gripe students have is that night classes interfere with extracurricular activities. Since most organizational meetings and other activities are often held at night, these
students are many times unable to participate in them.
"The worst part about having two labs at night is that I have to miss a lot of things that I would like to do. It a 1 s 0 makes it hard to study when I'm in the lab really late," Carrie Londo, sophomore in LAS, said.

Many students also do not like the idea of having to walk to and from class at night. Linda Hewitt, senior in

LAS, said, "The main thing that I do not like about having a night class is that it is unsafe for me to walk alone on campus."

Londo agreed, "I would rather take lab during the day so that I don't have to walk home in the dark."

For many students, taking these irregular classes is inevitable. The problems and inconvieniences they create are simply things that students must deal with. Luckily after graduation these people won't have to cope with having class until 10 p.m. or having to wake up on Saturday morning to sit in a lecture after a night of partying.
story by Debbie Williams layout by Meg Wyatt

As Amy Todd, freshman in FAA, searches through her notes Mark Neidercorn, senior in FAA, looks on. Many classes are held on Saturday because there is no other time that a classroom is available.

## HARD TO FIND A CHAIR AND HARD TOSTAY AWAKEIN C R O W D E D CLASSES

## PIENTY OF STUDENTS

It's the first class of the semester and the professor can't have too much to say, so you sleep in a little. You grab an apple and walk out the door, thinking about how boring your large lecture will be. All you have to do is find a seat in the back and enjoy your morning nap. However, as you walk into class, you realize that since you slept those extraten minutes, you now have no chance whatsoever of finding a seat in the completely packed, standing-room-only auditorium. Good morning, U of I student.

Rachel Roberts, freshman in Agriculture, said that the university should "raise standards to cut down on the number of incoming students." Although this may seem a little harsh,
"cutting back on the number of students enrolled at the $U$ of I will open up more spaces in each of the large classes."
Large classes do h a v e s o m e benefits. If you can find a seat, it is $t h e$ opportune place to finish your lastminute homework or catch up with friends on the weekend's activities. Also, if you can't get out of bed for class one day, you can generally find someone's notes to borrow.
"A large lecture class is usually easy. There are

> A large lecture class is usually easy. There are always multiplechoice tests and it's easy to skip.
always multiple-choice tests, and it's easy to skip," Jeff Salchow, senior in Communications, said.

JulieRodriguez, freshman
i
Agriculture, likes this because " the attention strays awayfrom me. I can hideinmy Human
Dedotmat class." What can the $U$ of $I$ do about helping students learn more in large classes with the current budget? Adding more discussion sections would give students, as well as teaching assistants, the opportunity to explore topics more in depth. In
many cases, small discussion groups make up for the lack of individual attention in large lectures.

According to Kristina Hiney, sophomore in Agriculture, it is very difficult for her to ask qustions to the professor in a large lecture. "I don't want to bother them. In small sections you can review with the TA and ask questions."

Well, U of I student, you've lived through your first large lecture and learned more then just what that distant figure with the microphone told you. You learned that for your next class, you'll get there early in order to find that perfect place to sleep - whoops! - I mean that perfect place to take notes.
story by Amara Rozgus layout by Peggy Christensen

U of I students listen to a lecture in Lincoln Hall
Theater. Large lectures sometimes serve as a social hour instead of a study hour.

University students take notes during a large
lecture. Some classes have reached over 700.

## FINDING STRANGE PLACES TO HIT THE BOOKS

 ANYWHERE BUTTHELBRARY

Need a new place to study where you can actually get some work done? Apart from the usual places like the Undergraduate and Graduate Libraries, the Union and dorm rooms, there are other more interesting places on campus that are great for studying.

Food, often a necessity for quality studying, can play a big part in deciding where to hit the books. When asked their favorite spots, students mention Espresso, One World Cafe, The Etc., and even Perkins Restaurant. In addition to great snacks, Espresso and One World Cafe both offer a variety of coffees to keep you awake while cramming for that exam.

Emily Downes, sophomore in LAS, said, "One World is a great place to study because it's quiet, and you can study out-
side. I like the coffee of the day."

When looking for somewhere a little more deserted, many students head over to university buildings. They often have s mall lounges set up especially for studying. On the second floor of the Mechanical Engineering Building, students have access to tables, chairs, and vending machines. This particular building is also unique because it has a small courtyard so that students can study in the basement.
"I like studying in the
> "I prefer to study at the while I'm doing laundry. That way, I kill two birds with one stone."

\author{

- Joe Bresingham
}

Mechanical Engineering Building because there are not a lot of people to distract me. It's wonderful if you really need to get a lot of work done," Christina Mantis, sophomore in Engineering, said.

If you prefer a more comforta b l e place to study, the Krannert Center for the Performing Arts has big couches in the lobby. However, you may find yourself stretched out and napping instead of studying. If you get a sudden case of the munchies, Intermezzo provides tasty food and drinks to give you the energy
needed to continue working. On a warm day, students can be found buried in books outside in the amphitheater, where the fresh air is motivating, and the peace and quiet makes it easy to concentrate.

With a campus as big as the $U$ of $I$, nobody should be able to find a reason to complain about finding a good place to get some work done. Whether you need a comfortable couch in which to read, a place that serves caffeine-in-a cup to keep you going at a quarter to midnight, or a sturdy desk and a bright light, that special place conducive to studying can probably be found in some of the most unlikely places both on and off campus.
story by Debbie Williams layout by Amy A. Dooley

# H I L L E L UNIFIES JEWISH STUDENTS ON CAMPUS <br> <br> A HOME AWAY <br> <br> A HOME AWAY FROM FROM HOME 

 HOME}

Serving both religious and social needs, Hillel has proven to be a "home away from home" for the Jewish
campus community
"Hillel sponsors social, cultural, political, and religious events with Jews, for Jews, and about Jews across the full spectrum of programming and inclusive of all Jewish religious movements," Rabbi Jeffrey Falick, Hillel executive director, said.

Not only does Hillel offer religious services for each of the various sects of Judaism, but there are regular lecturers, courses about different aspects Jewish culture and 16 organizations representing a broad
spectrum of interests.
From dialogues on Israel to fundraising campaign to sponsoring the foundation of the college Jewish community and serves Jewish needs its own literary completely. magazine, Hillel offers endless opportunities $f$ or students to get involved.

The Jewish Student Union ( J S U ) serves as $t h e$ umbrella organ-ization representing each one of Hillel's student groups and does a lot of the programming of its own.

Tami Yaker, JSU president and senior in LAS, said that Hillel is
> "Hillel sponsers social, cultural, political, and religious events with Jews, for Jews, and about Jews."

—RabbiJeffreyFalick
interaction with other communities on campus," Yaker said.
Whether Progressive Zionist Caucus is sponsoring a guest speaker, JSU is having a Hanukah party

or IlliniPAC is conducting a dialogue on the Middle East peace talks, Hillel is almost always buzzing with activity.
"Hillel has served an important function in my college life by providing me with a community of other Jews my age while also exposing me to a diverse spectrum of Jewish background," Edna Freidberg, senior in LAS and treasurer of Conservative Jews on campus, said.

The first Hillel was founded on this campus in 1923 with the intent of promoting Jewish unity and growth amongst students and 70 years later this unity remains strong.

Many soon-to-be graduates like to think that finding a job will be easy since they will have finally received that elusive bachelor's degree. However, in order to land that perfect job, you need to do more than sit around and wait. Fortunately, students have a very helpful resource to help them with this process: the Career Services Center. The center, located in the Turner Student Services building, notonly helps students look for a job, but also offers personal counseling on choosing a major and planning a career.
"It is really very helpful to be able to talk to a counselor about what I should do after graduation from here," Pilar Mercado, senior in LAS, said.

In addition, the center has its own computer program called SIGI PLUS which lists job descriptions and helps students find careers that match their personal interests. This program can be used at the Center or at the Self-Help

> W A N T E D : AMBITIOUS U OF GRAD TO FILL IMMED I ATE OPENING

Information Center in the Undergraduate Library.

Studentsfrequently use the on-campus interviewing service offered by the center. It gives them the chance to come in contact with companies that they may not have otherwise known about. Approximately 40 companies interview on campus e a ch semester. Some deal solely with the Center, while others work with the other placement offices on campus.
"On-c a mpus interviewing is the most popular resource that we offer simply because it is so convenient. It is much easier for them not to have to travel to all of the different companies. Also, students can schedule interviews within their
schedules, not within those of the companies," Louise Sadowsky, Career Services intern, said.

To aid students further in their quest for jobs, the center also provides lists of company names and job openings. "These lists are very helpful to graduating seniors because they give a g o o d
"It is really very helpful to be able to talk to a counselor about what I should do after graduation from here."

## - Pilar Mercado

 idea of who is going to b e hiring," Mercado said.Another aspect of $t h e$ Center is $t h e$ various workshops and programs that they sponsor throughout the year. Seminars are given on topics such as choosing a major, finding international employment opportunities and strategies for applying to graduate school. A series of short workshops are also held on

## ENTERING THE REAL WORLD

interviewing skills and resume writing. Other special events include conferences, Career Nights, a Multicultural Student Job Fair and mock interviews.
"The mini workshops are very popular, especially right before interviewing begins," Sadowsky said.

Students also receive help from the Center with choosing and applying to different graduate schools. Prospective postgraduate students are invited to attend counseling sessions and conferences, as well as set up files for their personal letters of recommendation.
"For a 10 dollar fee, the files are a good thing to have because you never know when you may need to use them," Beverly Rodriguez, secretary at the Center, said.

Whether you plan to graduate and get a job or go to graduate school, the Career Services Center has something that can help make your life that much easier.
story by Debbie Williams layout by Monica Soltesz

Gathering information on companies, Tim Tsui and Christine Gnutek, juniors in LAS, look up potential places of employment Many juniors look for internships during the summer.

# IMAGINE STUDYING FOOD FOR F O U R YEARS. 

# FOOD AND MORE FOOD 

Food-glorious food! For some people, it's the only thing on their minds. Dieters fantasize about fattening treats or count endless calories. Nutritionists calculate the recommended daily allowance (RDA) for each age group with careful precision. Chefs measure out each ingredient carefully with the knowledge thatonemistake couldmake all the difference. America's infatuation with eating gives many students a great opportunity for careers in the fields of Food \& Nutrition, Food Industry, Dietetics and Food Science.

Many students agree they become more aware of the things they should or should not consume when studying about proper nutrition. Angela Evans, sophomore in Agriculture studying Food Science, said that she's learned a lotabout
food safety.
"When most people think of food, they don't think of the Food and Drug Administration (FDA). The FDA is what decides what's safe for us to eat."
Because of her studies, Evans is now more careful about the food that she buys. Siobhan Foley, sophomore i

Agriculture studying emphasizes that what she is studying concerns more than just food.
"Dietetics focuses a lot on prevention and the chemical composition of what everyones eat. It teaches people how to eat
> "Dietetics teaches people how to eat right and how to prevent disease through diet."

\author{

- Slobhan Foley
}
right, and how to prevent disease through diet. If I become certified as a dietitian, I plan to work either in a hospital as a clinical dietitian or teach health classes at a school,"

Foley said.
Students in the areas of food or nutrition a $r$ e offered additional lessons via the $U$ of 1 computer network. Nutritionist III gives students a slightly different way to learn about various foods and menus. The fulfillment of the RDA can be calculated after entering a specific food or menu. The computer can also analyze the nutritional
value of a recipe. This computer work helps students grasp concepts they might not otherwise learn in a class.

Many students don't have to worry much about what they eat because all of their meals in the University Residence Halls have been carefully checked out for its nutritional value. Calorie counters and health conscious diners still have to watch what they consume, though. And for the rest of us who live in apartments and buy our own food, we are left to fend for ourselves when it comes to proper nutrition. Maybe it's time to start reading those food facts and vitamin percentages before we throw that junk food into the shopping cart!
story by Amara Rozgus layout by Meg Wyatt

Putting deserts on a tray, student workers prepare to serve lunch. The menu changes each week for the cafe as it is decided by the student in charge.

A student serves the meal to a customer in The Spice Box Restaurant at Bevier Hall. The class is required of all food and dietetics majors.

Preparing a plate, a student chef puts the finishing touches on someone's meal. Guests need to make reservations for the meal which is on a fixed rate.

TEACHING US HOW THE HUMAN BODY WORKS AND FUNCTIONS

Have you ever wondered exactly why you get tired after playing a hard game of football or doing aerobics for an hour? Do you ever question which muscles work together or in opposition of each other? If you answered yes to either of these questions, a class in physiology can give you the answers to just how the human body works.

Introductory physiology classes generally focus on the basics of movement and anatomy. For example, Physiology 103 students dissect animals, as well as participate in experiments involving physics concepts and how they relate to the movement of the human body.
"My favorite part of these classes was dissecting the animals and being able to look at
the cadavers. In doing this, I was able to see exactly how the body is put together and why things work the way that they do," Adam Freehill, junior in ALS, said.

> A big part of taking physiology courses
i
participating in the lab experiments. In one experiment, students weighed themselves underwater and then compared t h a t weight to their normal weight. "This was my favorite lab because it was really interesting to see the difference between the two weights," Kelly Yore, senior in ALS, said.

Physiology
> "My favorite part of these classes was dissecting the animals and being able to look at the cadavers."
students enjoy being able to apply what they learn to themselves and other students. For example, Tara Valdez, senior in ALS, said, "I did this experiment where we videotaped ourselves kicking our legs. | watched it later to s e e exactly what happens in such a simple a $n$ d common movement"
"। think the most interesting part of physiology is learning how the body works and functions during exercise. It is also exciting to see the amount of stress that is put on the body and how
fitness affects this, " Yore said.

Students taking physiology classes have a variety of career options open to them. Valdez plans on becoming a fitness instructor and then eventually getting a nursing degree, while Yore plans on getting a masters degree in exercise physiology. Students can go into physical therapy, medicine and medical related fields.

Physiology teaches students how the body works and why muscles behave the way that they do. Even if you don't plan on pursuing a career in the field, physiology classes can offer fun experiments and knowledge that is applicable to everyday life.
story by Debbie Williams layout by Ryan Almon

In his room, Joe Bresingham, junior in ALS, tries to keep warm while learning about blood circulation. Bresingham wore two sweatshirts in order to implement the concepts learned in class.

During a Physiology lab, three students work together on a tutorial. The tutorial further explains information in the book and helps students visualize difficult concepts.

The triangle logo that identifies The Edge to chients adorns its awning at 630 South Fifth Street in Champaign. The Edge is run by four $U$ of $I$ alumni.

The latest job information for different companies helps Ellen Jasper, senior in LAS, decide where she wants to apply. The Edge has the latest in technology to coordinate job searches for their clients.

Helping Tohru Oyasu, junior in Communications, design a logo for his internship, Stan Telford, Managing Director of The Edge, works on the computer. The Edge will help students in all areas of their job search from mock interviews to resume workshops to confidence building sessions.

142 Academics

# AND <br> GETA JOB 

"Only 103 days left atil graduation. Do you ave a job yet?" For most aduating seniors, this lestion about the job arch causes great anxiety; it for the 140 clients of ee Edge, a career services enter, the question poses ss of a threat and more of opportunity.
Clients at The Edge ceive customized onsultations to help them ith the job search process. ccording to one of The dge's founders', Stan elfrod, "The Edge is a rvice on campus that miliarizes and teaches udents how to be iccessful in the job search ocess".
Located at 630 South fth Street, Champaign, ne Edge offers more than ie package to cater to a ariety of job search needs. ie resume package helps ients create a solid resume at can be tailored to each eecific interview. Unlike ther resume deals, The dge package offers ontinued service. "It's not one-time shot," Telfrod id, "You can update it as ten as you want."

Other packages available at The Edge include everything from resumes and cover letters to mock interviews on videotape. "After a mock interview, I can see how I interviewed on tape, and feel much more confident," said Edge client Beth Holler, senior in Agriculture.

Furthermore, three 2hourclasses prepare clients before an interview, review the interview process itself, a $n$ d provide networking advice which helps build selfreliance. Each class is limited to eight clientsata t i me, continuing the personalized aspect of The Edge.

Each of these packages does require a slight financial investment. But considering the staff and its consultants who support The Edge, it is worth the initial expense.
> "I can see how I interviewed on tape, and feel much more confident."

\author{

- Beth Holler
}

The four founders of The Edge, including three Illinois graduates, came up with the concept after sitting down and discussing the fact that no one teaches students how to get a job. From this, The Edge was formed as a mock interview service. Once they started, the founders realized, "there was a lot more to offer and a lot we did not know about the job search process," Telfrod said.

For this reason, Telfrod and his partners sought $t h e$ advice of 12 professionals: four in human resources, a writer, a publicist and the University's ViceChancellor Stanley Levy and Panhellenic Advisor Adlon Jorgensen. Establishing this consulting staff gives The Edge networking contacts in the business world and keeps

The Edge up-to-date on current trends.

All of this means a credible foundation of 16 professionals who believe in The Edge, not to mention the clients. "It's a very comfortable setting, one-on-one. Not some stuffy, out-dated, red tape, rhetorical college placement office. It's all there for you, and I am very happy with it," Holler said.

Beyond the packages, it offers extensive resources to help clients network. Clients have access to the entire job search process, including a fax machine, phone and computer. "It's a start-to-finish operation," Telfrod said.

For students who have not yet taken advantage of The Edge's services, The Edge can still help those interested in the job search. Resume consultations by appointment are free and give students a chance to have their resume screened before actually using it.

Groups of friends interested in the full package can setup a special
class and receive a discount for signing up together.

For graduates who still want advice, The Edge offers a program called Boot Camp. For two-and-a-half days, the four partners help a group of 10 graduates recognize their strengths, learn how to present themselves in an interview and use resources to network.

The
Edge emphasizes networking to help its clients explore opportunities that may not be obvious to them by using the University's Career Placement Office alone. "The Career Placement Office will help but it's impossible to respond to the need," Telfrod said.

But at the Edge, clients receive the individualized service they need when they need it. This more personal atmosphere turns the job search, which can be overwhelming, into a real opportunity for success. And it is never too late to start, so get The Edge and get a job.

LEARNING
A B O U T
CHANGE CANBEEASY

# OUR LEAFY FRIIENDS 

Take a look around this at big campus and what you see? lgnore the ople. Forget about the Idings. Take a look at Liriodendron tulipifera lip tree) or the quidambar styraciflua 'eet gum). That's right e a look at those geous trees once in hile. One hundred-one ople on this campus will and the rest of their lives rking with those iferous and deciduous auties. Welcome to the llege of Agriculture's partment of Forestry.
Very few forestry majors ve the intention of coming someone like nger Smith. The partment of Forestry is ided into two major ds of study: Forest ence and Wood ducts Industries. Brian

Lawrence, sophomore in the Forest Science option, wants to concentrate on forest management and the utilization
of our resources.

## "Although

1 don't think we should quit cutting down trees, we do need moderation. We'll be sorry if we ruin it all," Lawrence said.

Kelly Kirkland, sophomore in the Forest Science option, agrees.
"We need a better balance between humans and nature." Kirkland said. "We also need to find other
resources for wood."
She believes her training will help in her search for a job with the National Parks in the natmestan U.S. For Kirkland, "education i $s$ power."

According toAndrew Hulting, freshman i $n$ Agriculture, t he classes he has taken so far have given him a good background in his field of study. One of Hulting's biggest pet peeves with the deforestation issue is the lack of understanding.
"People should know the facts before judging.
"We need a better balance between humans and nature."

—Kelly Kirkland

Because I want to work for the park service or a paper plant, many peoplebelieve I'm either a radical environmentalist or a tree murderer - that's just not true," Hulting said.

Jennifer Quick, sophomore in the Forest Science option, is also considering a career with a paper company. Her goal is to learn the best way to manage a group of trees.
"I want to be able to get the most out of a bunch of trees," Quick said.

Yogi Bear would be happy with the forest industry's future. And if he came to the $U$ of 1 he'd realize that the 101 Forestry majors can make a difference in the life of a young Quercus alba (white oak).
story by Amara Rozgus layout by Laura Lichtenstein

Listening to John Edgington, forestry professor, students learn about forest ecology. Edgington was standing in the Sunken Garden at Allerton Park.

THE SIZE AND DIVERSITY OF CHAMPAIGNU R B A N A SURPRISES MANY SMALL T O W N STUDENTS.

# A METROPOLIS FOR RURAL STUDENTS 

It often seems as if at least 99.5 percent of the time, if you ask a student where he or she is from, the answer you receive is either Chicago or one of its many suburbs. However, this is just an illusion; don't let it fool you. There are forms of life outside of Chicago, and some are even at this university. Many are from towns smaller than any Hinsdale, Skokie or Naperville, and to live in the bustling metropolis of Champaign-Urbana is a little different than what they were used to. As small as many people think this town is, for some, it's a whole new world.

For Scott Ganschow, sophomore
Engineering, the move here was somewhat of a shock. First of all there was the size of the town. "It's huge," he said, "and I can't stand driving around here-
there are so many stop lights." An understandable opinion, considering his hometown, Anawana (one hour north of Peoria), has a population of only 808. "We know exactly, since the mayor had the F.F.A.
(Future Farmers
o f
America)
count once. It took only a couple o f hours," Ganschow said. A second shock came when he saw his roommate and realized that there is a much larger spectrum of people here than in his hometown. "I came into my room, and I see this person standing with their back to me, and he had long hair. I thought
> "Everyone thinks everyone from small towns are hicks. and screwsheep. I raised sheep, but I don't rape them."

## - Scott Ganschow

it was my roommate's sister," Ganschow said. Of course it turned out to be his roommate. "Where I come from the guys all have short hair," he said.

Nancy Rankin, sophomore in LAS, also was surprised by the diversity of people Cham-paignUrbana. I n Riverton, a town of 2, 800 outside o f Springfield, "it was all white. Here it's much more multicultural and diverse," Rankin said.

Besides adjusting to the change of moving to a new, larger city, rural students must also deal with the stereotypes that come with having a rural
"Everybody everyone from small towns are hicks and screw sheep. I raised sheep, but I didn't rape them. All the small town kids get a lot of flack for that," Ganschow said.

Rankin agrees that people from urban backgrounds have a fascination with the sheep myth. "I never heard of anyone doing that," she said. "I never even heard people talk about it until I got up here."

## Shannon Rider,

 sophomore in LAS, just ignores the teasing that he receives for his southern Illinois accent. Originallyfrom Harrisburg, a town east of Carbondale with a population of about 9,000, Rider really is not offended by the stereotyping since he does not think he falls into the "hick" category. "I mean, there are people who are hicks, though- we call
them goat-roapers Those are your Garth Brooks look-alikes who listen to Hank [Williams, Jr.] and drink Budweiser," Rider said.

Overall, despite the teasing and the major adjustments made when leaving a small town, many rural students seem to like their tiny hometown. "You know everyone," Rider said. "It's so much more personable than here. Here, I might be lucky if I see one person I know a day while I'm walking around. And at home, if you don't know them, they still talk to you."

Ganschow said, "My hometown was free from a lot of the things that plague bigger cities, like crime and pollution. It was a good place for someone to grow up. I wouldn't have wanted to grow up any place else."

CUTS

# CUTS ON THE VERGE OF EXTINCTION 

Can you imagine your college and your major no longer existing at the university? What would you do? Would you transfer? Would you fight the system and prove to the university why you should still exist?

Well, this is the fate that is facing the Institute of Aviation and the School of Social Work along with those students in computer services. Many of these students are waiting to hear the outcome of the Champaign-Urbana Senate hearing in which they will decide the fates of these schools.

There has been suggestions to merge the College of Education, the College of Applied Life

Sciences Division Develo Family Studies of the School of Human Resources and Family Studies. They should be merged into a College of Education and Human Dendopmert This, officials f e e l would help make the university m o re efficient.

The Aviation Institute is also fighting for its survival. The university wants to decrease funding to it

## "There are certain

 indicators that show we have a top-notch program."
## - Jennifer Breitenfieldt

which would put the whole program in jeopardy. Even with the smaller funding it has remained in the top of its class.
"There are certain indicators that show we've got a top-notch program, like our flying t e a m which has won t $h$ e regional meet for about f i ve years in a row," Jennifer Breitenfeldt, institute underg-raduate advisor, said.

After
consideration the committee decided not to close the institute, but just cut its funding by 23 percent. This cuts student enrollment.
"If they cut fundsfor pilot training by half or more, things could have been really bad for us. A 25 percent cut in terms of projected student enrollmentwon'tbeasbad," Christopher Wickens, Aviation Research Laboratory Head, said.

For the School of Social Work and the others, their fate is still unclear. The committee might not have the results until the summer session when students will have to decide what they want to do with their decided majors.

Students in the School of Social Work protest the University's actions in attempting to eliminate their program. The university faced the decision to eliminate a number of programs as budget cuts were deemed necessary.

Many of the School of Aviation's planes are sit in a hanger at Willard Airport. The university considered cutting the Aviation program in part to high overhead costs.

> S E L F SUPP ORTING STUDENTSLEARN MORE THAN WHATSTAUGHTIN CLASS

# LEARNING THE HARD WAY 

Money. Many people spend their lives worrying about it. Others have so much, there's really no need to think about it. Most of us have had no reason to consider our finances for the first several years of our lives. But as we grow older and gain more independence, that luxury slowly slips away. Financial independence comes to some earlier than others. Many U of I students no longer depend on others to cover expenses, but choose to, or must rely only on themselves.

> Jim Stolfi, sophomore in CBA, said that his parents thought it was a good idea for him to pay his way through school. "They figure that I won't goof off if I'm using my own money. It has
worked somewhat," Stolfi said. "Because I save 70 percent of everything learn over breaks, I think I'm a lot more disciplined than other students, as well as
m o re
financially aware." Stolfi said. Stolfi does not need to hold down a job at school because h e budgets during the year and carefully watches what he spends.

Others do not have it as easy. Ron Pizur, sophomore in Engineering, has been on his own for the past five years - since he
was sixteen. He holds down two jobs during the school year, and three over the summer and holidays. "I've found that I don't have the same advantages as other people do, and I miss out on a lot of stuff," Pizur s a id Although it has b e e n tough, he h a s learned how to manage his money wisely.

If students who anticipated putting themselves through school asked Pizur for advice, he would tell them to
first take a couple of years off to work. "File for independence and talk to a financial aid counselor. And if someone offers you money, don't turn it down because of pride," Pizur said.

Both Stolfi and Pizur are learning more than what their books or professors can teach them here at the $U$ of I. They have learned to be careful with their finances - a valuable asset in today's economy. They are also discovering something that others may not figure out for a few more years - if you really want something, you have to plan ahead and work hard to achieve your goal.
story by Amara Rozgus layout by Jill Kogan

Allana Hernette, sophomore in LAS, makes change at Bob Evans on a Thursday night. Hennette works four or five nights a week to help cover extra expenses.

such as using one flower as a central point and radiating other flowers around it. You can also concentrate on a specific theme or style - such as a holiday arrangement. One thing you really have to worry about is the colors - they have to look right."

Johnston is pleased with the many things she has learned. "I never thought I could create such great arrangements. My teacher is enthusiastic and really encouraging. She also gives us hints on how to dry flowers and how to coordinate an arrangement with other things in the room like furniture."

Oberly agrees that what she has learned in class can be applied to everyday circumstances."I have always wanted to take a class like this. It's both practical and fun." Both Johnston and Oberly agree that the class is not incredibly difficult - it just takes some effort. You are supplied with flowers for your arrangements, and you even get to brighten up your room with your designs. You can finally forget about all those Physics equations and clear your head for a couple of hours a week. So go wild all you uncreatives. Flower Arranging may be just the class you need.
 crammed with too many equations? Are some of those Art \& Design classes too complicated? Do you seem to lack that sixth sense of creativity? Well, believe it or no the U of I does offer a simple and accessible solution: Ilwticulture 131, a.k.a. Flower Arranging. . 15 - great way to get away from the norm," Elizaleeth Johnston, sophomore in LAS, said. "It's not like your average class. There are students in it from every college and major who are looking for something a little different."
Each student must focus on creating an arrangement that is aesthetically pleasing to the eye. The weekly lectures explain ideas such as proportion, balance and rhythm. Students must incorporate as much as they have learned as possible into each floral arrangement, however, small or insignificant the flowers may seem. The best arrangements use as many forms of creativity as possible.
"There really is an art to it," Amy Oberly, sophomore in Agriculture, said. "I've learned many different styles,

# GRAFFITI C OVERS A L M O S T EVERY DESK ON CAMPUS. ExTRACURRICULAR WORIS OF ART 

Students
can't
escape it. It's
everywhere. It seems that whenever you sit down in class, any class, the desk is overflowing with little sayings or drawings that an aspiring artist wanted everyone in the world to see. Most of us are guilty of drawing on a desk during some incredibly boring lecture just to keep from falling asleep. If you don't write on it, you at least read it. Just what is the hang-up with writing things on desktops?

Students often like to scribble their Greek houses on desks. If you look on a given desk in any classroom, it is almost guaranteed that you will find Greek letters on it. The reasoning behind this is basically that students are proud of their houses
and want everyone to see the names "out there." Graffiti can be good publicity for the houses since many students, and possibly prospective rushees, see it. Gemma Wall, freshman in FAA, s a id,
"Chances
are, any
desk you
sit at will
b e completely covered already w i th Greek letters, so you might as well make your own letters visible to everyone else."
"I tend to think negatively of people who write their house on desks. I don't think you should need to put your letters on a desk to have
> "You might as well entertain yourself by eitherwriting or reading the desktops."

- Carrie Londo
campus recognition," said Paige Warner, senior in CBA.

Bored students also like to express their favorite music groups, from The Cure to Metallica. Maybe these artists should get paid f or publicizing $t h e$ names of these groups. ( Hey, that's not a bad idea!)
If you should happen to get extremely bored in some hour and a half lecture somewhere, and suddenly become ambitious, why not draw an entire picture? These works of art are very rare and you should consider
yourself lucky if you happen to come upon one while sitting in class. "I think that a lot of classes are so boring that you might as well entertain yourself by either writing or reading the desktops. If people don't like it, then they don't have to look at it," said Carrie Londo, sophomore in LAS.
"The only problem I have with desk graffiti is that if you're going to write your views on a desk, you should at least be able to spell them correctly," Wall said

If you ever get down while sitting in class, remember that there is always desk graffiti to read and/or write. And besides, you may just discover that you have a hidden talent!

While waiting for her student to show up for tutoring, Patricia Byrne, senior in LAS, studies her chemistry. The tutoring is offered for minority students.

Vonn Walter, graduate student, tutors Francisco Rivera, freshman in FAA, in a math class. The tutoring is done at the Turner Administration building.

H E L P I N G STUDENTS DO THE BEST THEY CAN, FOR FREE.

Wouldn't you like to students. receive free tutoring in many of your classes? Well, for the students that are eligible, the minority tutoring program has been set up through the Office of Miority Affairs to help students with their classes.

Priscilla Fortier, Assistant Director and Coordinator, Academic Support Services, Office of Minority Student Affairs said "the main purpose of the minority tutoring program is to serve underrepresented minority groups on campus: African Americans, American Indians and Latinos."

According to Fortier, there is added stress for the underrepresented student and that's why the office exists.

One of the goals of the minority tutoring program is to increase the numbers of graduating minority students that need help in classes offered within the program, the office can assist those students by giving t $h$ e m information actual tutoring.

Services Building offers minority tutoring M TUW 8am-8pm and on TH F mainly freshmen and sophomores that participate in the program because tutoring is limited mainly to 100 and some 200 level classes. For those
"There is an added stress for the underrepresented on where to go for further assistance. The office can help other cultural background students with tutoring information but not

Turner Student
simply are a way to help students to adjust to university courses.

Students meet with their tutors for a one hour a week session and further sesssions are made upon arrangement.

Tutoring services are offered for free. The students just need to go to room 110 Student Services Building and sign up.

Fortier said that the office finds its peer tutors by placing ads in the DI at the beginning of the fall semester and through various departments. The peer tutors need to have gotten an " A " in the class in order to tutor it.

For many students the program has been an added benefit to their experience at the university. With the help of friends studnets can learn and succeed.

As a student waits to talk to one of the counselors at the office, he briefs through some of the pamphlets about the countries. The office keeps up to date information on all of the countries and the courses that are available.

Working at a desk in the office, a student fills out some paperwork. The picture of each student studying abroad is pasted on a map in the office.

At the study abroad office a student sits at a table waiting to talk about the program. Both students who are in the program and those who wish to be in it can browse in the office.

## EXPAND <br> Y O U R <br> WORLD AND S T U D Y <br> AROUND THE WORLD <br> NEW IDEAS AND FRIENDS

The U of I study abroad program has many advantages. Student get to be adventurous and independent, see their life from a different perspective, and learn to function effectively in another language. One gets to experience a completely different academic environment whileearning credit hours.

The program has been sending students overseas for almost 20 years. They go to Europe, Australia, Latin America, North America, Asia and Africa. They can study for a summer, a semester or a full academic year. Students must have a cumulative GPA of 4.0 in order to be eligible. Besides the GPA, a student must get recommendations from language teachers and meet a requirement of language
classes taken and fill out dozens of forms, as well as make sure their major classes have been taken. Housing, tuition and language requirements depend on the location and the program. The benefits one can gain from this program
a $r$ e personal growth, selfconfidence, linguistic a $n$ d cultural skills and exciting foreign friends.

> "The academics at Birkbeck were extremely challenging and exciting. I personally enjoyed my studies abroad because of the small classes. There was
much more teacherstudent contact. The smaller classes enabled the professors to stray from the textbooks and concentrate more on current events. Grading was very fair and accurate for all," David K ite, senior in L A S said.
Many of the major fields of study available here can be found at a university abroad, also credits are transferred to the $U$ of $I$. "The courses were absolutely excellent! The instructors were by far the best instructors I've ever had in Italian - and possibly
any other field as well," Richard Fiore, junior in LAS said.

According to Kathy Brunn, senior in LAS, the homestay was a great way to meet British people and see how they live. "There are a million ways to entertain yourself in London - sightseeing, plays, pubs, nightclubs, casinos and even riding on the 'tube' can be interesting."

Studying abroad can mean a great way to experience another part of the world and enjoy a lifetime treasure for many students. Meghan McCloskey, senior in LAS, said, "It was the most memorable experience of my life. I laughed, I cried, it was better than CATS."
story by Tina Jordan layout by Meg Wyatt

Joseph Coney, junior in LAS, concentrates on the pins while bowling at the Illini Union Kinesology 102 teaches the basics in the scoring and technique of the sport

> KINESIOLOGY CLASSES ARE MUCH MORE THAN JUST AEROBICS.

## CURE FOR BOREDOM

Bored with the usual uninteresting lectures? Tired of sitting in Foellinger with 2,000 of your "closest friends" listening to a professor go on about something that you don't care about while watching the guy in front of you take a nap? If so, maybe you could use a slightly different kinesiology class.

Taking a kinesiology class often does more for someone than just cure boredom. It can teach a new skill, improve fitness or just be a stress reliever. Considering the great amount of stress students are put under with academic classes, taking a fun class, even for just two hours a week, can prove to be very helpful in preventing a nervous breakdown of some sort.
"The reason I wanted Field Hockey, Rugby and to take a kinesiology class is because it was something that I knew would be relaxing and wouldn't cause me any stress," Jeremy Stolberg, freshman in LAS, said. Another reason students $m$ a $y$ choose to take an unusual kinesiology course is to improve their strength and endurance.

A few of the more out of the ordinary courses one can take include Triathlon Training, 10K Running and Track and Field. Many team sports are also offered, such as
> "I took the Tai Chi class because it is both mentally stimulating and not physically strenuous."

## - Min Lee

Lacrosse. Taking one of these classes should prove to be more fun than working out by yourself at IMPE.

Learning something new is probably one of the most common reasons for students to take an unusual kinesiology course. The students in Tai Chi are taught exercises that is not too strenuous and are trained to improve concentration skills.
"I chose to take the Tai Chi class because it is both mentally stimulating and not physically strenuous. Also, I've never done
anything like this before and I wanted to try something new," Min Lee, graduate student, said.

According to Diane Tse, senior in CBA, she decided to enroll in a Tai Chi class because she had hear that it would train her in some concentration skills. It was also both mental and physical exercise.

Taking a kinesiology class can be much more than just tennis, bowling or aerobics. Students have the opportunity to learn something new, get into shape, relieve stress and earn easy credit hours all at the same time. So spare an hour or two from next semester's boring academic schedule and have some fun!

Laura McKane, senior in FAA, practices a technique used in defending herself from an attacker, Rashanda Glasper, a senior ín LAS. Self-defense classes are open to both men and women.

## athletics

Something slightly different. The 1992-1993 athletic year has certainly contributed it's share of "slightly different somethings." From football to swimming, almost every sport at the University underwent significant changes. To start with, the Men's Basketball team were once again able to go out and recruit high school students, and they also regained eligiblity for the NCAA tournament after the 1990

NCAA sanctions finally expired.
The big change for many teams was a management shift. The football team garnered the most publicized coaching change, with Head Coach John Mackovic moving on to the University of Texas and Lou Tepper taking over. Mackovic's departure left another crucial position open, Athletics Director. Ron Guenther, a former University of Illinois student-athlete and administrator, took over the position.

Similar management shifts occurred on the wrestling, hockey, and men's tennis teams. Mark Johnson replaced Ron Clinton as the wrestling head coach. Two new hockey coaches, Bob Turngren and Rich Henne, took over for Mark Rozkowski. The Men's Tennis team obtained Craig Tiley, a native of South

Africa, as their new coach.
With all of these personnel changes, the Illinois athletic teams competed around the world with just a slightly different look.

## theresa a. robbins, editor

cing off against Eastern Michigan University, shman Tom Radja tries to gain possession of e puck. The team beat Eastern three out of the ur times they played over the season.

As Head Coach Lou Tepper leaves the locker room, the Marching Illini plays music to stir the crowd. Tepper led the team to their fifth consecutive bowl game.

Experiencing the Ups and Dacuns of Campetitian

Despite
more emotional ups and downs than a yo-yo during 1992, the Fighting Illini football team endured what could be billed as a mostly successful season. Under first-year Head Coach Lou Tepper, the Illini were the only Big Ten team to go undefeated during the second half of their conference schedule, finished the season in fourth place, and made their fifth consecutive appearance in a bowl game, the Thrifty Car Rental Holiday Bowl in San Diego, Calif.

Under incumbent

senior quarterback Jason Verduzco, the Illini began their season with a bang, defeating both Northern Illinois University and the University of Missouri. After these wins, the team hit a low peak as sophomore linebacking sensation Dana Howard was suspended for one game as a result of his
part in an altercation outside the Illini Union The team was soundl defeated by Houstor University without thei defensive standout to help them contair Houston's wishbont offense. University o Minnesota then nippec the Illini. This loss to the Golden Gophers wa! the first sign that thert

During the Holiday Bowl, the Hawain quarterback tries to evade oncoming Illini defensemen junior Todd Leach and sophomore John Holocek. The teams shared a $\$ 1$ million purse with their respective conferences for playing in the bowl.

An outstretched arm enables senior fullback Darren Boyer to push through the crowd of defensemen during the Northwestern game. Boyer was named the team's offensive MVP at their annual banquet.

"We had high expectations, but they were not met. Most of the problems were ironed out towards midseason, but our first half should have been like
our second half."
Senior offensive lineman Brad Hopkins, another All-Big Ten selection, saw his final season as a challenge. "It was difficult to stay
focused and together for some of the season. Throughout all of the adversity, however, when we decided to pull together we did well." Looking ahead to the

1993 season, the vacancy in the quarterback spot will be one of Tepper's most difficult decisions to make. The team has three returners in the
position, as well as true freshman recrui who could make ar impact. Sophomore tailback Kevin Jacksor returns in the backfielc as well. With the new

uarterback much of the ffensive weight will be eld on Jackson's houlders. "Coach epper will expect a lot com me as far as unning, catching and
blocking goes. There's Klein, too," Jackson going to be a lot of competition for a backfield position, though. We have good receivers returning in Jasper Strong and Jim
said.

Returning 10 of the 11 end-of-year starters, the defense will definitely be the team's biggest strength next season.

In the middle of the field, Chief Illiniwek dances to the chanting in Memorial Stadium. The Chief performs only at halftime of both the football and basketball games and speaks to crowds only when out of costume.

Senior tailback Steven Feagin bounds into the end zone against Missouri. Feagin finished the year with 663 total all-purpose yards.

"Our defense is strong," Howard said. "We have heart and we have the attitude of being the best team in the Big Ten."

Freshman linebacker

Kevin Hardy also likes how the defense is going to the look. "We only graduated two seniors from the lineup. Everybody's coming back and our linebackers

In mid-air, senior fullback Darren Boyer, moves the ball down field in the game against Missouri. Boyer scored nine touchdowns during the season and had 853 all-purpose yards.

The defense pays attention as Head Coach Lou Tepper discusses strategy for the upcoming defensive series against Michigan State. Tepper was the defensive coordinator for the team before becoming head coach.

Marching towards the stadium the Marching Illini begin their pre-game ceremonies. The entire band traveled to San Diego to participate in the halftime show at the Holiday Bowl.

can definitely be ranked up with the best."

According to Holecek, utilizing their playing time from 1992 as an asset is the most important goal for the defense. "We need to use the experience we've
gotten and grow physically and mentally. We can't play down to lesser opponents' levels, either."

With a their dream of a bowl game achieved this year, the team will be
aiming even higher for next year. "Our goal is to go to the Rose Bowl," Howard said. "No more Citrus or Holiday Bowls for us."

High above the game, news reporters record the feelings and plays of the game. Many newsmen stay in the press box after the game to write and wire their story to their paper.

From the press box, the crucial moments of the game are recorded by alocal cameraman. Cameramen from all of the local stations come to the game to
show highlights on the evening news.

172 Athletics

## View of the Game

tfootball games one of the best seats in the house is in the press box. With heat, free food, t.v. and a 50-yard line perspective, you can't go wrong.

Run by the Sports Information Department, the press box set-up begins the day before a game. Supplies needed by the media are put in their respective spots. Supplies include game dayline-ups, game programs and notes, and media guides. Sports Information Student Assistants often do these jobs while watching their favorite t.v. programs, like "Underdog."
"Our jobis to be there for the media," Lisa Nelson, graduate assistant, said. "We want to make sure they have everything they need, such as stats, scores, and food and drinks. First and foremost, we want to please the media and bring attention to our athletic program."

On game day, there are many responsibilities in the box. Scores must be posted from other games, stats must be distributed, and food must be served. While not always the finest cuisine, working media do eat for free. "We want to make things run smoothly for the working press, both written and broadcast," Josh Mora, graduate student assistant in Communications, said. "Also, we're responsible to help the transition of information run smoothly from the field to the press box."

Most employees of Sports Information agree on their job in the press box. "We need to make sure everything runs smoothly from an administrative standpoint," Phil Dlatt, junior in CBA, said.
"The more we satisfy the press," Nancy Herpstreith, junior in Communications, said, "the better coverage our athletics get."

At half-time, more food is served, usually cookies, sandwiches and popcorn. The view of Block-l and the Marching lllini is usuallyvery good. After the game ends, the media go down to the locker rooms for interviews. During this time, Sports Information personnel collate statistics from the game, as well as notes and key quotes, to distribute to the press when they return from their interviews. Writers usually stay up to two hours after the game to write their stories.

Despite the amenities, the people who work in the press box are torn on whether or not they like being there. "I'd rather be a fan and cheering," Herpstreith said. "The view is pretty cool, though, and we always know what's going on and things that most fans don't usually know."

Being unable to cheer is one negative aspect of being able to sit in the press box. "There's no freedom," Nelson said. "There's no cheering, and you can't be a fan. You must be careful about what you say because there are people associated with other programs around you. However, sometimes I'm glad I don't have to sit in the snow on those cold days."
"There's definitely an atmosphere of being in the stands that you miss, like the boosterism, rah-rah feeling, and being among your peers," Mora said. "However, on cold days there's an advantage to being in the box in a shirt and tie."

Dlatt enjoys the press box wholeheartedly, though. "l enjoy it because we don't pay to get into the game, it's heated, and there is free food!"
story by Eric Schmidt
layout by Jill Kogan

Every player who participates in orts during their lifetime dreams of aking it to the national tournament and inning. For the Illini Hockey Club, part this dream has become a reality. For first time in four years the team has cepted their bid from the Central States ollegiate Hockey League (CSCHL) to go the national club tournament being eld at North Dakota State University.
"We are very excited to be playing the tournament, but we first have to eal with our own conference tournament lat contains Iowa State, Michigan earborn and Eastern Michigan, who are 1 formidable opponents. Each of these ams are ranked," Eric Penn, senior efenseman and club president, said.

The team played each of these ams on the road during the first half of e season, but then were able to meet em at home and on their own rink after tat.
"Its a lot better to play in our rink ecause it is bigger, and we have the ppport of our home fans. The other nks are smaller, and since we are smaller tan most of the teams, we cannot pitalize on our speed," Dan Bresingham, nior defenseman, said.

Even with the tough road schedule uring the first half of the season the lini were able to capitalize on their team rength. The team came away with two ins at Eastern Michigan and very close mes against Iowa State and Michiganearborn. These and their other wins laced them atop the CSCHL in both the am and individual categories.

Both sophomore center Kurt Penn ad junior center Darren Wuann were ading the league in scoring with other ammates close behind. "It was a great
feeling to be one of the teams in the league. Considereing our tough schedule, we were very happy to be where we were," Kurt Penn said.

With all of the pressure of playing two of the top teams twice right at the beginning of the season, the team

prepared themselves prepared for the national tournament and their conference tournament.
"In the national tournament, we will be up against the likes of Penn State and North Dakota State. So even though we are going good now, we still have our work cut out for us as far as competition is concerned," Eric Penn said.

The hardest part for the team has been keeping everything together because of the way their schedule turned out. During the second half of the season they were playing games in Peoria, Decatur and Danville against league opponents on odd nights and this took its toll on the team.
"With all of those games during the week it made us very tired for the weekend. Our practice schedule was all messed up and that made it hard to catch any sort of rhythm. But we kept our composure and because the games were easier, some of us were able to get more of a rest," Wuann said.

Junior forward Jason Gagliano, who is a junior college transfer and one of the team's leading scorers, agreed with Wuann and said, "Our scheduling has not been so good, so as a result, we hit our peak kind of early in the season. Yet, we came together as a team and with a couple of players who returned in the winter semester, we should be in good shape for the rest of the season."

Senior forwards Mike Pinski and Ian Goldberg returned and this strengthened the already tough lineup.
"Those returns helped our scoring attack and this should prove better for nationals," Doug Anderson, junior defenseman, said.

Entering the season ranked number 15 nationally the women's volleyball team wanted more. They did not realize, however, just what they would end up getting. Beginning with a summer tour of Europe, the team learned early on to deal with much of the stress that they would endure during their Big Ten Championship season when they would get what they wanted.
"Our chemistry developed," Lorna Henderson, the only senior on the team and outside hitter, said. "Traveling with 12 people for three weeks helped us to learn to deal with each other. Wealso formed a new team identity which we carried for the entire season."

Tina Rogers, junior outside hitter, also thought the trip was a definite positive. "Our trip was hard work, but we played different kinds of teams and took some risks with our game plan. It was also a confidence builder."

One of the benefits of going to Europe was being able to get a jump on other teams in terms of practice. Also, the trip helped the players to get a sense of teamwork.
"We got to start early and train while everyone else was on break," Kristin Henriksen, junior outside hitter, said. "The trip made us better on the road because it was just us without fans. We had to support each other."

When the Fighting Illini embarked upon their season, they were faced with a tough schedule. In the first month of the season, they faced seven teams ranked in the top 25 . The
team dropped three of these games, but they took it as a motivator. In fact, after their loss against \#17 Penn State University, the Illini reeled off a 22-game winning streak, peaked at \#5 nationally, and shared the Big Ten Title with Penn State after both finished with a 191 mark in the Big Ten. The team finished the season after losing to eventual NCAA champion Stanford in the Regional Finals at Huff Hall. All in all, the team had a better season than most had foreseen, finishing with a 32-4 record, which was their best since 1986.
"We had a sense of loss because we could have gone farther," Megan Stettin, freshman back row specialist, said. "We tried our hardest, though, and we can't change anything now."

Many individual accolades went out after the season, as well. Junior outside hitter Kirsten Gleis led the team in kills and was named a First Team All-American. "Dutch Dynamite," as she was known, came to the $U$ of I from Holland, where she spent the summer on the Dutch Olympic Team.
"It was an incredible experience," Gleis said. "I didn't know much about this school, but I was pleased with the way things turned out. We had a great season."

Named to the All-Big Ten First Team were Rogers and Henriksen. Rogers was a pleasant surprise as she became one of the conference's most dominating outside hitters. "The Big Hurt" also set the team single season record for service aces. Henriksen finished
the season as the team's leading hitter, an finished fifth in the nation in hittin percentage.
"Ienjoyed playing a lot more this season, Rogers said. "Having more confidence mad me play better. Recognition for success i always a plus, too, but only people fron successful teams are named. It's reall recognition for the whole team."

Looking ahead to next season, things stil look solid. Uncertainty looms as to whethe or not Gleis will be back. It's up to the NCA to decide on her eligibility. Nonetheless, th team will return Rogers and Henriksen, a well as team captain juniors Merrill Mullis Kellie Hebeisen and sophomore Sue Nucc Success should come as a result of a prove bench, as well as their taste of victory.
"Now we know how to win," Amy Jones junior middle blocker, said. "We're going t want to get that feeling back because it's s good."

Winning won't come easy for the Illir next season, as the Big Ten is a stron conference, and everyone will be gunning fo the top team.
"Next season will be harder," Rogers saic "People weren't expecting us to be strong, bu next year it will be expected. As we'll be see as more of a threat, teams will be bette prepared for us. There will be pressure to d well, but with intensity and motivation, an wanting to go to the Final Four we will surpas the pressure."

5ophomore Julie Edwards bumps a pass up to the front row. Edwards was a back row specialist for the Fighting Illini.

During a match against Louisiana State University, sophomore Merrill Mullis serves the ball. Mullis was the starting setter for the team.

As Lou Henson, head coach of the Illinois Men's Basketball Team, enters his fourth decade as a college basketball coach, optimism of a return trip to the National Collegiate Athletic Association (NCAA) tournament lingers around the court.

For the first time in nearly three years, Coach Henson has an experienced group of players to lead the ball club. He said, "We are returning just about everyone from last year's team, including Andy Kaufmann, who was our leading scorer in 1991 with 21.3 points per game. We feel that we should be pretty strong this season with the experience that we return from last season."

The 1991-92 campaign was a deceptively unsuccessful one for the Illini. A 13-15 overall mark and 7-11 in the Big Ten landed the lllini in eighth place in the conference. Yet, the youngsters, who did not have one returning letterman on last year's team, lost at lowa, at MichiganState, at Minnesota, at Northwestern and to Ohio State at home by a total of thirteen points. Incidentally, the losses to Michigan State, Northwestern and Ohio State all occurred at the buzzer while the loss at Minnesota occurred with no time showing on the clock. With a break here or there, the Illini could have found themselves in the NCAA tournament. All things to one side, Illinois suffered their first losing season since 1978. The 1991-92 campaign also marked an end to a streak of nine straight 20 -win
seasons for lllinois.
Overall, Coach Henson believes that keeping everyone healthy is an important key to the season. "If everyone stays healthy and we can avoid any substantial injuries, we should be able to finish high enough in the Big Ten to qualify for the NCAA tournament. We really feel that we can finish in the upper division in the conference and it would be somewhat of a disappointment if we did not make it to the NCAA tournament. But being healthy and staying injury free will play a big role in determining how far we can go," Henson said.

The lllini will once again beled this season by stand-out center Deon Thomas. The 6-foot- 9 inch Chicago native, wholed the Illinois offensive attack with 19.4 points per game last season, will be the key force inside the orange and blue and will need to balance theirscoring. Kaufmann will also figure to put up some impressive numbers in the scoring column this year. The 6 -foot- 6 inch forward led the lllini with 21.3 points per game as a junior. He is currently number 27 on the school's all-time scoring list, with a chance of reaching as high as number 2 before he leaves lllinois. Also, Tom Michael will probably be the Illini's third offensive threat this season. He is coming off of an impressive' $91-92$ campaign, leading the Big Ten in three-point shooting. Michael already has qualified as lllinois' all-timeleader in shooting beyond the three-point stripe.

Other key returnees from last season ar forwards Marc Davidson, Robert Bennett, an guards Rennie Clemons, T.J. Wheeler, an Brooks Taylor. In addition, Coach Henso and his staff will welcome freshman Richar Keene and red-shirted Chris Gandy alon with junior college transfer Daven Harris t the squad.

Wheeler believes that getting the offens to flow smoothly could be very important a far as the team's success goes. He said, "W really play great team defense. We just nee to make some transitions on our offense t smooth it out a little. When we get our offens totally together, we are going to be a extremely tough team to beat."

Even though the Illini are full of veterar and talent this season, making it to the NCA tourney will be no easy task. Their nor conference schedule has the lllini playing i the Great Alaska Shootout, Princeton(Illir Classic), Marquette, Missouri and Pittsburgl Already, the Big Ten has been heralded as th best conference in the nation, so the lllini wi have their work cut out for them in conferenc play. Also, the NCAA legislation's moving the starting date of practice from October 1 to November 1 may affect the Illini's pla early in the season. This will cost Coac Henson and his staff two weeks of valuabl practice of which could have been used fo conditioning and fundamental drills. Ye
(continued on page 182

(continued from page 180)
Illinois will take solace in the fact that they benefited from 10 extra days of practice in preparation for the 10 game exhibition tour of Russia and the Baltic States in May. This experience will somewhat supplement the team's lost time in the middle of October.

Overall, the Illini have a balanced team this season from position to position. Coach Henson looks for the squad to have a diverse offensive attack. He said, "The thing about this team is that we are not really stronger in any position than the other. There is a nice balance to this year's group. Our balance between our three-point shooters and our guys in the middle will make for a nice overall mix. When we get the chance to this season, we will run and gun, but only if the opportunity to do this is there. If that possibility is not there, then we will run our offense and play for the high percentage shot."

Again the Big Ten, as in past years, is the strongest conference in the country from top to bottom. Some experts have predicted that eight teams from the nation's strongest conference will make an appearance in the NCAA tournament. Indiana,Iowa, Michigan, Michigan State and Purdue will probably provide the strongest competition for the Illini during the 1992-93 campaign. Then, too, teams such as Minnesota, Northwestern, PennState, Ohio State and Wisconsin, who all handed the Illini losses last season, will all be roadblocks for Illinois' surge into the upper division of the Big Ten. In general, Keene believes that the Illini can definitely make a run for the upper division of the Big Ten this season. He said, "Indiana, Michigan and Michigan State are all going to be tough. It is really hard to say who the best team in the conference is at this point in the season. We feel that we can finish in the first division of the conference, and there is no reason why we shouldn't achieve this goal."

During Illinois' game against Indiana on January 16,1993 ,freshmanguard Richard Keene takes a shot. Keene was one of Illinois' top three-point shooters.

## Shaoting $7 a$

WIIN

After two consecutive losing seasons with 9-19 records and eighth place finishes in the Big Ten Conference, Kathy Lindsey, head coach of the women's basketball team and her squad are ready to move into the upper division of the Big Ten.

The Illini will be looking to break a five-year streak of sub .500 records. Coach Lindsey has made this one of the team's primary goals of the season. "We are trying hard to become a winning program and finish in the upper division of the Big Ten Conference. We have had two consecutive 9-19 season, and both seasons we finished eighth in the Big Ten. This year, we are looking to greatly improve on this. Also, we are trying to rebuild the program which has experienced some tough times over the past couple of years."

The Illini, although they finished the 1991-1992 campaign at 9-19, finished the season with consecutive victories against Michigan and Michigan State. Prior to these two wins, Illinois suffered two very close road losses against Ohio State and Indiana. The surge at the end of the year will hopefully give the Ilini some much needed momentum entering 19921993.

Shooting for an upper division finish in the Big Ten is a tough but realistic goal for Illinois. Coach Lindsey said, "Our non-conference schedule includes both Nebraska and Southern Illinois, two extremely tough teams. This type of competition will get us prepared for the Big Ten season. In the conference, Iowa is predicted to win the league and Ohio State and Northwestern are picked to finish second or third in the conference.

But these two teams do not have the stranglehold on their predicted finishes in the Big Ten as Iowa does. Thus, we feel that we can finish as high as third in the Big Ten. However, the conference is so strong that there are five or six teams in the position that we are. If we can stay away from injuries this season it will enhance our chances of finishing higher in the conference. Overall, however, it will take a great deal of effort and hard work to finish in the upper division in the Big Ten."

The team returns three starters: junior Mandy Cunningham, sophomore Kris Dupps and senior Jill Estey. Cunningham was the leading scorer for the squad, averaging 15.3 points per game. She had a career high 28 points against Michigan State. Cunningham is also the all-time free throw and three-point shooter in Illinois history. Dupps was on of the Big Ten's top freshman in 1992. She averaged 7.3 points per game and 4.3 rebounds per contest in her initial season with the Illini. She also gained valuable experience this past summer while participating in the Big Ten's foreign tour of Australia and New Zealand. Estey was the assist leader for the 1992 team, and she ranks second on the all-time career list of assists at 400 . She is just 107 assists shy of the overall assist record at Illinois. In addition, Estey already holds the top spot in steals with 190.

Cunningham agrees with coach Lindsey about the team's goals and expectations. "One of our main objectives is to make it to the NCAA's. Also, we want to finish between third and fifth in the Big Ten. Iowa and Ohio State pretty much have a lock on first and second
place, but realistically, we feel that we can finish as high as third in the conference."

Perimeter shooting will most likely be the Illini's strength throughout the season because of the experience from the returners. Cunningham, Dupps and Estey will key this play while sophomore Pat Lolita, who saw quite a bit of playing time as a freshman and junior Vicki Klingler will handle the post work. Coach Lindsey did say that the post positions could be the strength later in the season but for the time being, the perimeter game will be regarded as the focal point of the ball club. Overall, Coach Lindsey has a strong blend of seasoned veterans with a solid core of youngsters.

In general, Coach Lindsey does not feel that having a young ball club will effect their chances of putting together a successful season. "We have good experience at the perimeter with Cunningham, Dupps and Estey. Our post play will also be solid with Lolita and Klingler. So far, we have played many of our young players, and we were able to get some of our younger people valuable playing time last season. The experience our youngsters gained last season will benefit the rest of the team in the 1992 1993 campaign," Lindsey said.

The team opens their season with a game against Illinois State University on December 2. They competed in only two preseason games, but they were including a hard-fought contest against the Chicago Challengers. The Fighting Illini came away from the game victorious, 81-71 and were prepared for their season opener at Illinois State. Basically, Dupps believes (continued on page 187)

## Being 7he

Eachyear,26indivudalsmakethecheerleading juad. Sixteen are chosen for the varsity team, and are selected for the junior varsity squad.
Cheerleading advisor Erin Krause conducts a ng search for the best varsity and junior varsity lent. "Every spring, we hold tryouts for both the rsity and junior varsity squads. The tryouts are eceeded by a six week period in which clinics are eld thatpreparetheindividualstrying out. Forthe ursity, we have a first cut, and then this is later llowed with a second cut. Basically, our junior ursity tryouts are held to get the freshmen and phomores involved in cheerleading. Yet, juniors e more than welcome to come out for the junior ursity team too. Of course, the only ones who can ttryout for the junior varsity squad are seniors. I el that having a junior varsity team is an efficient aytogetunderclassmeninterestedincheerleading an early age," Krause said.
Ingeneral, the cheerleading squad performsin fferent university sporting events, most notably football and basketball. The entire squad cheers homegames while only part of the squad travels awaygames. OnDecember23,though,therewas todd occurance. Only five squad members were
present for the men's basketball game against the Missouri Tigers at the Arena in St. Louis, Miss. called the "Braggin' Rights Contest." Most of the squad was in San Diego for the Holiday Bowl with the football team, so full squad participation was impossible.

The junior varsity team cheers during the women's basketball games while the varsity squad cheers for the men. The teams would also like to cheer for the home women's volleyball games, according to Krause.

Thevarsity squadmustgothrougha strenuous workout to prepare for the upcoming football and basketball season. Their training requires a great deal of time and effort from each individual cheerleader.

Senior and team captain Brian Sokol believes that the conditioning they have done prepared them for the rigors of the basketball and football seasons. "We practice every other day, and we lift weights on off days. Our work prior to the football and basketball seasons really gets us ready and in shape. Thistraining does noteveninclude what we go through for our auditions later in the year."

The varsity cheerleading squad prepares each
season to tryout for the Universal Cheerleader OrganizationChampionshipsthatappearonESPN over thesummer. Theyworkthroughout theentire first semester on the audition tape, but only 10 varsity cheerleadingsquadsthroughoutthecountry are chosen to appear on ESPN over the summer.

The squad endures a rigorous amount of training in preparation for their auditions. "We havenine hours of practiceeach week, and nowwe are starting to conduct practice an extra night each week. We lift weights three times a week, and we also try to practice outside on certain occasions. Then, too, we have to find time to practice with our partner, so we can make sure that we are on the samewavelength,"DawnSheroky,seniorandteam captain, said.
'Then, after all of our preparation, we have to send in our audition tape. If we are fortunate enough to get accepted, we then have to work on presenting another routine. After this, we must correctanything that is wrong with the routineand re-submit the audition tape. Wegothorugh quitea bit and the process takes up a lot of our time. But in the end, if everything goes our way, it is worth it," Sheroky said.

## Gaining popularity

isabled athletics have become an integral part of the University of Illinois life for physically disabled athletes. Despite the continued success of these teams, very few people on campus know about thém.

The wheelchair basketball team, for example, has become prominent in national competition. The basketball rules are the same as the National Collegiate Athletic Association (NCAA) rules, with a few differences. One rule change is that traveling is only called when a player pushes on his/her wheelchair without dribbling. There is also no double dribble violation. In addition, the players are allowed two pushes before they must put the ball on the floor again. Another difference is that players are allowed five seconds in the lane rather than the three allowed in NCAA basketball.

One rule that did not change, however, was fouls. They still exist, but are referred to as physical advantage fouls and not personal fouls. A foul is assessed to a player who has functional lower limbs and who uses them to his advantage. This type of foul is adhered to pretty strictly by the officials because it is considered a technical foul. Second, a player is allowed only three physical advantage fouls as opposed to the five personal fouls allowed under NCAA rules.
"The wheelchair basketball team has already begun its season. They posted a 4-1 record and a second place finish in the Central Intercollegiate Conference Tournament. They were defeated by two-time defending national champion, University of Texas-Arlington. This six-team, round robin competition sets the seedings for the National Intercollegiate Championship Tournament in March," Head Coach Brad Hedrick said. The wheelchair basketball team looks to be in pretty in good shape for the post season.

The track team has also become extremely popular for physically disabled athletes. The season runs from February through December, and the team practices seven days a week. Currently, the track team consists of 23 members. Of the current season, Head Coach Marty Morse said, "In general, our focus will be more concerned with road races as opposed to local races and track meets. Our first big race will be in Tampa, Fla., for the Gasparillo 15K. Then on February 27, we will travel to Torrence, Calif., for the Mobile 10K. After this, we have the - Boston Marathon on April 19. Our first race in May is the Blooms Day 12K in Spokane, Wash. Our two biggest races of the year will then follow. The Heidelburg will be held in Germany on June 12, and the Peachtree Roadrace will take place in Atlanta, Ga., on July 4. These are definitely our two biggest races of the year."

## through winning

Trying to get the ball away from Chicago, Illinois players reach over their opponent. Wheelchair athletics use the same strategies but different rules.

## for the fun of it

any students participate in the intramural program.
Whether it's because they are good athletes, enjoy sports, or are reliving glory days, there is an intramural division for everybody.

According to John Klause, Director of Intramurals, there are 35 intramural activities offered, ranging from group sports, such as basketball, to individual sports, such as table tennis. A division exists for fraternities and sororities, as well as one for residence halls. There are also co-recreational divisions, women's divisions and a division for graduates, faculty and staff.

Fraternities and sororities are the largest division, with many houses fielding more than one team. "I play for the competition and for the fun of it," Andy Bjornberg, junior in Engineering, said. He plays basketball, softball and flag football for Alpha Kappa Lambda.

Other students find similar reasons for participating in intramurals. "It's a good reliever of stress and a good way to stay in shape," Jennifer Georgas, sophomore in LAS, said. Georgas plays co-rec football and basketball.
"Intramurals give people a chance to recreate and to release stress and tension," Klause said. "It's an outlet aside from school and it gives people a chance to socialize and have some. responsibility."

Intramurals are played at a number of sites across campus, ranging from the Complex and Gregory Fields for outdoor team sports, to the Ice Arena for ice hockey and broomball, to Huff Gym or the Campus Recreation Center East for basketball. IMPE serves as the most popular site for indoor sports, such as water polo and wrestling. "Basketball is our most popular sport in terms of numbers," Klause said.

Funding for intramurals is part of the campus recreation budget, which comes from student fees. The funding is also included in a newfee implemented during the year for student participation in the intramural program. Whether playing a team or individual sport, there is a participation fee. "It came down to either we implement fees or cut the programs," Klause said. "It was a matter of equity."

The money helps pay salaries to the intramural staff, supervisors, groundskeepers, and officials. Team sports usually have officials, and many of them see it as a good way to earn some extra cash. Seasons are usually only four weeks long, and officials can work the hours they want. "I need the money," Scott Kosinski, sophomore in LAS, said. "It's easy money, but I don't like getting yelled at by players."

No matter what sport you play, there is an intramural division that will suit you. Besides getting a chance to play, you can use the opportunity to relieve some tension and meet some new people.

## Grastear Yuar Conching CHANGE

After finishing eighth in the Big Ten in 91-92 with a 2-11 dual-meet record, the restling team appeared as if it needed a ajoroverhaul. Following this dismal season, ead Coach Ron Clinton resigned and new ead coach Mark Johnson was brought in.
Johnson brings a more confident attitude ith him, as well as a different coaching style. native of Rock Island, Ill., Johnson brings 10 ars of quality coaching experience with him. eginning in 1982, he was an assistant coach perennial wrestling powerhouse Iowa fore moving on to a head coaching position Oregon State. Previous to Johnson's tenure, regon St. had a floundering wrestling ogram. Under Johnson, the team compiled two-year dual-meet record of 20-5-2, cluding a 11-1-1 mark in 1991-92. Johnson on the Pac-10 championship in this season id earned "Coach of the Year" honors.
"It's always been a dream of and goal of ine to coach at the University of Illinois," hnson said after being hired. "For an dividual from Illinois to come home, words n't express how I feel."
With the new coaching philosophy here, ere is a definitechange noted. "Theintensity the wrestling room is a lot different," Steve arianetti, sophomore, said. "There's notime slack off, and the coaches are focusing on lping us. The style of coaching is different. e needed a different attitude and better nfidence."

Lance Pelton, a senior, also sees an immediate difference. "Wehavehigh hopes," Pelton stated. "Coach Johnson is getting us in shape and mentally prepared. Theolder guys were down because we have not been successful recently. But this year we have a

better mental outlook. The coaches around us are pushing to do well."

Johnson knew what changes he needed to make. "Our biggest change is in attitude," said Johnson. "We prepare these guys with a
positive attitude where they're capable of winning through hard work."
"We'll be in shape," junior Charles Gary said. "We have more intensity in practice."

Looking to the season, most team members are confident that they'll improve. "We'll be leaps and bounds better," junior Jeff Alexander said. "Our new coaches give us confidence and get us in shape."

Marianetti is looking forward to the season. "We'reall pretty excited and confident that we'll make improvements over last year," he stated.

Gary agreed with the positive outlook. "We'll definitely have a winning record because of our new coach and attitude."

Pelton agreed as well. "I expect to do a lot better," he said.

Johnson doesn't want to make any predictions, however. "I don't know what to expect," he said. "I'm just looking for individual improvement. The athletic department has given me a lot to work with. We need to get some more recruits and turn this program around."

With freshman recruits Al Strobl and Earnest Benion competing during the season, Johnson already has recruited two former Illinois state champions. "I plan to hit the ground running and start recruiting immediately," Johnson said. "I look forward to keeping the Illinois quality athletes at home, where they should be."

## Rebuidding and G 0 <br>  <br> Setting S

After coming off of an 11th place nish in the Big Ten last season, Men's vimming Head Coach Kevin DeForrest new he had to improve the program and et some recruits that could help pull the lini out of the Big Ten cellar.

DeForrest said, "Basically, we ally recruited a great corps of freshman. ney are going to be extremely tough er the next couple of years. Overall, is season we have set a couple of specific pals. First, we want to have the highest ade point average of any team in the nference. This is very important to us. lso, we want to finish in the top five of e Big Ten. This will be difficult because the depth of the conference. Finally, e want to finish in the top 25 of the CAA's [National Collegiate Athletic ssociation]. We definitely feel that we n accomplish this."

Key returnees from last season's uad are senior captains Russ Maloney id Frank Nizolek. Both captains, pecially Nizolek, are excited about the esh new batch of swimmers.

Nizolek said, "All of the young lys are really great. They will definitely ake an immediate impact in the Big Ten nference. With so many freshman and ich youth on the squad, some people ay think that I am in the leadership role. et, we as a team are leading each other. aving the young guys around is really ce. Actually, it is kind of like a breath of esh air for the older guys to see all of the tergy the younger guys display."

Overall, Coach DeForrest believes at the Big Ten Conference is going to be
extremely competitive this year. He said, "Michigan and Minnesota are in the top 10 in the country. They are simply in a

league of their own. In addition, nine of the 11 teams in the conference finished in the top 30 last year, so our work will be cut out for us. Basically, the Big Ten Conference is the best league in the country."

Moving up in the Big Ten Conference is a major goal for Head Women's Swimming Coach Don Sammons. He said, "I expect for our squad to move up in the conference standings this year. As a team, we feel we can accomplish this. We have a relatively small team, but they are performing quite well. Our squad has to battle powerhouses like Kansas and Northwestern throughout the course of the season. Competing against these type of standouts will only make us better as a team, especially in the Big Ten."

Team captain Lisa Strimpfle, sees a middle of the pack finish for the women's swimming team in the Big Ten. She said, "To finish from first to third in the Big Ten would be pretty tough. Michigan, Northwestern and Minnesota are all going to be pretty much unbeatable this year. Including myself, we have three returning senior swimmers from last year, the other two being Tracy See and Jennifer Hejnicki. We think that the team should finish right about in the middle of the Big Ten Conference this year."

Other key returnees from last year's squad are Cathy Ditrich and Kristen Rakoski. Coach Sammons said that he will also be counting on these girls for leadership. Coach Sammons believes that they will both have quality seasons.

Congratulating senior AndrewSmall, team members surround home plate. The team gives away different prizes during each inning from various campus sponsors to entice fans to the game

n the mound, an Illinois pitcher fires a ball towards the batter. The team returned most of their bullpen to the lineup for the 19921993 season.

## Lofty D R E A M S

High hopes abound for the 1993 Illinois baseball program. "We hope we're in a position to compete for the Big Tens," thirdyear Head Coach Richard "Itch" Jones said. "We hope to be chased by all of the other Big Ten teams."

One key that the team holds is a lot of

| UI | Big Tens | Opp. |
| :---: | :---: | :---: |
|  | Ohio State | 5 |
| 10 | Minnesota | 4 |
| 3 | Michigan State | 4 |

experienced players. "We didn't lose many players," Mike Jurack, senior outfielder, said. "The core of the team is the same. We lostonly one starter from the pitching staff."

Keith Toriani, a senior pitcher, also is impressed with the team. "Just from looking at the talent, we're so much better than last year. There are a lot of young guys putting pressure on the older guys to do well."

Jurack also agrees with the added competition at each spot on the field. "There are a lot of good new players adding pressure between positions. This should spark competition." Jurack anchors the outfield with fellow senior Andy Thompson. Together they stole 29 bases in the 1992 season which saw the Fighting Illini finish 36-20 overall, and 19-6 in the Big Ten. The team finished in fourth place in the conference and came in third in the post-season tournament.

Senior pitcher Matt Arrandale thinks the pitching staff needs to pick up some slack. "We have a better hitting team, but we must improve pitching. Overall consistency will make a huge difference."

Scott Spiezio, junior third-baseman, returns as the team's leading power threat.

Spezio hit 19 home runs and had a .328 batting average during 1991-1992.
"I need to help lead the younger guys because we have a pretty young team," Spiezio said. "I also need to improve my defense and minimize the errors."

Jones hopes Spiezio can be a responsible leader on the team. "He's one of our leaders," Jones said. "He is our best power hitter and is usually in a position to get a lot of RBI's."
"We can use an overall improvement," Spiezio said. "We had good pitching last year. We need an improvement there, and our hitting needs to get better. We've got a lot of guys who can hit and pitch, so we' ve got to put it all together."

Arrandale and Toriani anchor a strong pitching staff. Both won seven games last season. Sophomore Matt Sander should be counted on out of the bullpen as well. Forry Wells, junior first-baseman/catcher, will also be relied on in the infield. According to Jones, newcomers Brian McClure, Josh Klimek, Bryan Donnelley, Jeff Martin and Matt McCully should probably make an immediate impact.
"We've got a good shot at winning the Big Ten," Arrandale said. "Ihave a very optimistic outlook on the season. We only lost a few players and everyone else lost a lot, which gives us a leg up on the competition."

Toriani likes the team's chances as well. "I think we'll win the Big Ten and go to Regionals. I have confidence we can do that because we have a great hitting team."

Jones is optimistic and wants everyone to play to the best of their ability.

Spiezio is anxious to begin the Big Ten season. "We look like the team to beat because a lot of teams lost key players, but you never know in the Big Ten because you can get beat by the weakest team on any given day. We should do pretty well, though."

## Henderson Serves Solid Career

hen the women's volleyball team takes the court next season, there will be a noticeable change. No longer will the chant of "Nice serve, Lorna!" be echoed through Huff Gym. As the lone senior from the 1992-1993 team, Lorna Henderson won't be launching her rifle-like jump serve at opposing teams next season.

Henderson's not being on the court will be a change as she was a fouryear starter for head coach Mike Hebert. After her junior year, the 5-10 outside hitter from Canada earned first-team All-Big Ten and honorable mention All-America honors after leading the Fighting Illini in nearly every statistical category. Coming into the 1992 season, there were expectations that she would blossom into a true superstar.
"There's always pressure when you're personally acknowledged," Henderson said. "You have to add up to the year before. Some of the pressure came off when Kirsten (Gleis) came in."

Th 1992 season turned into somewhat of a downer for Henderson, however, as her statistics dropped off from. Despite her stats being down, Henderson was still a primary reason the Illini had such a successful season.
"It wasn't my best year personally," Henderson said. "but it was a good year for the team. It was awesome that we did so well in my senior year. You can always ask for more - we had a chance at the Final Four - but this season was really quite an accomplishment."

One of the keys to Henderson's success, in her opinion, is the crowd at home volleyball matches. Henderson was an instant crowd favorite. "Our fans are very educated and involved emotionally," she said. "They have a huge effect on what's happening. I feed off of the crowd because I'm so emotional. One thing l'll really miss is my relationship with the crowd."

Looking ahead to her future, Henderson is unsure of where she may land. With one more year to go on her English degree, Henderson is considering trying out for the U of I women's basketball team to keep playing sports. With her: athleticism, this is a distinct possibility, yet the fact remains that she wants to continue playing volleyball.
"I'm leaving my doors open," Henderson said. "I could play in Europe or try out for the national team, but l'm not really ready to make a decision. You never really want it to end, though, when you're doing well. Like any career, you want to keep going until you're washed up and can't continue, and I'm not washed up yet."

Story by Eric Schmidt

Lunging down to the floor, senior Lorna Henderson focuses her eyes on the volleyball. Henderson played on the lllinois Women's Basketball team for the first time in the spring.

Tears stream down senior Lorna Henderson's face as she listens to the "The Alma Mater" play at her final game. Illinois played Stanford in the Elite Eight playoffs and lost 3 games to 1.

With a save, senior Lorna Henderson bumps the ball as junior Kirsten Gleis looks on. Henderson came to $U$ of I from Canada.

> M embers of the University of IllinoisRugby Club dive for the ball during one of their games. The team won the Union Tournament which qualified them for the Midwest Junior Cup Tournament.

## Rugging Circles Around C ? <br> 

Staying in shape is what sets the $U$ of 1 agby club apart from many other university ub teams. "We have good fitness which elps when we play bigger clubs," Steve rause, senior and club president, said.
Freshman Cesar Nunez agrees that all of eir conditioning helps the team win their ames. "We practice more than other schools id are in better condition. Other teams get eak in the second half, and we are able to vertake them."
According to Pat DeQuattro, graduate udent, the team is in much better shape than any of the others. The rugby team trains vice a week and devotes a great deal of time fitness.
In the 1992 fall season, the club won the nion Tournament, which is their conference
tournament. This victory qualified them for the Midwest Junior Cup Tournament in the spring.
"We worked out a lot of our bugs pretty quickly in the fall and we made improvements where they were needed," Head Coach Ben Montez said.

Another reason for the club's recent success is the addition of graduate students who transferred here in the fall.
"We added a lot of grad students and their leadership has shown," Montez said. "We've got a great team. Also, there are a lot of new players with spirit. They are energetic, even if they don't have the highest caliber of talent."

Looking towards the spring season, the club seems to be optimistic for the future.
"We need to keep our level of playup," Krause said.

Nunez agrees that the team needs to keep doing what made them successful in the fall. "We want to do well and we need to stay in shape."
"We're going to play a tougher schedule in the spring," Montez said. "We'll know what kind of team we've got with this schedule. We should get some good momentum going when things start clicking in the spring."

Dave Hofeman, senior, has high hopes as well. "We don't have anybody graduating so we should be just as dominating as in the fall."

Montez really likes the team's chances, too. "We've got a really good attitude and a tight team on the field."

# RUGBY

Executing a move, sophomore Brian Steenart holds wwesteref fiom Easternllinois. Steenart walkedonduringhis freshmanyearandweested at 134 pounds.

Running towards the play, junior Jeff Arnenson plays first string against Purdue. Arnenson recovered a key fumble during the Ohio State game.

Blocking apass,5ophomore Steve Roth guards an Ohio State player. There are three walk-ons on the men's basketball team.
very year, different sports programs at the University of Illinois hand out scholarships to athletes across the country. Yet, there are those individuals who walk on to whatever sport they wish to participate in without a scholarship.

Certainly, making it as a walk-on is not an easy process, especially for the women's volleyball squad. Head women's volleyball Coach Mike Hebert said, "If we want a person to try out, we will go out and ask that individual to walk-on. However, it is highly unlikely that anyone who just tries out will make the team. In this regard, we just go out and call the walk-on if we want them to try out. This season, we do have one walk-on member, but as I previously said, it is extremely difficult for someone to just walk onto the team."

In general, walk-ons, when they do make the women's volleyball team, do otreceive any type of special treatment. In essence, there is not a special pattern that the coaches take for a walk1. Coach Hebert said, "If the athlete earns a scholarship, she does, and it is just that simple. It all depends on how any scholarships we are allowed to give that year and how many scholarships the NCAA [National Collegiate thletic Association] allows us to give out. The scholarships are not necessarily based on talent, but on how many e can distribute."

For the men's basketball team, making it as a walk-on is not as complicated because the team can always use odies to practice. The life of a walk-on, however, is not an easy one. They have to schedule their classes around actice, and they mustrealize what kind of athletes they are up against. Sophomore Brian MaCallenan is currently member of the Illinois basketball team as a walk-on, but he is not part of the team's traveling squad.
"Overall, it is a nice feeling to be playing against these big-time players. Yet, you have to realize that it is them gainst you. They are going to be bigger, stronger and quicker than you, and I have to do everything I can to defend ne of the players. Again, it is a nice feeling to be out there with those guys, but I still know that I will not get to travel the road games and that I will only get to dress for a few home games," MaCallenan said. "There are some actices that I can only participate briefly in and sit and watch the others practice the remainder of the practice. nere also practices in which I am fully involved. It just depends on what the coaches need on that particular day."

MaCallenan said, "I am not offered a scholarship. They will always need guys to practice. For the most part, they Il offer scholarships to the other recruits. Most of the other walk-ons were really good varsity high school players ho are out there to continue playing basketball. But, I will not be offered a scholarship because there will always guys there who are willing to practice with the team."

The Fighting Illini football squad also has its share of walk-ons. Two of the most prominent walk-ons are junior eff Arneson and sophomore Jim Klein. Arnenson had a critical 96-yard fumble recovery in the gridders' important 3-16 victory over the Ohio State Buckeyes. Klein, a walk-on from Western Illinois, stepped in this season and became ne of the Illini's top wide receivers, making several key receptions in Illinois' drive to the Holiday Bowl.

Even when athletes are not recruited to come to campus, many of them can come and make a significant impact 1 their sport and enjoy themselves at the same time.

Two lllinois players help block the ball as it comes over the net. The team competes with other teams in the Big Ten Men's Volleyball Association.

uring an Illinois volleyball game, an lllinois player spikes the ball. The volleyball team finished in fourth place in the Big Ten in 1992.

- Daily lliní file photo
iving for the ball, an Illinois player saves the team from losing a point. The team participates in both Big Ten competition and tournaments throughout the year.

For Club President Jeff Lideil, nproving on the performance of 1991992 is the major goal for the men's olleyball team.
Lideil said, "Last season we finished urth in the Midwest, and we feel that e could have placed better than this. e really want to improve on our erformance. We, as a team, believe that e can improve on the mark. Also, a ersonal goal of mine is to get more people tively involved in the men's volleyball ub. If we can raise the amount of articipation in the club, it would be quite eneficial."
Even though club sports at the U of I e not considered to be at the same level varsity athletics, the competition is ill very intense. The men's volleyball ub is a prime example of how mpetitive club sports are. They are volved in the Big Ten Men's Volleyball ssociation. The association is made up other Big Ten teams who do not have en's volleyball as a varsity sport. They am also participates in a pre-season urnament before their actual spring ason begins.
Lideil expects quality competition for e club. "Of course, the entire Big Ten is

deal to the men's volleyball club because of his leadership capabilities. He is a very experienced player, and I will look to him to be the leader of this volleyball club. We really need him to step up, especially because of the departure of Adam Lehland, our best player from last season. Adam made the All-Big Ten First Team last year so it is easy to see how much he meant to the team and why we will really miss his presence this season. Erik, as I already said, is pretty good himself. It just seems that whenever he enters a contest he takes over and dominates the match. I know that he will step up and serve as our team leader not only on the court but also off of the hardwood."

Lideil expects all six playing positions to be very strong this season. He does, however, believe that the position of middle hitter will be the strongest spot for the men's volleyball club. He said, "This middle hitter position will be the key to how smooth the team flows this season."

If the team can capitalize on its strengths, it should reach its goal and break into the top three teams in the Big Ten Conference.
VOLDETBALD

Stary by Garen Vartanian - Layout by Ryan Alman

Who is Craig Tiley? Well, the 19921993 men's tennis team knows who he is. Tiley is the new head coach for the team.

Tiley was hired in February 1992 by the $U$ of $I$ as the Director of Instructional and Player Development programs. Tiley, a native of South Africa, coached six years at the University of Texas-Tyler prior to joining the Illini. After Neil Adams resigned, Athletic Director Ron Guenther asked Tiley to fill the position of tennis coach on an interim basis until a search for a replacement could be conducted. Tiley is approaching the coaching position as anything but temporary.

Both the team and Tiley have some positive goals and expectations for the season and the future. "I am looking to put the program back on track to be a championship program. We are in the process of making the tennis team a future powerhouse. Right now, over 50 percent of our team are new players and walk-ons. I expect them to give me 110 percent and, in return, they will receive the ability to be a competitive tennis player in the Big Ten and at the National level," Tiley said.

Ryan Clark is the lone returning senior. Clark was the number one singles and doubles player for 1991-1992. He feels pretty optimistic about the team's chances.
"Originally, I thought this season was going to be a rebuilding year for us. Yet, now I think we should be pretty good. We have a couple of transfers coming in January, and we have a lot of strong, young talent. The team has shown a fresh attitude, and with the addition of a new coach, everyone feels very confident. We will definitely improve on our sixth place finish of a year ago and maybe even make a run at the Big Ten title."

Overall, Clark is returning from a strong season. In 1991-1992 tournament
competition, Clark was 13-7, posting a 46 record in the Big Ten in singles play. His overall record in singles matches was 23-17. Combined with graduate Sadri Gueche for doubles, they were 4-3 and 23 in tournament action and Big Ten competition. Overall, Clark and Gueche

Discussing their doubles strategy, senior Lindsey Nimmo and sophomore Kristen Jones get ready for a match at the Atkins Tennis Center. Nimmo was one of the top players in the Big Ten.

## Scuinging to IMPRO

Constant improvement is always the oal for the women's tennis team. In ead coach Jennifer Roberts' first season ve years ago, the team was $1-8$ in onference play. Each season since then er teams have gotten progressively etter, culminating in an $8-2$ record in 991-92. The Fighting Illini finished in cond place in the Big Ten, which was eir best season ever.
"Our goal has always been to climb e ranks of the Big Ten and get the best ut of all our players," Roberts said.
Despite dropping to fourth in the onference's post-season tournament, the am is confident about the 1992-1993 eason. Roberts especially needs a good ear from senior Lindsey Nimmo. "She lays well against top seeds," Roberts aid. "We need a solid performance from er. We're also hoping for senior Linda ates' best season ever."
Gates and Nimmo each won over 20 ames during 1991-1992, and they are both oping to do equally well this season. We need to be more consistent and Sgressive," Gates said. "We need to ome in and put the ball away as a team. e are pretty strong throughout, though, ut we have to work hard."
Another advantage the team has is ur strong sophomores. They seem to ave gained more confidence. "Our xperience is going to help us,"

sophomore Camille Baldrich, another 20 game winner, said. "We now know what to expect."

Nimmo is also looking forward to the year. "We're very good competing as a team together. There is no stand-out individual, and everyone contributes."

The doubles teams look to be another improved strength. "Our strength is that we're solid," Gates said. "Our doubles have better combinations and better chemistry."

Baldrich agrees that doubles are strong. "Our doubles are pretty good. We'll be able to pull it out in tight matches. We're a 'clutch team.'"

Roberts is also looking forward to the season. "It will be very competitive," she said.

According to Gates the most important thing is to have everyone healthy. Also, if they can compete consistently then they will be able to improve and do well.

Nimmo also thinks the team will do well. "We definitely have a shot at the Big Ten title. In the fall, we develop our skills, work on the fundamentals, and get ready for spring."

The team will have to beat conference powers Indiana, Wisconsin and Northwestern on their road to improvement. If they achieve their goal, they will move up another notch and be conference champs. "What sets us apart is our work ethic and discipline," Roberts said. "Our goal is to continue to improve."

In the driver's seat, University Golf Pro Shopemployee JerryMcKiilopis responsible for renting out 84 golf carts. For $\$ 17$, golfers can rent an orange, blue or white golf cart for 18 holes.

Working part-time at the Atkins Tennis Center, Jim Kane, senior in Engineering, strings a racquet. The Atkins Tennis Center, along with the golf course and summer camps, provides millions of dollars in revenue for the University.

Surveying the selection, Sam Trusner, Asssistant Equipment Manager for University Athletics, and Ron Schaede, GolfProShop Manager, look at new clubs.

212 Athletics
 coverage are the key to having a proficient operation. The University of Illinois is by no means an exception.

According to Timothy Tracy, Business Manager for the Division of Intercollegiate Athletics, there are two funds that comprise the athletic budget. "The scholarship fund and the athletic operations fund make up the athletics budget,"Tracysaid. Athletic operations are salaries, wages and the equipmentusedforeachsport. Thescholarshipfundencompasses donations and financial aid and is used to offset athlete expenses.

The Fighting llini Scholarship Fund raised over $\$ 2.8$ million in donations during the 1991-92year. "This is to help offsetscholarships," Tracysaid. Financial Aid and Academic Services for athletes cost the University almost $\$ 3$ million in the same time span.
The 1991-92 gross income for the Athletic Operations department totaled a staggering $\$ 15.2$ million, while expenses totaled just over $\$ 15.2$ million. The University of llinois lost $\$ 55,101$ in this time while in 1990-91, the university made just under $\$ 800,000$ in profit.

Income in Athletic Operations comes from more than gate receipts (which totaled $\$ 5.8$ million in football and basketballalone). "The Big Ten gives us a share from post-season play,"Tracy said. This equaled justover $\$ 700,000$ in 1991-92. Also, television(ABC,CBS,ESPN, Raycom) andradio(IlliniSportsNetwork) revenues equaled $\$ 2.5$ million, and income from the John Hancock Bowl totaled just over $\$ 1$ million.

The University also receives parking revenue, as well as money from concessions and program sales during any sport where these apply. "We also have revenue from auxiliary operations from the golf course, tennis center and summer camps," Tracy said ( $\$ 1.15$ million alone from the $\cup$ of I golf course!).

Wages are alsoincludedforemployees at the Atkins Tennis Center, Equipment Room, VarsityRoom, Training Room, golf course, summercamps andmaintenancecrews. Administration costs are alsoincluded, such as promotions, marketing, and Sports Information. Football and Men's Basketball lead all team expenses at $\$ 1.65$ million and $\$ 733,000$, respectively. The top women's sports as far as expenses are concerned are the basketball team with $\$ 294,000$, followed by volleyball at $\$ 274,000$. Football recruiting cost the university $\$ 179,000$, while promotions cost $\$ 173,000$. Golf course maintenance cost $\$ 518,000$, while running the pro shop there cost $\$ 577,000$. Even with all of these expenses, this operation brought in a considerable profit.

All in all, some of these numbers make college athletics a new game. It is no longer just an extracurricular activity, it has become a profit making marketing item.

The large numbers-crunch in college athletics is one of the main reasons that the need to win and bring in top players has become a priority for big schools. Striving to bring in the best can lead to the downfall of some programs, as well as, when the pressure to win becomes too much for a university to stay within the lines of National Collegiate Athletic Association (NCAA) rules.

For many schools around the nation these violations have led to a major loss in revenue. As when the men's basketball team was suspended from NCAA post-season play. The University lost revenue from placing in the tournament, and the Big Ten also lost money because the $U$ of $\operatorname{could}$ not contribute as it had in the past.

With millions of dollars being spent on college athletics, the value of an a thlete has gone up and the staggering results have brought about new facilities and rising salaries for coaches all over the U.S.

After going to the National Club Soccer ournament for the past four years and coming pshort, the U of I men's soccer club is looking end its string of being the proverbial ridesmaid. In 1991, however, the team ntinued its streak and lost to national runnerp Mankato State, 3-2, in the semi-finals.
In mid-August, the club began preparing make its run for a national championship. he road looked rough, though, because the eam lost four defensmen. According to club resident senior Chris Berry their defense is ery young, but the offense has a pretty strong eturning core. They are a year older and uch more experienced in conference play.
Berry is confident in the defense and sees ttacking as a key for victory. "We have veryone returning as the 'attacking' part of neteam. We have no new forwards and only ne new mid fielder. This is a big advantage om last year."
Strong individual talent and the presence f team chemistry are also important. "We ave really strong individual talent," senior oalie Don Tyre said, "but we need to be able gel."
According to junior midfielder Ryan onnelly, "If we start gelling, we'll do well. Ve'vegot to bring it all together and be playing ur best by the time nationals arrive."
Offensively, the soccer club appears rong. "When we're on," Berry said, "we're retty tough to stop, but we can't sleep through ames. We need to want to play."
Freshman defender Mark Kushemba grees that everyone must mentally be repared. "We're a good team, but we have to lay smart and hard."
The team is also putting its experience to ork. "We're confident we can do well," enior forward Derek Moss said. "We have a of players with experience in the purnament. We juggle line-ups early, but it's
going to click by the time we get to nationals." Most of the team, in fact, is optimistic about the season. "Our defense is improving each game and getting used to each other," Donnelly said.
"We're in good shape," Tyre said. "Michigan is the team to beat, though."

Berry had a little to add on the defense, as well as who to beat. "Our defense is just as good as last year, and has the potential to get better. We've got to beat Michigan and also not take Notre Dame lightly."

The team hopes everything will come together for nationals, and that they will be able to shed their image of not being able to
win the big games. "When it comes down the line," Moss said, "our team can definitely do it."

# SOCCER 

## Oed Goals <br> 区

For women＇s soccer club president Dana Ehlenfeldt，returning to Austin，Texas，for the national tournament is the season＇s maingoal．
＂Our main focus for each season is to make it to Austin，Texas，for the national soccer tournament for both men＇s and women＇s soccer．Last year，we made we finished third．We were very proud of this， but of course，we would like to place first in the tournament，＂Ehlenfeldt said．

To qualify for the national soccer tournament，the team must finish in either first or second place at the Big Ten Championships．The Big Ten team regional is held in October，and the top two teams travel to Texas for the tournament．

Women＇s soccer club coach Scott Wilson believes the team can make a repeat trip．He also feels his team must key on their passing gametobesuccessfulat the tournament．Wilson said，＂Last year，our passing game was a little weak，and this hurt us at nationals．The teams that were the most successful in Austin have the best passing games．We are definitely looking to return，and we are on the right track so far． We have already won as many games this year as we had won to qualify for the tournament time last year．I think we are in pretty good position to finish better than last year and return to the tournament．＂

At this point，the team has posted a 7－3－3
record even with many different odd illnesses． There have been several cases of the flu，and ironically，only one of their injuries has been directly soccer related．The team＇s successful campaign reflects their depth，and theadversity has not shown in their overall performance．

Ehlenfeldt attributes another area to why the team has not produced a couple of more

victories．＂So far，we have one Big Ten win which was Northwestern．Other Big Ten contests have resulted in ties．Game in and game out，we seem to be controlling the tempo， but we have trouble scoring at times．If we can just pick up our offensive end of the game a little bit，we are going to be an even tougher team to beat because our defense has been awesome．We＇ve been shutting down teams consistently and if we can find an even median between our offense and defense，I look for us to return to Austin．＂

Other members of the team，including Ehlenfeldt，are important on and off the field． Junior treasurer Tracy Chamberlainasks the university for different types of equipment． She also handles all fund raisers and gets the referees and money from the university．

Wilson also relies on Chamberlain on the field，and is counting on senior Krista Pile． Wilson said，＂Tracy led the team in assists last： year at the tournament，and really needs to come to the forefront and lead the team．Also， Krista scored four goals at nationals last year， and she received the prestigious Avery／Brunz Scholarship．They were both key members of last year＇s successful team，and they have both been leading the team thus far．＂

With consistent improvement，the team will reach theirgoal and improveon an already impressive record．

What does Christina Zakavec want? ell, she and her teammates want the omen; s softball team to have strong team nity and to finish over .500 .
"In the previous seasons, we have not ad a fall season. Yet, this year, we parcipated in fall competition to help us repare for the upcoming spring and also help us get to know each other better. ast year, we did not really know each her so we wanted to try and change tat. We simply wanted to become better quainted with each other before steping onto the field together. Team unity very important to us and by having a 11 season, we have a head start on allowg everyone to get to know each other," akavec said.
Basically, Zakavec has a simple goal r the club - she really wants them to nish above the .500 mark. Last spring, ey finished right at the .500 mark and ey are looking to improve. An above 00 finish for the season would be very tisfying.
In general, Zakavec believes that there ill be several key players that will proide leadership roles for the squad. "I ill be looking at four particular players lat will have to lead the club. Shana larquwart is the anchor of the infield as tortstop. She's a senior, so she has obviusly been around and can provide quite bit of experience. She will be batting in te lead-off spot in our order, which is catalyst for the rest of the line-up. lso, Joey Sabatini, a senior pitcher, will e crucial to our success in more than one ea. She has gained a great deal of expeence at the college level. We have an oundance of young pitching, so we rely need her to anchor our pitching staff ad to act as a guide for our younger
hurlers. In addition, another senior, Debbie Ubriaco, a right fielder, will be counted for leadership this season. Last but not least, Jenny Paleti, a sophomore catcher, will be counted on for production this spring as she too has been around for a year."

Throughout most of the year, the women's softball team prepares for the spring season. Including their fall season, they work out through the winter. At the conclusion of Christmas Break in January, the women begin to practice in the bubble over the football field. Once the weather warms up and is suitable for playing softball outdoors, the team starts to work out on their field. They continue practicing through March, but their actual season begins on March 28.

Overall, Zakavec believes that there are a couple of clubs that will definitely provide some stiff competition for them during the fall. "Lincoln Land Junior College, which is located in Springfield, is one of our biggest competitors every year. This is always an important game for us because they are usually strong year in and year out. Also, Kankakee Junior College has provided good competition for us each year. We always look forward to playing against them. Then, too, the College of St. Francis is always tough competition for us. These are the teams we really need to focus on because as far as competition goes, Lincoln Land, Kankakee and St. Francis are three of the toughest teams we play every year."

cooping up the ball at first base, Sharon Masterson, graduate, attempts to nip the runner at first base. The team has both fall and spring seasons.

## Splashing to the

For team captain Chris McDonough, making a name for the water polo team and performing well are two important goals.
"We want to make a name for ourselves and get people to recognize the water poloteam. Since we are a non-revenue and an intramural club, we donot get toomuch notoriety. The team islooking tochangethis and draw moreattention to the club. We feel we can do this through our performance throughout the entire season. We really want to remain legitimate and make some noise while we are competing in the Big Ten conference," McDonough said.

Basically, the water polo team is counting on two key individuals, in addition to McDonough. Todd Lutemeyer, a fifth-year senior, is returning forhisfinal season of play. Also, James Kreksman, a junior, will figure to be a prominent contributor to the squad.

McDonough definitely believes that they are two of the team's most consistent members. He said, "Todd is an extremely solid player. He attends all of the practices. This really says a great deal about his character because not all fifth-year seniors would take the time to come to all of the practices. Italso sets a good example for the rest of the members of the team. James is also a very hard worker and a very steady player. He, too, shows up to all of the practices and healways puts in 100 percent. Theother guys on the team really look up to James and Todd because of the character they display in and out of the water. Consequently, their effort and leadership really aid in the success of the team."

Thesiteof thewaterpoloteam'shomecontests is Huff Pool. All water-related intramural games at the University of lllinois are held there. The water polo squad has already competed in one tournament where they compiled a 4-1 mark. The teamnexttravels toNorthwesternon theweekend
of October 9-11 for their second tournament of the 1992 campaign. The team really concentrates on their regular season contests to prepare them for the final competition of the season.

The season concludes in November with the Big Ten tournament. This will give the team a legitimate chance to show the rest of the Big Ten

just how competitive they are. McDonough, of course, believes the Big Ten tournament is very crucial in their pursuit togain respect for the water polo club.
"Our season begins in September and then continues for eight weeks throughout the fall. We workand practiceextremely hardduring this time in preparation for the end of the year. Our season concludes with the Big Ten Tournament in November. Naturally, it will be very importantfor us to make a good showing in this tournament to give the team some notoriety within the Big Ten. Incidentally, wealsocompeteand playin different tournaments throughout the spring. However, our fall schedule is loaded with many more tournaments and other matches than the spring," McDonough said.

## What does it Take to

very athlete strives to turn professional. In order for a student-athlete to excel at a sport and make it there, they must be better than other athletes in all phases of their game. Three recent athletes who have what it takes include former Fighting Illini basketball players Kendall Gill and Nick Anderson and former football player Jeff George.
"Kendall and Nick are physically and mentally talented," Lou Henson, head basketball coach, said. "They are both strong, agile and quick. They also have good court sense and a feel for the game."

In order to rise above all other athletes, a professional needs to have a burning desire to improve, and they need to have the physical talent to achieve their goals. A pro also needs to have good instincts.
"Pros have a knack for knowing what to do," Henson said. "They seem to be in the right place at the right time always." In high school, Gill, a guard, and Anderson, a forward, showed promise not only for college, but beyond.
"I scouted Kendall a lot myself and thought he had a chance to go pro when he came here," Henson said. "He needed some work, and he worked hard lifting weights and improving his game. lalso thought Nick had a chance. Both players improved significantly, honed their skills and their confidence."

Both Anderson and Gill were members of the 1989 Final Four team. Anderson, a junior, left following the season, and became the first ever draft pick of the expansion Orlando Magic. He continues to improve there, outside of the spotlight that now shines on ex-Louisuana State star Shaquille O"Neal. Gill left after the 1990 season, and was drafted by the Charlotte Hornets. In his first season, Gill finished second for Rookie-of-the-Year honors.

George quarterbacked the lllini to many impressive wins, as well as a 1990 Big Ten Co-Championship. Just as his basketball counterparts, George showed exceptional promise when he came here.
"We all saw his potential early in his career," University of Texas Head Coach John Mackovic, former U of I coach, said. "He set his sights on being pro early, and worked diligently to achieve that."

George's Offensive Coordinator, Gene Dahlquist, who followed Mackovic to Texas, helped develop George. "He needed a chance to develop and be helped along in a system."

George took his talents to the Indianapolis Colts after his junior season, and was the number one draft choice in 1990. According to his coaches, his arm strength and arm quickness aided his natural ability.
"He has size and strength, along with a quick release," Dahlquist said. "He is a very talented young man who can make throws others can't. Jeff is capable of making the plays that win games for you and knows what it takes to win, especially in clutch situations."
"Jeffhas rare talents one does not find in many players," Mackovic said. "He has a natural instinct of being able to throw the ball accurately and he has a great deal of confidence. Jeff is able to take his game to the highest level."

Because they worked hard and were determined to win, these $U$ of I players made it.

team mates. Gill is now one of the top newcomers to
the NBA, and plays for the Charlotte Hornets.

Entering the 1993 Women's Gymnastics season, Head Coach Bev Mackes has set some goals for her team.
"Of course every coach's goal is to win as much as possible. Basically, we are looking to improve our position in the Big Ten. I would like to see us break into the top three of the conference championships. Also, it would be nice if we could re qualify for the National Championships. If we can get good balance in all of our events and not have any dropped score in our line-up, then we will be in pretty good shape as far the conference is concerned," Mackes said.

In general, the Women's Gymnastics team returns a strong group of girls from last year's squad which finished 2-14 and $0-2$ in Big Ten competition. They are junior Kimberly Bathke and senior Kara Corso. Bathke, who was last season's top allaround gymnast, will try to repeat her successful performance. In addition to being the top gymnast on the team, Bathke accomplished several individual team and career best. She scored a 9.70 on the vault vs. Nebraska and a 9.70 on the uneven parallel bars vs. Illinois State. She also earned a 9.75 on the floor exercise at the Shakespeare's Festival and a 38.20 AllAround score vs. Illinois State. Her overall performance against Illinois State set a new school record. In addition to her record-setting performance and the events which merited team bests, Bathke set a personal career high on the balance beam by receiving a 9.45 .

Corso was a Big Ten finalist in each of her first three years of competition. During 1992, Corso also achieved team and career bests in three different events. She scored a 9.70 on the vault vs. New Mexico, and she received a 9.75 on the
floor exercise at the Illinois Classic. Corso, along with Bathke, earned a 9.75 for the floor exercise at the Skakespeare's Festival. Finally, she scored a 9.70 on the

|  |  |  |

vault at the Big Ten Championships. Corso also set career highs in several other events. On the uneven parallel bars, she scored a 9.30, on the balance beam she scored a 9.50, and in her All-Around performance she received a 37.55 .

Other teammates looking to make their contribution include freshman Natalie Forsthoefe, senior Becky Gaa and sophomore Nicole Ward. Forsthoefe, a true freshman, will be looking to make a positive impact in her first year of Big Ten competition. Gaa was a balance beam finalist in 1992, and Ward is looking to improve on her freshman season.

Overall, Mackes is looking for
consistency from each of the girls
"We want to finish in the top three of the Big Ten and be consistent. I want to be a consistent contributor, and I believe that all $\sigma$ the team members are looking to be steady ir their performance," Gaa said.

The team opened their season with mixed pairs competition with the men' gymnastics team on November 6. Thei first competition did not begin unti January 15 at Southeast Missouri State.

Ward believes that the 1993 squad will be quite successful in their quests "We are going really well right now. W are coming together as a team, and as whole we are much farther along that last year at this time. I think that we wil be right up there in the Big Ten race."

winging to the lower bar, senior Kara Corso completes a move on the uneven parallel bars. Corso is one of the top vaulters and floor exercise competitors in the Big Ten.
GyPNASTICS Jennifer Durdil prepares for her dismount. Durdil was a co-captain with Kara Corso for the 1992 squad.

## Key 70

## s

Senior leadership will be the key to the men's gymnastics season. After finishing third in the Big Ten Championships and eighth at regionals in 1991, the Fighting Illini look to four returning seniors to lead the team.
"We have a pretty good group of seniors who have been working together since their freshmen year," Head Coach Yoshi Hayasaki said.

These seniors include Ricardo Cheriel, who is the defending Big Ten horizontal high bar champion, as well as Nick Baker, the team captain. Seniors Kimp Grant and Sean Henderson are also expected to contribute to the team's success. Junior Matt White, sophomore Charlie Kowalski and freshman Goncalo Mesedo will also be seen as factors. "I would think this is the best team since 1989, when we won the national championship," Hayasaki said.
"It's a matter of taking our maturity from the past three years of competing and putting it all together," Baker said. "We want to make something happen in our last year."

Cheriel said that one of the goals was for the team to work really hard and improve throughout the season. "Our seniors have competed a lot, and we'll have to show the new freshmen what we know," Cheriel said.

Cheriel also feels that he and the rest of the team need to become physically stronger in the off-season. One part of the gymnastics program that he feels will be key is the rings. "We do need to get stronger in rings."
"Our goal, as seniors, is to make it to nationals and place very high in our last year of competition," Baker said. "We aren't going to get to compete any more
after we leave."
Some pressure will be on Baker to do well. As the team captain, he must strive to be a good influence on his teammates. "It's a leadership role," Baker said, "but it's my second year doing it. So, I know more of what I'm responsible for, and I'll

be able to accomplish what I need to do as captain. Having the position just motivates me and makes me work a lot harder," Hayasaki said.

Hayasaki felt that the team should be able to make nationals after hosting the Eastern Regional Championships. "We'll need to mature in performance and strength."

To achieve their goal of making it to nationals, the team must first finish among the top six teams in the Regional Championships. A tough road lies ahead for the gymnastics team to make it back to where they were in 1989. "We're working a lot harder this year," Baker said. "We'll do pretty well."

# GYMNASTICS 

 Kowalski completes an iron cross on the still rings. Kowalski alternated in the all-around competition for the team.
$\square$ ripping the still rings, senior Sean Henderson holds a strength move on the still rings. Henderson also competed in the floor exercise in dual meets.

## 7t's All in the <br> 

One of the teams with the most promise for the 1992-1993 season happens to be one that not many people are aware of: the women's golf team. During the Spring 1992 season, the team had third place finishes in the Illinois State Invitational and the Northern Illinois Snowbird Intercollegiate Tournament. They finished second place in the Lady Northern Intercollegiate Golf Tourney as well as the Hawkeye Invite.

Senior Renee Heiken is considered to be one of Illinois' best golfers ever. She was named the Big Ten Player of the Year, as well as $U$ of I's Co-Female Athlete of the Year for the 1991-1992 season after posting victories at the Illinois State match and the Hawkeye Invite. Heiken also had strong finishes at most of the other tournaments the team competed in.

The Fighting Illini return with all but one member of the team for the 19921993 season. Some team members who will contribute include sophomores Christine Garrett and Jennifer Lynch, as well as junior Stacey Pirk. After being named the Big Ten Freshman of the Year, sophomore Becky Biehl also returns. She finished first at the Big Ten Championships in 1992, and helped pace the team to a third place finish overall.
"I'm very optimistic about this season," Head Coach Paula Smith said. "Our experience will be a positive factor. Everybody's returning and we have an excellent schedule."

The team has set many goals for their season
"We're looking to getting our team scores down and break 300," Biehl said. "Our long term goal is to win at the Big Ten Championships and qualify for nationals. We also have to be consistent
and try to play better."
On the team level, according to Garrett, the team needed to work on their individual game as well as work together as a team in order to do well.
"Team support and knowing everybody's pulling for you always helps.

It's also pretty competitive this year," Garrett said.

According to Biehl, the team was goping to be very strong, and they had a very good chance of accomplishing their goals.

Improvement is the name of the game for the men's golf team. The team won the Northern Iowa Fall Classic in 1991, but finished ninth in the Big Ten Championships.
"We're looking for improvements from everybody," head coach Ed Beard said. "We're always trying to play the best we can."

Top returners for the team for the 1992-93 season include sophomores Ryan Graff and Jay Scott, as well as junior Jamie

Fairbanks.
In order to be successful, "each person must play as a team," Graff said. "We're gonna have to improve our individual games and hit more greens."

The team is working hard to combat these problems.
"We're practicing hard and trying to play our best," Scott said. "We can't make mental mistakes and can't throw balls away. Hopefully, we'll play well."

According to Graff, the fall season looked interesting, and he saw the spring as an exciting time to see if all of the team's practice had paid off.
"We've got enough returning veterans," Beard said. "We should do well."

oncentrating on the ball, junior Stacey Pirk chips the ball on the The team plays at the Orange and Blue Course in Savoy

# Defense isKen far等 I 0 B 

Defense is the key for many sports teams to be successful. The $U$ of I lacrosse club will rely heavily on an experienced defense to lead them into the Big Ten tournament. "We can do well because we have all three returning defenders, a great goalie, and solid backups, too," Keith Powers, senior and team president, said.

The team competes in two seasons, fall and spring. "With Big Ten Championships in the spring that's our big season," Powers said. "We use the fall season as a tune up and try to get more experience before going into the Big Ten Championships."

According to Scott Williams, junior and club vice president the team has a good chance of winning the Big Ten Tournament because of their experienced defensemen and attackmen. The attack also has a great deal of individual talent.
"We are really filled with good talent," Powers said.

After finishing fourth in the Big Ten Championships in 1992, the club also looks to scoring as a key to this season's success. "We're looking for scorers," Powers said. "Last season we held teams to low scores a lot, but couldn't connect on the offensive end."

Along with Powers and Williams, the team will also rely on defensive captain Kevin Powers, Keith's twin brother, as well as midfield captain Reggie Herde. Both Powers and Herde are seniors. Junior Doug Hart will also play an important role for the team as the attack captain.

According to Williams, another
important element for the team is their goalie. "A big part of whether or not we're successful is goalie Jim Lemke. Our defense must give him a lot of help, and we've got to shut down as many high powered offenses as we can."

As far as the team outlook, most every

team member is optimistic. "We have a shot at the Big Ten Championship," Keith Powers said. "Hopefully we can bring it all together."

If everything comes together, it will be gathered as an impressive accomplishment. "Most of us picked up lacrosse after our freshman year," Keith Powers said. "If we played at a school with National Collegiate Athletic Association (NCAA) teams and recruiting, we wouldn't ever get to play. We just try to have fun."
"I think we have a positive outlook," Williams said. "We have a pretty good chance of winning the Big Ten."

th the ball in his possession, an Illinois player eludes the Illinois State defense. Each team has 10 players on the field including the goalie.

## Cafeteria under the stadium

spot in Memorial Stadium that few people are aware of is the Varsity Room. While not really being just one room, the area itself serves many purposes.

Located on the Southeast corner of the stadium, the Varsity Room mainly serves as the athletics cafeteria. Inseason, student-athletes from the football, volleyball, and both the men's and women's basketball teams eat dinners there at 6:30 each night. During pre-season workouts, football players eat all three of their meals there so their food intake can be carefully monitored.

As well as being a cafeteria, the Varsity Room serves as a press conference center for head football coach Lou Tepper and his staff on Monday's after games and there is a room where trophies are on display from all sports. Press luncheons also take place in the Varsity Room.

While not appearing as an ordinary cafeteria, the Varsity Room is furnished with wooden tables and chairs. Also furnished is a big-screen television with couches and chairs.

But, of course, the main reason the players go to the Varsity Room is to eat! According to Pat Malloch, the Head Cook, a lot of food is made for the football team. On an average, for a main course, her cooks can prepare over 120 steaks for the team. For sloppy joes, Malloch uses 70 pounds of ground beef. According to Food Director Barb Ward, over 100 scholarship players and coaches go through at least 15 gallons of milk a night. Two entrees, along with a salad and fruit bar are prepared each night, as well. "Of course we sometimes make what the kids like," Ward said. "They want to eat what kids eat."

Top quality food is prepared for the teams as well. According to junior offensive lineman Jon Kerr, "The food is pretty good. The coaches say it's one of the best training tables around. When we win a big game we usually get fed better than usual. Sometimes we get to eat lobster or shrimp after those games."
"I buy all top quality products," Ward said. "I'm not out to make a profit. My purpose is to give them the best food."

All this talk of good food makes me want to join the team! It seems they eat better than anyone on campus. Even with good food, the Varsity Room is fun to be in, too. "It's fun to eat with the team every night," Kerr said. "We have a good time, and it builds team commaraderie."

As interesting as it may seem, unfortunately, the Varsity Room is one campus site that most people won't ever see unless they are an athlete.

## Super Seniars

 RETURNEntering the 1992 men's cross country season, Head Coach Gary Weineke will be looking at three key individuals to lead the teamto be near the top of the Big Ten.
"The key runners for our team will be Jason West and Scott Maddux. They are both fifth year seniors and I believe that they must take the leadership role for their team upon themselves. Also, I will be looking for Dan Nolan to return to his form as a freshman. We really need him to rebound from his sophomore season," Coach Weineke said.

The cross country team has already begun its 1992 campaign. They were triumphant in the Bradley Invitational. This meet was scored in all dual meets so the squad's record actually stands at 110 . The team then traveled to Southern Illinois-Carbondale after which they hosted the Illinois Invitational on September 26. After a one-week layoff, the team traveled to Bloomington, Ind., for the Indiana Invitational. Following that, the team had only three weeks to prepare for the Big Ten Championships, held in Savoy on October 31. After all of this, the individual members who qualified through the Big Tens traveled to the District IV Championships and the NCAAs.

Maddux believes that the cross country team can be competitive throughout the entire season. "Wisconsin has all of thier runners returning for them so they will definitely be the favorite in the Big Ten. Michigan will also be very tough competition, but after that, the conference standings are pretty much wide open. We are shooting for third place or higher in the conference and to perform well in the Big Ten

Championships and the District IV meet. We really feel that we can be competitive in these meets."

The team has come around really well, but people are not expecting them to accomplish much in the conference, according to West. Yet, he believes that

they are going to suprise some people and he is confident that the team can have a successful season.

Basically, Coach Weineke has some general goals for his team. "Sure we want to go to nationals and win the Big Ten, but more importantly, we want to try and do everything well, at every meet. We figure if we can do this and pay attention to the little things, we will be right where we want to be come time for the Big Ten Championships and Nationals."

## Veterans Guide The

When a team returns a strong nucleus of people from a competitive team, they become the leaders of the squad for the coming season as both examples and teammates. Head Women's Cross Country Coach Marybeth Spencer Dyson is relying on her strong nucleus of returners to do just this.
"We are returning several top runners from last year's team. Laura Simmering, Amy Tomlinson and Wendy Welch were all letter winners last year so I'm expecting them to be our team leaders. Laura was an All-American in the 3000 meter run during the spring, and Amy and Wendy were our second and third runners respectively for 1991. Basically, I expect these girls to have a big year," Spencer Dyson said.

One of Spencer Dyson's goal for the squad is for them to break into the first division of the Big Ten. During 1991, the team finished fifth at the District IV Championships and Spencer Dyson hopes that they can break into the top four in
1992. Another goal Spencer Dyson wants to achieve is to have as many runners as possible qualify for the National Championships.

| 7th | Big Tens |
| 11th | District IV |
|  |  |

Welch also expects the cross country team to have a successful season. "I feel we should be extremely competitive. We are returning almost everyone from last year's team, and all of our runners are healthy. We should be one of the best teams in the Big Ten," Welch said.

The team should be in the thick of things
throughout the season. They feel that if they are ever going to be competitive, it will be this year because they are graduating three of their top five runners. The 1992 season is their chance to have a really successful team, according to Tomlinson.

The squad began their season on a high note. They finished second out of sixteen teams at the Purdue Triangular. This put them well on their way to achieving their goals.

Spencer Dyson believes that the Big Ten Championships and the NCAA District IV meet are the team's two most important meets. "Right now, we are not running all of our best runners because we are simply trying to find the best mix of girls for the big races. We are not yet concerned with how the team finishes as much as we are with team progression. The team is just trying to get ready for the Big Ten Championships in October and the NCAA District Meet in November. These are the most critical meets for us," Spencer Dyson said.

## x <br>

olding a steady pace, freshman Kim Stewart competes at the Illinois Classic in Savoy. The team usually competes on Saturday mornings.

- Ellen Knight

Junior Wendy Madsen and senior Wendy Welch talk after a rainy day of competition. Both Madsen and Welch also run on the track team.

Agroup of Illini runners wait for the starting gun at Savoy. Many Illinois teams competed that day, including Southern, Eastern and Illinois State.

## Consistency On A Young

For Gary Wieneke, head men's track coach, day by day improvement in each individual's event will make the track team successful.
"Basically, the players will be looking to improve on individual events. We want to just get better day by day and continue to improve as a team. We feel if we can do this, we can move up in the Big Ten standings and at the National level. We are a young team so the team members and the coaches are looking for steady improvement in the individual events," Wieneke said.

Overall, the team returns several key players from the 1992 squad. They include seniors Matt Berry and Steven Bridges, junior Earl Jenkins, sophomores Anthony Jones and Marko Koers, and seniors Scott Maddux and Jason West. Berry is a high jumper. Bridges pole vaults. Jenkins, who runs the quarter mile event, finished third in the 1992 Big Ten Championships. Jones, who competes in the short sprints, finished as high as second in the Big Ten last year. Koers is a middle distance runner and he was a qualifier for nationals in 1992. Maddux and West, both crossovers from the cross country team, will bolster the long distance running events. Maddux runs the 5,000 and 10,000 meter races while West
competes in the 1500 meter race. Coach Wieneke sees these individuals as the team leaders.

Jenkins has setsome respectablegoals for the team. "We are trying to accomplish certain things at a certain rate. We want to take one day at a time and improve each day.

Of course, we want to win the Big Ten Championships, too, but right now, we art focusing on improving as a team."

The field events will be where most of the team's strength is going to be concentrated The team has many young members mixed with a variety of experienced veterans Everyone is looking to this mix to benefit the team in the tough field events that play such an important role in team scoring, according to Wieneke.

In the Big Ten conference, Coach Wieneke believes that there is only one favorite to win it all. "Ohio State won the Big Ten las year, and they are going to be solid agair during 1993. Indiana has lost some of its strength from 1992, so the rest of the conference race will be pretty wide open, since everyont will be chasing Ohio State for the Big Ter title."

Bridges possesses a positive outlook for the track team and their success in the Big Ten. "We are a young team with a nice blenc of veterans. We will be chasing Ohio State and Indiana, and I definitely feel we wil finish in the top three of the conference. Whi knows, if everything goes our way in th individual events, we could win the Big Teı outright!"

## M T TRACK

## Stary by Garen Vartanian - Layout by Raleigh Bennett

M Paul Talbot runs the distance. Many of the cross country team members also run the long distance events in track.

D uring the steeplechase event, junior Mark Dickison jumps over the hurdle. The team has their home meets in the Armory during the winter and at the lllinois track during the spring.

## Aiming far a REPEAT

One of the finest teams on campus is the women's track team. In 1991-92, the team won both the outdoor and indoor Big Ten Championships. Two members of the team were selected to be AllAmericans as well. Senior Tonja Buford received this national accolade as a hurdler, sprinter, and member of the relay team. Buford also spent part of her summer in Barcelona, Spain participating as a member of the United States Olympic hurdling team. Senior Laura Simmering received the honor as a long distance runner.

Looking at the 1992-1993 season, head coach Gary Winckler expects a repeat performance. "We really have a stronger team than we had last year based on our recruiting class," Winckler said. "We have only lost two seniors, and we are gaining more than we've lost."
"We have many of our top scorers returning, and we need to perform the same way," Simmering said. "Our future looks really good. We have some top sprinting recruits, too."

According to junior sprinter Katherine Williams, the team is going to need to keep doing the same things. They must work as a team and have everybody put forth their best efforts in order to succeed.
"We have a really great team and we have great enthusiasm. We do need more people in nationals, though," Buford said.

One of the greatest contributions that Buford brings to the team is the international experience that she gained during the summer of 1992 when she participated in the Olympic Games in Barcelona, Spain. "Running on a world level and seeing everything I did was a
great experience. Now I am a lot more relaxed while I run on the track because I have run against everybody in the world," Buford said.

As for an outlook on the season, the team consensus is good. "Wisconsin,

Penn State, and Indiana will be tough contenders in the Big Ten, but we'll be contenders both indoor and out, too," Winkler said.

The team has a very good chance to repeat their championship performance during the spring, according to Simmering.

Williams agreed with Simmering when she described the season and her sttitude. "I've got a positive outlook. I'm looking forward to the season because it's going to be a great one. One of our main goals, howver, is to accomplish more on a national level."

WITRTACK

## 

senior Wendy Welch stretches with the help of head trainer Kathy Jobe Welch runs both the 5 K and 10 K races during the season.

Senior Scott Turner receives the baton from a fellow track team member. Turner also plays on the $U$ of I football team.

Tagging out a Northwestern opponent at first base, junior baseball player Forry Wells makes the play. Wells also is the punter for the football team.

## The Best of Two Worlds

 of the football players could be two-sport athletes, but they don't because they would have a difficult time managing their time. Overall, though, it is a great feeling knowing that I can not only compete in two sports, but also manage my academics," Wells said.

When asked what his favorite sport was, Wells said, "I have played baseball a lot longer so it has an obvious edge I do love football, but I am overall more involved with the baseball games. As a punter, I am only involved in four or five plays a game, with baseball, I am integrated more into the game. In general, baseball is more physically demanding for me. I definitely receive more bumps and bruises from baseball than I do from football."

Simmering, who competes in track and cross country, finds herself training all year round. She does not mind, however, because running is her love. "I am lucky because one sport helps the other, so I do train all year long. It is a continual process as I train from 3 p.m. -5 p.m. everyday, take two weeks off after track season is over and then train the rest of the summer for the upcoming cross country season. It is not too hard to manage both sports because I really enjoy to run, which makes the job easier."

Competing in two sports does not have ill-effects on Simmering's academics. However, it can get overbearing at times and it would be nice to forget about cross country and track and just have to worry about studying. As a two-sport athlete, she has learned to get her work done ahead of time, and she does not believe in procrastination.

Much like Wells, there is no doubt in Simmering's mind which sport takes center stage. "Track is my favorite sport. I get to run shorter distances because in cross country I ran mostly up and down hills. I usually ran the 5000 m . On the other hand, I run the 800 m and 1000 m in track, which is a really big difference from cross country. I really do feel fortunate to be participating in both sports. It gives me a chance to the use the facilities that the school has to offer and I keep myself in shape all year round for each sport."

Greek organizations are some of the predominant systems at the U of I. With over 75 houses, U of I has one of the largest systems in the US. Over the past century, the system has evolved slowly from year to year creating gradual changes.

Keeping with this, 1992-1993 was not any different.
There was tension between The Daily Illini (DI) and the Greek system because of the negative publicity by the newspaper. The InterFraternity and Panhellenic Councils encouraged a system wide boycott of advertising in the DI. This was effective as the $D I$, after discussion with the Greek representatives, established the position of Greek Affairs reporter to encourage better relations. As a result, the boycott was lifted. There was also talk about shortening sorority pledgeship to four weeks instead of a semester. However, this brought about some concern, though, that the shortened length would not allow a woman sufficient time to get to know her sisters or to decide if being in a sorority was the correct decision for her.

Fraternities also experienced a change in their rush system. Instead of having formal rush during both semesters, houses are allowed only formal rush in the fall. They can, however, participate in informal rush throughout the year. Alpha Kappa Alpha, a Black sorority, also returned to campus after a three year hiatus, adding to the many aspects of Greek
life that has made this year slightly different.

## r.r. gonzales, managing editor

Singing to the theme from "The Love Boat," Sue Zabloudil, junior in LAS, and Lorine Dickson, unior in Education, perform during the beginning of sorority rush at Foellinger Auditorium. Different women from each of the houses on campus performed in the skit.

- Delta Chi continues their dominance in intramural sports by winning softball (12") and
football championships in frat blue.
- We also boast considerable improvement in academics with an increase in all men's fraternity average.
- Delta Chi has a solid social calendar with the continual success of two annual parties: Block Party and Octoberfest.
- In addition to four exchanges, we also have Football Block and our annual semi-formal, Fireside.
- Delta Chi also actively participates in community service programs including canned food drives and involvement in the Boys' and Girls' Club.

- Each fall Phi Psi's host a 5-on-5 basketball tournament for Muscular Dystrophy. In Spring, the Phi Kappa Psi-Alpha ChiOmega.Mom's Day5K Run hasbecome a popularevent which benefits the Matthews House.
- Athletics is also strong with our 12" softball and frat blue football teams both finishing third in 1992.
- Our social calendar lacks nothing and our afterhours always have quality local and Chicago-based bands. Phi Psi's also boast the most well-known and prestigious party on campus, Penthouse, in the spring.
- The art computer room and the C.F. "Dab" Williams Scholarship also allows us to excel academically.

- In March, Sigma Omicron of Kappa Delta celebrated her 70th year as a chapter at the $U$ of I. To help us celebrate, we held a benefit dinner/dance at the Illini Union for collegiate members and alumni in the area. The proceeds went to help our philanthropy.
- Each St. Patrick's Day, Kappa Deltas participate in our national philanthropy, Shamrock Project. At the U of I, we planned a canshake, run/walk-a-thon and the Shamrock Ball, all benefiting the National Committee for the Prevention of Child Abuse and the Champaign County Crisis Nursery.
- Kappa Deltasstart off every year with abang at a sisterhood party given by the seniors called Psych-Up. Other social functions include: exchanges, Masquerade Ball, Christmas Formal, set-up and many others.

- Pi Lams philanthropy event was the first annual Super Sloppy Double Dare Tournament, which raised over $\$ 500$ for the American Cancer Society.
- Pi Lams has an extensive social calendar with numerous exchanges and dances, along with the annual Wild Thing party with 25 tons of sand on the front lawn, hot tubs and beach volleyball.
- Being among the top fraternities and sororities in GPA, has become a Pi Lam tradition.

- Pi Lams are the $12^{\prime \prime}$ and $16^{\prime \prime}$ softball intramural champs, while both basketball and broomball teams were finalists.
- The most important part of Pi Lams is Brotherhood. Our motto is "Not four years, but a lifetime."

Cook, Peter Frankel, Steve Berger, Al Blonz, Jeff Gilfand, Josh Abrams, Kerric Tratt, Greg Cohen, Jon Alt, Josh Yulish, Marc Slutsky, Jason Kramer, Dave Walter, Jason Torf, Stefan Kalina, Marc Rosen; Third Row: Vadim Riber, Dan Scherr, Craig Grabiner, Brian Dunn, Matt Fishman, Steve Brown, Brian Hanover, Jon Dunn, Brian Silverstein, Josh Laff; Fourth Row: Matt Meliker, Dan Saban, Brandon Ruebens, Bil Orkin, Al Groner, Jason Flax, Ryan Engel, Ron Cohen, Dave Bluestone, Jeff Agrest, Larry Adler.

- Since 1881, the Kappa Kappa chapter of Sigma Chi has carried the tradition of excellence with pride.
- Our accomplishments span every aspect of the university life-from student government to academic excellence to competitive athletics. Sigma Chi in 1992-93 ranked among the best fraternities on campus. Our athletic teams captured the intramural soccer championship and flag football championship. We ranked among the top 15 in academic standing out of 55 fraternities.
- Our annual philanthropy, Derby Days, is the largest charitable project on campus. We donated over $\$ 4500$ to the Children's Miracle Network in 1992.
- The most important aspects of our fraternity life were the friendships formed here at Sigma Chi-which proved to be most memorable and gave lasting impressions in our hearts and minds.

Seniors: First Row: Heather Rosing, Jen Hibbard, Jen Bishop, Melissa Dorado, Lisi Fore, Hilde Leuter, Alisa Balestri, Trish Piedrahita, Rebecca O'Brien, Virginia Chang; Second Row: Heidi Blunck, Eugenia Chen, Julie Pfaff, Melissa Schmitt, Lynelle Kendle, Kristin Dencs, Angelee Kruger, Becky Johns, Anne O’Donnell, Kathy lane; Third Row: Juliet DeBruin, Stormy Calvert, Julie Hackward, Sara Garman, Angie Hawkinson, Amy Huisinga; Fourth Row: Paige Mathison, Beth Holler.

theta

- Sigma Pi boasts theSGA president and vice president.
- Two members of the IFC executive board areSigma Pis: VP Membership and VP Rush.
- Two of our other members are on the executive board for SAMS, serving as VP of Education and Treasurer.
- Three members of the executive board for Alpha PhiOmega service fraternity are Sigma Pis.
- Sigma Pi reached out to the community by hosting a dinner for the children of Cunningham House in Champaign.

- The Alpha Beta chapter of Theta Xi was founded at the $U$ of I in 1922.
- Each year, Theta Xi teams up with Kappa Kappa Gamma to hold their annual Kidnap-NRansom philanthropy to benefit Habitat for Humanity.
- Every spring, we throwa MardiGras style Hurricane party.
- Theta Xi is also proud to boast that the current Chief Illini, Steve Raquel, is a house member.

Theta Xi: First Row Zach Woith, Scott Lyons, Ken Olsen, Tony Oldani, Pete Dittmars, Jeff McMahon, Second Row Mark Matus, Tim Sand, Jeff Hebreard, Ray Ploski, Dennis Duffy, Ruben Cala, Mike Yakiminsky; Third Row: Eric Mennecke, Mike Porter, Brent Centlivre, Tim Nelson, Scott Burns, Kapil Singh, Drew Johnson, Steve Lee, Paul Lusson, Cesar Alfaro, Andy Bennett, Ian McPheron, Eric Flanders, Art Stutsman, Brent Lux; Fourth Row Brian Jannusch, Mark Olson, Matt Zellar, Dave Parent, Jamie LeBreton, Tom Chippas, Alex VanEekeren, Keith Mayfield, Jay Miller, Mike Osterhoff, Not Pictured George Ayura, Keith Bayer, Rich Bergman, Dave Bien, Chris Boswell, Matt Chapman, Shay Cordes, Rob Emmerson, Scott Fengolio, Lou Flores, Brandon Fox, Chris Frommell, Dave Glover, Mike Graf, Scott Houghton, Brian Hovey, Marvin Jamil, Mike Kaider, Jeremy Lindhal, Ted Litvan, Jeremy Luckett, Jím Mallon, Greg Manning, Steve Mennecke, Mike Midland, Henry Munez, Chris Novoa, Mike Parent, Steve Prassas, Steve Raquel, Greg Rippon, Jason Ross, Tim Rowe, Tím Sand, Chris Syrlegelas, Kyle Walser, George Vassol, Erich Lussnig,

- Sigma Tau Gamma is individuals bonded by brotherhood and committed to excellence in all facets of life.
- Socially, we hold our traditional fall Atlantis party and spring Masquerade Ball.
- Last spring, we placed third in the Atius/Sachem Mom's Day Sing with Pi Beta Phi, making the fraternity the only house in the past decade to have placed four years straight.
- Despite all of this, Sig Taus rank well above average academically, as evidenced by our ranking in the top ten of all fraternities in the 1992 spring semester.
- With great diversity of membership gelled together by brotherhood, Sigma Tau Gamma consistently excels. 00

Sigma Tau Gamma: First Row: Andy Voytke, PeteJin, Mark Denton, Bryce Fuller;Second Row: Brian McGinn,Steve Duberchin, Brian Hedlund Ryan Bassler, Chang Choi, Simon Santiago, Jeremy Heer, Jon Whitfield; Third Row: Ravin Gandhi, Andy Jung, Charles Parsons, Jim Michel, Dan Pawlak, Mike Myung, Doug Calhoun, Pete Geddeis, Rob Kim, Jim Foersom, Matt Farley; Back Row: Roger Chiu, Ken Pearl, Woo Cha, Joe Petry, Brad DuPont, Jeremy Rapp, Andy Flessner, Scott Lee, James Urbaniec, Mike Sudduth, Jon Clopton.

Seniors: First Row:Jeremy Ropp, Andy Flessner, Dan Pawlak, Chang Choi; Back Row: Jon Clopton, Jon Whitfield, Scott Lee, Ken Pearl, Simon Santiago, Jeremy Heer, Steve Duberchin.

Theta Delta Chi: First Row: Mauro Raucci, Chad Anderson;Second Row: Scott Didio, Will Kaczmarek, Ed Othon, Luis Don; Third Row: Drew Gleason, Justin Hotard, Dan Kisiel; Fourth Row: Dan Budzyn, Jeff Roberts; Fifth Row John orier, Steven Jent, Gene Moy; Sixth Row: Adrian Skawski, Tom Gillespie, Jeff Carter, Steve Sautman, Frank Arevalo; jeventh Row: Matt Kucera, John Dudek, Frank Oles, Adelbert Bisonaya, Eric Persson, Matt Kimberley, Luis Nieves.

- We are ranked 13th academically out of 50 fraternities.
- We have a strong national organization centered in Boston, Massachusetts.
- Our unofficial mascot: the bunny Thumper, from Bambi was drawn by Frank Thomas, an alumnus. The banner can be seen outside before every party.
- Dwight D. Follett, Kappa Deuteron alumnus, is the owner of Follett's bookstore.
- We are one of the most diverse houses racially, academically, and socially on this campus

Seniors: Frank Arevalo, Jeff Carter, Luis Don, Steve Sautman, ScottDidio, Eric Persson, Jeff Roberts, Ed Othon Adrian Skawski.

## (T) <br> 

- Theta Chi's vast social program features events like Wai-Ki-Chi, Theta Chi-tastrophe, La Margarita, Kiss Me I'm CHIrish, and Go To Hell.
- Ourathletic schedule is highlighted by interfraternity football, broomball and wiffle ball.
- Wearealloverassociety presidents, UIUCSenatorsand members of other committees.
- Our scholarship program is top-notch, earning usthe National Slivinski Scholarship Award and a GPA higher than the all men's average.
- Our brotherhood is based on pride, strength, and unity.

- Zeta Tau Alpha is the third largestsorority in theU.S. Thereare220national chapters. ZTA wasfoundedat Longwood College in Farmville, Va. on October 15, 1898. The Alpha Kappa Chapter at the U of I was founded in 1921.
- ZTA has a newnational philanthropy--theSusanG.Coleman BreastCancerResearch Fund. ZTA held acampus-widebreast cancer awareness program this fall and plans to sponsor further events to make this campus more aware of breast cancer.
- On October 14,ZTA held a "beauty" contest,Sweetest of the Sweethearts, among participating sorority houses sweethearts. All proceeds were donated to the Association for Retarded Citizens. ZTA also participates in Order of Omega Cleanup.
- ZTA is also very involved in intramurals and University clubs and organizations. Zetas are involved in almost every organization on campus-from Panhellenic Council to Pre-Law Club to Marching Illini.
- Academics are very important to Zetas. ZTA received the Most Improved GPA from the Mom's Association in Fall 1992. Each semester the chapter has a scholarship banquet to recognize outstanding grades. Sisterhood is the most important aspect ofZeta Tau Alpha. Each memberstrives to makeclose-knit group offriends evencloser-assisters. Besides thenumeroussocial events throughout the year, Zetas have sisterhood activities every week and retreats every semester.

## Organizations

A great deal of conflict has occurred in the world recently concerning many multicultural organizations. The Rodney King beating, the "ethnic cleansing" of Somalia and Bosnia, and the Los Angeles riots are just a few of the things that have sparked various groups on campus to make their groups' focus just slightly different.

The students at La Casa Cultura Latina held a "Taste of Mexico" fest where all students were welcome to experience different aspects of Latin American culture and history. To exemplify black pride and culturalism on campus Peppa's, a poetry set for original work, and BOSS, a black woman's unity group, implemented new areas and organizations for students to
join.
Other organizations like the Residence Hall Association and the Asian American Association have worked to bring unity into students' lives through programs and activities. "Know Your Heritage" was sponsored by different organizations for students to learn about and test themselves on what they know about their own and others culture. Each of these programs has been presented with a slightly different twist from years past and has enriched the lives of those involved. For many students joining an organization on campus has taught them about others and how to change their world "by any means necessary."

## tina jordan, multicultural editor

At Quad Day a member of the service raternity, Alpha Phi Omega gives out flyers o passersby. Many different organizations ot together to inform students about their rganization on Quad Day, which was

## The Daily Illini

- The Daily Illini is a 121 year old independent student newspaper at the University of Illinois.
- The Daily Illini's editorial staff is completely staffed and run by a diverse group of University of lllinois students.
- The newspaper covers everything of importance to the University of Illinois community from entertainment to administration to student information.
- The Daily Illini has won the Associated Press General Excellence award for the last two years. It competed against all the newspapers in the state with circulation under 20,000 for this award .
- The Daily Illini is nationally recognized as a top-notch college newspaper.

## Student Government Association

- Since 1980, the Student Government Association (SGA) has been formally recognized by the University Administration and faculty as the official voice of the students.
- We offer a blend of services, projects and representation for all U of I students.
- SGA gives students the opportunity to affect University policies and rules which govern their college life.
- A two dollar fee, collected yearly, funds SGA's numerous projects and services.
- We encourage any and all students to get involved, make a difference. There is something for everyone in SGA.

Knuffman, Traci Guinee, Pamela Vincent, Scott Farris, Jerry Casper; Fourth Row: Todd Surinak, Dan Egeland, Kevin An, Melanie Hoday, Don Keen, Pablo Perez; Fifth Row: Tim Marriott, Greg Choate, Ganesh Reddy, Jennifer Gravley, Elena Van Meter; Sixth Row: Miron Hirsch, Sunil Raichand, Emmerson Que, Denise Oariseau, Rhonda Cooke, Jacob Baltz; Seventh Row: Jean Alexandre, Michael Smith, Richard Sun, Debbie Yelich, Maddie Ramos, Craig Krauss; Eighth Row: Andrea Weber, Mike Persans, Karen Zumpano, Michael Podemski, Jaclyn Zahn; Ninth Row: Donald Moon, Annissa Aguilar, Melissa Arnett, Amy Coley, Jorge Colin, Dan Robb; Tenth Row: Elisa Gallo, Manisha Patel, Sharad Savalia; Eleventh Row: John Annes, Andy Lehman, Mike Ladd.

## Illini Hockey Club

- The club was founded in 1957.
- This is the first year the team has accepted their bid to the National competition in the past five years.
- The club is the only team in the league to play every other team at least four times.
- The season last four months from Oct. to March.

348 Illini Hockey Club

## Illinois Women's Soccer

- We won the All-Midwest Collegiate Soccer Tournament in Colombus, Ohio.
- We went to the National Collegiate Club Soccer Tournament in Austin, Texas: placed third, losing to the eventual champions in the semi-finals.
- We had a club record of 21 wins in the 1992-93 season.
- During the Nationals, we allowed the fewest goals, three, to be scored by any team, both men and women.
- We had a balanced player scoring: 12 members scored four or more goals.

Illini Women's Soccer Club. First Row. Krista Pyle, Fenna Bonnsignore, Renee Spirek, Laura Nawroski, Linda Seiler Jen Alekovich, Jennifer Bates, Connie Voellinger, Megan Kelly, Molly Conneen, Second Row. Alyson Stevens, Jayne Hackbart, Mindy Simmons, Dana Ehlenfeldt, Courtney Carpenter, Tracy Chamberlain, Lisa Hackbart, Sheri Kosmos Leila Ghanbari, Becky Thompson, Kim DuPois.

## Industrial Distribution Student Association

- IDSA is open to all Industrial DistributionManagementmajors.
- IDSA takes fieldtrips throughout the midwest to tour manufacturing plants and distribution facilities.
- IDSA brings in speakers to discuss current topics of interest in their field.
- IDSA provides opportunity to socialize with students of similar career and academic interests.

Industrial Distribution Student Association First Row. Tracie Aincham, Mavis Cargo, Margaret Zeigler, Barbare Campbell, Jerome Lee, Joanne Witter, Kristen Nelson, Second Row: Sonja Peterson, Jeri Lynn Higgins, John Pulford Drew Wilson, Third Row: Williạm Luthy, Eric Plummer, Mark Allin, Ted Ohr, Kari Hornick, Michael Ruth, Tony Yaniz

## Illinois Mens Glee Club

## Irish Illini

- Irish Illini is a social organization emphasizing a festive atmosphere.
- We have regularly scheduled parties, road trips and charity fund raisers.
- While it is not a requirement to be Irish, the activities of the group focus on a social Irish lifestyle.
- Officers include; President Julie Shepard; Treasurer, Margie Burke; Internal Membership, Kim May; Philanthropy, Daniel Keenan; Public Relations, Tim Keenan; Social Comittee,Tom McFarland and Jay Rients.

## Engineering Council

Engineering Information Bureau First Row: Krístín Polivka, Jim Brain, Eric Hiller, Joe Gross, Colleen Milovic; Second Row: Tím Rush, Bridget Coughlin, Elízabeth Osborne, Nancy Erler, Kristie Kramer, Tucker Herbold

- Engineering Council is a student organi zation which serves the students of the College of Engineering by sponsoring activities and representing students in academic and administrative affairs.
- The council consists of 13 executive of ficers and two representatives from each professional society and one representative from each honor society
- EC discusses new ideas and problems with the deans through the Dean's Student Advisory Committee.
- EC also sponsors many activities for the engineering societies: Conference, the Leadership Conference and various social events

Engíneeríng Council Executive Commítee: Fírst Row: Jud Kenney, Melissa Dorado, Binal Patel, Bec Johns, Monte Ellis; Second Row: Dave Ahmari, Shawn Thomas, Michael Louden, Sandy Mitofsk Monica Heckert, Eríc Foster, Eric Hiller, Ralph Dímenna

gineering Open House: First Row: Colleen Milovic, Michele Ensor, Dave Ahmari, cky Silver, Kristin Polivka; Second Row: Scott Covey, Victoria Vlasak, Peter Ko, -istin Elliott, Jason Jilcox, Margaret Matthew, Barak Tombuloglu, Jigar Jhah.

gineering Freshman Committee: First Row: Andy Ritz, Nicole Williams, Emanuele cciola, Tammy Mushrush, Maghan Sullivan; Second Row: Eric Peng, Ashvin Babu, avid Shaw, Kevin Scull,Steve Geissler, Josh Adams, Peter Chou, Thomas Smith, Chris rian.

EXPO: First Row: Scott Covey, Ken Deters, Vince Pesch;Second Row:
Vinay Agrawal, Joan Burgess, Monte Ellis, Michael Louden.

Student Introduction to Engineering: First Row: Jacqueline Harmon, Eric Foster, Kristin Breading; Second Row: Jon Burgston, Thor Olberg.

## Koinonia Christian Co-op

- Koinonia Christian Cooperative celebrated its 40th anniversary in the fall of 1992.
- Koinonia means Fellowship in Greek, and we are a very close knit group of guys.
- We help each other grow in a relationship with Christ.
- We host and participate in many social and athletic events.
- All cooking and house details are done cooperatively.

Koinonia Christian Cooperative: First Row: Jim Zlogar, Matt Manley, Dave Eastvold, Erik Sear, Tom Konstanty, Jaso Humphrey;Second Row: Andrew Mouw, Dave Rounds, Mike VandenBurg, Randel Davis, Dave Atkins, Byron O'Del Jeff Will, Brooks Shull, Dave Westergaard; Third Row: Steve Jones, Chad Munz, Andy Weaver, Mike Drew, Ma Lossau, Dennis Sell, Rich Archer, Curt Holderfield, Steve Bachar Jr., Todd Szalla.

## Jewish Student Union Executive Board

- JSU is an umbrella organization for 10 registered student organizations.
- JSU is a pluralistic outlook for everyone.
- JSU is representative of over 2,500 students on campus.
- JSU hosts a BBQ, a finals party, a coffeehouse, a New Student Night, community forums, educationals and speakers.
- JSU is a source for social, cultural, political and religious expression here at the University.

Jewish Student Union Executive Board: First Row: Tami Yaker; Second Row: Robyn Newman, Inna Fialco, Adam Crane.

## Korean Undergraduate Student Association

orean Undergraduate Student Association: First Row: Rebecca Chae, Margarette Kim, Samantha Pak, Caroline Chweh, Hyeon Jong Kwon; Second Row: Sae Kwon Chang, Young Min Yoo, Young Bin Im, David Chang, Daniel Sungin Kim, Andrew Ma, Robert Kang, Jaewoo Kim.

- Founded on December 20, 1979, our organization is the largest Korean student organization in the Midwest.
- Each semester, KUSA sponsors a number of athletic, social and academic activities.
- The primary goal is to promote and cultivate awareness for Korean arts and culture.
- Since 1991, KUSA includes traditional Korean Fan Dance lessons for its female members. This talented association of fan dancers performs several times throughout the school year on campus and in Chicago.
- Among the Korean-American lllini, one of the greatest challenges is to help new foreign exchange students overcome the language barrier and become accustomed to American culture, while preserving the native heritage among second generation students.

## Krannert Center Student Association

Krannert Center Student Association: First Row: Pamela Nicoski, Kristin Lindgren, Donelle Bires, Sharon Liu, Patty Lyman; Second Row: Theresa Handwerk, Trey McDowell, Kevin Lovelette, Michael M. Peter, Audra Masten; Third Row: YuTing Poon, Jessica Goldbogan, Carl Potter, Sivan Ritz, Lucy Fong.

- KCSA is one of the largest student organizations on campus. Students from all majors volunteer at the Krannert Center. KCSA is composed of three main departments and publishes its own newsletter, Callboard.
- Students give tours of the Center on a regular basis, special tours can be arranged by appointment. Visitors from all over the community and the world come to the Center, and a tour is one of the best ways to become acquainted with Krannert.
- Students lend assistance to the stage managers by hanging and focusing lights or being on sound, costume, scene or prop crews. This 'behind the scenes' job gives on a unique perspective on the performing arts.
- Students who usher, the largest part of KCSA, assist the patrons during the performances to help keep the 'front of house' situation running smoothly. Ushers are trained to handle any emergencies that may arise, as well as present a cheery smile and a performance program.

## Lambda Pi Eta

- This year nearly 100 students qualified for membership in Lambda Pi Eta, a speech communication honorary.
- The purpose of Lambda Pi Eta is to recognize outstanding achievement among speech communication majors.
- We try to promote professional development among speech communication majors.
- We want to provide an opportunity to discuss and exchange ideas in the field of speech communication.
- We try to establish and maintain closer relationships and mutual understanding between faculty and students and to explore options for further graduate education.

Lambda Pi Eta: First Row: Amy L. Igolka, Elizabeth A. Simmons, Nancy A. Paez, Karan M Giliberto, Linda B. Yin, Cheryl A. Warzynski, Lainie C. Crisostomo, Michele L. Bath; Second Row: Julie R. Dressen, Elaine M. Lecinski, ReneeJ. DeFrates, Lorie A.Jung, Amanda E. Esposito Becky J. Bixby, Angela R. Flenoy, Stacia M. Thomas, Colette A. Copper; Third Row: Deborah A. Mikulina, Katie M. Humpal, Chris M. Hemrick, Kelly T. Fujiyoshi, Aaron M. Gothelf, Cindic M. Polz; Fourth Row: Martin W. Egan, Michael R. Freudenthal, Joseph F. Vitu, Jeff S. Kurtz. Ellen R. Jasper, James R. Field.

## Ma-Wan-Da

- We are a senior honor society who recognizes students who have given their time, service and most of all, their dedicated leadership to contribute to the continual excellence of the University of Illinois.
- Each class engages in one service project. Initially, efforts are directed toward becoming acquainted and events continue to build positive relationships among senior leaders.
- Requirements for application include junior standing, demonstration of service to the University and the surrounding community, scholastic achievement and outstanding leadership.

Ma-Wan-Da: First Row: Anna Hui, Maria Tiongco, Betsy Dirksen, Rachel Roberts, Susan Bull, Angela Flenoy, Pam Spencer, Denise Szuck, Raleigh Bennett, Anna Ogena;Second Row: Alisa Balestri, Amy Wagahoff, Sarah Min, Mark Weinberg, Laura Becker, Kristin Vitek, Rosalind Lee, Kerric Tratt, Carrie Hamilton; Third Row: Andrea Smith Michael Peter, John Bagwell, Aileen Wright, Robert Ryan, Bob Bartell, Glen Buric, Ellen Jasper, Eric Foster, Rachel Rumple, Paul Sorkin, Evan Glazer, John Schleiter.

## LAS Council

SCouncil: First Row: Jennifer A. Toy, Michelle A. Swanson, Lori Lepp, Denise M. Dallmier, Shawn Marie lak, Sara Lomasz, Amy Klockenga; Second Row: Susan Eads, Daniel Menees, Barb Andersen, Kerri hultz, Andy Akan, Jill Dennor, Jennifer Pagnucci, Jennifer Pierhal; Third Row: Nunila Lara, Gordon chanan, Vlad Palma, Heather Peters, Nina Arora, Josh Nathan, Jennie Siebert, Charles Parsons, William chanan, Vlad Palma
ssler, Marty Turek.

- LAS Council is a group of motivated students enrolled from all disciplines in the College of Liberal Arts and Sciences, interested in helping the student body at large.
- The council's two main goals are to further interest and support for Liberal Arts and Sciences, and to promote communication between students, faculty and alumni.
- LASCouncil committees provide peer advising during advance enrollment and on-campus registration periods, organize student input and select the two departmental advising award recipients, conduct fundraisers, improve LAS publicity and work towards a specific project for the LAS Council.

## Metallurgical Society

[^0]- MS has been serving Metallurgy students as a liason to the faculty, other societies and the professional world for over 50 years.
- We organize events for both the students and faculty of the Material Science and Engineering department, including plant trips, speakers, our annual pig roast and much more.
- MS is a point of pride, information and identity for Metallurgy students.
- MS is a student chapter of ASM International.
- MS is a student chapter of TMS International.

## Mortar Board

- Mortar Board is a Co-ed National Senior Honorary founded in 1918.
- Selection is based on excellence in academics, leadership and service.
- The original chapter was an all women's honor society founded in 1900 called Phi Delta Psi.
- History states that in the early years, the identity of the women was kept in strict secrecy. In the old Illio pictures, identity was concealed by placing a sheet over their heads, wearing straw hats or oriental scarves in front of their faces. Supposedly, people used to place bets as to what that year's disguise would be.
- An old tradition in Mortar Board is an initiation process called "tapping," in which the old members capture the new members and they are made to perform a University song or some other type of public recognition. We still perform this tradition 93 years later.

Mortar Board: First Row: Stephanie French, Cecilia Rettig, Becky Johns; Second Row: Megan Goldish, Jennifer Klein Adlon Jorgensen.

## Pre-Law Club

- The Pre-Law Club is an organization offering guidance and knowledge to all interested students and future attorneys.
- It holds monthly meetings with guest speakers from various legally related fields.
- The Club is a valuable source of information about getting into Law School and how to get a job after Law School.
- It offers many opportunities, including practice LSAT's, Mock Trial Competition, and accessibility to the stacks.
- We strive to aid any individual with an interest in Law School, in both an administrative and social atmosphere.

Pre-Law Club: First Row: Dorie Langer, Wendy Giever, Gaela Gehring, Karan Giliberto; Second Row: Scott Clark Michelle Duffield, Denise Drummer, Marty Egan, Tony Ulm.

## The Other Guys

The group has been an acappella tradition since 1969.
It consists of eight men who arrange their own music, choreograph their own performances, and do all their own stunts.
The Other Guys have traveled throughout the United States and Europe, serving as amassadors for the University of Illinois.
The group's performances are a fascinating combination of high quality singing and lighthearted comedy.
They are "preferred three to one over the leading brand."

e Other Guys: First Row: Paul Grube, Scott Císcon, Brian Easter, Bill Corrough, Darren Hicks; Second Row: David Reeder, Dave Konsoer, Glen Schuster.

## Torch Activities and Academic Honorary Society

- Torch is an University of Illinois activities and academic honorary
- Torch currently has 28 members.
- Torch aims to be an active honorary, focusing it's energy in service and philanthropy

Torch: First Row: Soile Oikkonen, Lorie Jung, Amy Linton, Theresa Robbins, Matt Ivaliotes, Sara Nelson; Second Row: Jennifer Pow, Traci Tall, Becky Silver Scott Welsh, Kevin Drucker, Aimee Kirsch, Dori Langer.

## Presby House

resby House: First Row: Julia Milner, Sheila Wenger, Lana Chambers, Tabetha Ahrends, Amy Chou, Mindy Koch, Laura Dunn; Second Row: Kristel Holzhauer, Leigh Jenkins, Sarah Schneider, Jawn Strunk, Brenda Jordan; Third Row: Michelle Sulgit, Carrie Scott, Shawn Hembrough, Angie Baranzelli, Shani File, Becca Ross; Fourth Row: Stacey Latch, Jeena Tharp, Samantha ichoeffel, Dawn Wunderle, Tina Gonzalez, Kim Koehler, Sarah Keefhauver; Fifth Row: Amy 3eck, Jill Eberle, Rachael Wamsley, Lisa Eberle, Sara McNamara, Kristi Dellheimer, Stacy Nhitman; Sixth Row: Amy Rothrock, Dana Renken, Heather Denton, Heather Hiler, Dana Mueller, Angie Brix, Anaise Kuhn, Alice Berger.

## Psi Chi

- Presby House is affiliated with McKinley Presbyterian Church, but women can be of any religion when living there.
- Presby is the home for 42 women.
- Presby has exchanges with other houses to meet new people from both similar and different backgrounds.
- The women work together in fundraisers for the Houses's redecoration project, which is well underway, and volunteer for telethons that have been raising money for newly-constructed fire escapes.
- The Presby women have also volunteered to help raise money for the American Red Cross National Disaster Fund and have sponsored blood drives with other houses.

si Chi: Front Row: Mark Rouleau, Heather Risser, Gina Lullo, Manny Chen; Second Row: Lisa 3rockhaus, Sheryl Gore, Karen Kramer, Kristine Prater, Kristy Stermel, Natalie Kizior.
- Psi Chi is the national psychology honorary and U.P.A is the Undergraduate Psychology Association.
- Psi Chi provides a sense of support among Psychology students.
- Psi Chi encourages mutual support between faculty and students.
- Psi Chi gives helpful information about Psychology classes graduate schools and careers.
- Psi Chia also has active participation in campus activities.

## Shi-Ai

- Shi-Ai is a Greek women's sophomore honorary formed to enhance and promote intersorority unity on campus.
- Originally known as Yo Ma, Shi-Ai first appeared on the University of Illinois campus in the fall of 1907
- Yo Ma served as one of the first organized clubs to enhance relations among campus women.
- Shi-Ai traditionally dines every other week at different sorority houses, learning the traditions and rituals of other sororities
- Each spring, two girls from each sorority are elected from the newly-initiated pledge class to become Shi-Ai representatives. Together, they form a campus-wide pledge class.
- Sigma Alpha Iota strives to further the development of music in America and promote an understanding between foreign countries and the United States.
- Sigma Alpha Iota brings together women who have an interest in music.
- Sigma Alpha Iota gives material aid and inspiration to its members

Shi-Ai: First Row: Kristin Breading, Sarah Camper, Krissy Waltz, Gayle Silagyi, Amy Russell, Marie Tomondong, Buffy Osbourne; Second Row: Danielle Duss, Elizabeth Sherman, Izzy Baer, Christina Mantiz, Megan Murphy, Veronica Castillo; Third Row: Jeanne Auer, Katie Frasor, Heather Gould, Kate Sheehy, Kori Wilken, Meredith Shaheen; Fourth Row: Jonie Peterson, Gina Payton, Kathy Olson, Amy Anthony, Laura Bogush, Julie Smull, Viva Jeffrey, Katie Frank; Fifth Row: Kim Lakin, Melissa Lezotte, Carolyn Sampson, Cherie Fetro, Jenn Luberda, Julie Croegart, Tammy Kennan.

## Sigma Alpha Iota

Sigma Alpha Iota: First Row: Laura Dolecki, Michelle Mar, Sarah Crawford, Sue Tarson; Second Row: Margaret Michalski, Sandra Wolvington, Maria Dripps, Suzie Bono; Third Row: Kathy Krueger, Kathleen Shanahan, Mary Braun; Fourth Row: Carol Westphal, Kristen Molnar; Fifth Row: Erin Evenson.

## Star Course

tar Course: Managers: First Row: AiyceSherbenou, Tanya Zaben, Jonathan Paetsch, Cathay Li, Jason Pawelczyk, Tony ordero; Second Row: Pari Ghorbani, Carolyn Conry, Alicia Pritt, Michelle Stansel, John Serafin.
taff: First Row: Jonathan Paetsch, Jason Pawelczyk, Tony Cordero, Michelle Stansel, John Serafin, Alicia Pritt, Steve acobek, Alyce Sherbenou, Jeremy Colby; Second Row: Pat Coughlin, Cindy Hamel, Lisa Hanes, Brett Rumminger, jarb Anderson, Amy Lai, Amy Skaggs, Katie Wallaert, Violet Makowski, Lidja Grazulis, Marianne Stowell, Pari shorbani, Cathay Li; Third Row: Christine Conry, P.J. Macri, Phil Stepping, Kris Wolmer, Michael Arzoumandis, Deandra Pellicore, Jennifer Henninger, David Yu, Nikki Kloiber, Bonnie Kennedy, Kim Robeson, Emily Olsen; Fourth ow: Ed Staudacher, Steven Breden, Nathan Wolf, Steve Slomiany, Navid Varjavandi, Eileen Sullivan, Emily Sullivan, Megan Bishop, Eric Boeing, Chris Jepson, James Paz, Vadim Dadiomov, Mandy Manning, Jeff Blouin, Missy Payne; ifth Row: Sara Hage, Sean O'Neill, Matt Soble, Diane Sandoval, Paul Chiemmongkoltip, Ross Woods, Kelly Beckett, Heidi Calkins, Michelle Munnecke, Amber Barr, Matt Schlosser, Stephanie Katsaros.

- Star Course brings concerts to the University of Illinois.
- Star Course is completely student run.
- Star Course has been a part of the University for over 100 years.
- Star Course is an inside look at the music business.
- Star Course is a fun and unique experience.

## Student Alumni Association

- SAA serves as the umbrella organization for the nation's largest Homecoming.
- SAA has 76 members who are chosen through anintensive interviewing process.
- SAA is responsible for many events such as Senior Reception, Senior 100 Honorary, and "Be A Part From the Start."
- SAA focuses in on students, and it is full of ambitious people.
- Bob Lumsden is the Advisor of the SAA.

Student Alumni Association: First Row: Betsy Dirksen, Joella Foster, Sara Camper, Colleen Lenihan, Scott Montgomery, Christine Hathaway; Second Row: Dawn Thomas, LaTonya Lowry, Emily Tarter, Cecilia Rettig Jody McCormick, Jen Gasparac, Barb Markoff, Megan Goldish, Bernadette Connelly; Third Row: Tiffany Arnold, Matalie Fulk, Adam Klauder, Erin Foy, Troy Pottgen, Don Ross, Michelle Burmeister; Fourth Row: Carol North, Sital Daiya, Jeff Dameron, Bob Lumsden, Doug Bree, Jim Underwood, Amy Linton, Liz Casey, Vera Zlidar, Joe Lynch, Brad Purl, Bob Bartell, Mike Terry.

Lunch on the Quad - Homecoming Activity.

Homecoming Court Member and SAA member Christy Brunton with advisor Bob Lumsden.

AA 1992 Executive Board. First Row: Bob Bartell, David Hechter; econd Row: Jennifer Gasparac, Cecilia Rettig, Betsy Dirksen, mily Tarter.

SAA members with high school delegates to the Chataugua High School Leadership Conference.

AA at play with the Big Brother/Big Sister Party.

## Stratford House

- Stratford House,312E. Daniel,Champaign, is an interdenominational womens' house affiliated with the Baptist Student Foundation.
- Stratford House has a home-like atmosphere.
- Stratford House provides a Christian environment, Christian friends and a chance to learn and grow in Christ.
- Women interested in living at Stratford must apply and interview with current members.
Stratford House: First Row: Colleen Houlihan, Sally Broquard, Amy Keefe, Shelley O'Connor, Ann Rimovsky, Wendy Peterson, Amy Franklin, Lesley Fewkes; Second Row: Michelle Barthelemy, Jenny Gardner, Cara Carpenter, Melanie Henderson, Dana Eisenmenger, Amy Dekker, Ali Tolliver, Erin Reep; Third Row:Valerie Magalit,Rachel Walberg,Julia Jacobs, Marge Donoghue, Kathy Meisenheimer, Heidi Dalton, Janet Witter, Karin Brockelman; Fourth Row: Diadra Fleming, Jeanette Hanlin, Meredith Kalla, Dee Casserly,
 Kristina Adair, Jaimee Mansfield.

## Illini Synchronized Swim Club

- Illini Synchro started in 1924 under the name Illini Terripans.
- Currently, we put on two shows a year, including our annual Mom's Day Show.
- The other show is held in the fall.
- In the winter, we compete with other Big Ten schools, including Ohio State, Michigan and Northwestern.

Illini Synchronized Swim Team: First Row: Elaine Fetyko, Rachel Lassy, April Bishop, Melinda Knapp, Michelle Max; Second Row: Esther Weininger, Salma Ansari, Susan Kerber, Nell Bekiares, Heidi Hermann; Third Row: Suzanne Ashby, Laura Dobecki, Michael Falbo, Sue Hartigan, Amy Abler.

## U of I Flying Team

of I Flying Team: First Row: Bob Primmer, Kirsten Jensen, Florian Kapp, Thyra Landowne, Trevor Eissler, Rick Kim, eggy Campbell, Paul Weston, Brian Kennedy, Brian Sajdak, Steve Gugala, Aaron Hedman, Dale Schieman; Second ow: Tom Pellegrino, Chris Magnuson, Chris Cannon, Jeff Skiba, Geoff Oberg
-The U of I Flying Team was awarded its seventh Regional Intercollegiate Flying Association Region 8 Championship in a row on October 24,1992 . During the three-day air meet, held at Parks College of St. Louis University, the team competed against the best pilots from Purdue, Southern Illinois, Parks College, Lewis University, Middle Tennessee State, Vincennes University and Eastern Kentucky University.

- The team won both the Flying and Ground Event Top School trophies. Leading the scoring with first place finishes in the flying events were Chris Cannon in Power OFF Accuracy Landings and Brian Sajdak in Short Field Accuracy Landings. Leading the ground events scoring with first place finishes were Brian Kennedy in Manual Flight Computer, Chris Cannon in Aircraft Identification and AaronHedman in PreflightEvent. Also contributing to the win were Peggy Campbell, Trevor Eissler, Steve Gugala, Florian Kapp, Chris Magnuson, Geoff Oberg, Tom Pellegrino and Jeff Skiba.
- Chris Cannon was named Top Pilot, placing first in Power OFF Accuracy Landings, first in Aircraft Identification, third in Simulator Event, fifth in Aircraft Navigation, ninth in Short Field Accuracy Landings, and ninth in Manual Flight Computer.
- The first place finish will send the team to the National Air Meet in which they have finished in the top four for six consecutive years. The meet will be held in the spring at Central Texas University. Also representing Region 8 will be Southern Illinois University and Parks College.

## Transfer Student Association

- TSA is a social organization composed of transfer students, for transfer students.
- TSA has been around for over 20 years.
- TSA members participate in activities such as barbecues, parties, picnics, campouts, canoe trips, ski trips, hay rides and tailgates.
- We offer social activities, counseling, advice and friendship to incoming students to ease the transition to the University.
- By participating in TSA, members make their enrollment at U of I more enjoyable and memorable.

Transfer Student Association: First Row: Dawn Shockley, Christine Kruep, Nicole Felleti; Second Row: Terry McCoy, Randall Holland, Joe Savor, Janelle Carson.

## Volunteer Illini Projects

- VIP's been serving since 1965.
- VIP has over 700 volunteers in 13 volunteer projects and 3 administrative projects.
- Our projects include: Best Buddies, Daycare, Finance, Financial Development,Friendship,Health Care, Hunger and Homeless, Prison Concern, PR, Recreation, Senior Citizens, Special Health Needs, Special Projects, Tutoring and Whistlestop.
- We won the 1992 Dad's Association Outstanding Student Organization Award.
- Our motto: Never doubt that a small group of thoughtful committed citizens can change the world-Margaret Mead.

Volunteer Illini Projects: First Row: JoAnn Bautista, Eric Born, Missy Comenduley, Liezi Sibal, Laurie Zika, Lis $\bar{\varepsilon}$ Tenhouse, Shirley Ho, Gail Goldberg; Second Row: Nikki Weinstein, Karen Schindhelm, Angela Winters, Michells Gerbino, Lori Schneider, Banita Sehgal, Karen Kamosa, Wyomi Sj Yonzon, Kris Millin, Troy Duckowitz; Third Row Geogy Thomas, Ann Megan Chrystal, Mike Rosenthal, Matt Herrmann, Lieschen Llerena, Nelson Silvestre, Dianne Pope, Deanne Wapinski, Julie Gilman, Mindy Stern.

## Women in Communications

- Women in Communications, Inc. is one of the nations's oldest and largest communications organizations.
- Founded in 1909, WICI has nearly 12,000 members in all areas of communications.
- WICI currently has 186 professional and student chapters throughout the U.S.
- These chapters, the cornerstones of the organization, provide programs, seminars and job-referral services for their members.
- The main purpose of WICI is to unite members for the purpose of promoting the advancement of women in all fields of communications.

Women in Communications: First Row: Sarah Lomasz, Eileen Lynch, Page Lundsberg, Jenny Churchill, Je Hudson; Second Row: Kim Leistner, Andrea Park, Lisa Sanzi, Jennifer Catour, Jen Wozniak; Third Row: Care Carney, Melissa Despe, Lucy Lin, Sherri Franz; Fourth Row: Deana Hartke, Christina Sim, Laura Sallmann, Jennife Beyers.

## Nomen's Glee Club

Girls Next Door: First Row: Julie Larson, Nicole Tempia; Second Row: Tracy Genzo, bbie Plager, Jennifer Sikich, Joyce Thompson, Courtney Glascoe, Amy Brumfield.

- Women's Glee Club brings together students of diverse backgrounds and areas of study sharing in their common interest of music.
- Dr. Joe Grant, Chairperson of the Music Education Division, is in his 11th year as the conductor of the Women's Glee Club. His personable style and high quality of musicianship provide an enjoyable learning atmosphere for each member.
- Taking advantage of this year's Christmas break, Women's Glee Club toured throughout the Washington D. C. area, performing at the Kennedy Center for the Performing Arts as well as various churches and schools.
- In addition to performing at the annual Dad's and Mom's Day concerts, the Glee Club also represents the U of I at a variety of other campus functions.
- Drawing on vocal Jazz and pop arrangements for their repertoire, The Girls Next Door serve as a fundraiser for the Women's Glee Club. The eight member a cappella group can be seen (and heard!) at performances on and off campus.

Women's Glee Club: First Row: Joyce Thompson Amy Brumfield, Adair Sodke, Monique Hsu, Elizabeth Casey, Dr. Joe Grant; Second Row: Julie Barrett, Courtney Glascoe, Kim Dean, Jodi McKeown, Amanda Harris, Jacquie James; Third Row: Ellie Kreader, Kit Kendeigh, Rachel Carlson, Lisa Clemmons, Jennifer Lach, Heather Strock; Fourth Row: Patty Miller, Ann Kendeigh, Joy Olkowski, Julie Poyton, Cathy Caruso, Emma MacLauren; Fifth Row: Kathleen Shanahan, Julia Davis, Cari Alexander, Joyce Lee, Janet Flewelling, Kendra Kay Smith; Sixth Row: Leslie Malone, Anna Niedbala Carol Lichodziejewski, Nicole Tempia, Karen Fleming, Carol Fischbach; Seventh Row: Gemma Wall, Julie Larson, Sandy Bierbauer, Kristine Matula, Tracy Genzo, Jessica Dereyke; Eighth Row: Tara Smith, Aveen MacEntee, Debbie Plager, Beth Watkins, Sara McNamara, Emily Grush; Ninth Row: Sara McLoud,Carrie Londo, Jeanette Rieke, Jennifer Sikich, Sarah Page, Lelah Beasley, Jacqueline Dimpsey, Abigail Tesdall.

## graduates

Senior year is almost over and you barely have time to think. Many little, but not necessarily trivial, things have changed in your life over the past four (plus) years to make the U of I different from the ones the 1992 freshmen will experience. Unique aspects of campus and academic life have made the college career of this class of ' 93 "slightly different" from that of any other class.

Several advantages the class of '93 had as freshmen are no longer available. Nature's Table, the bar with an entrance age of 18 and cheap pitchers of beer, was torn down and replaced by a parking lot. Fraternities no longer have "keggers" where just about anyone could walk in off the street and approach the tap. Academic requirements have also become more stringent. First and second year students are required to take an additional Rhetoric course. Students living in the Taft-Van Doren Residence Halls will no longer have the "room-only" option. Small changes in university and campus policy have made the class of '93s college experience slightly different. Most will be deciding what to do with the next phase of their lives. Whether one opts for grad school, professional school, or a career-most will go their separate ways and commence life. There will be many changes and experiences influenced by what has gone on at this university. Slight changes, however, do add up and eventually make a difference.

## r.r. gonzales, managing editor

## A GRICULTURE

# MAJOR changes 

## When you just can't decide how to spend the rest of your life.

You've come to the U of I to learn about whatever you plan on doing for the rest of your life - right? You apply to a college, choose a major, and you're on the road to the future. Your life-long goal is to become a glass blower, or and ethologist, or maybe even a folk dance instructor. You know what you want, and you're on the academic road to excellence.

Some aren't quite as lucky, though. There are people here at the U of I who have no idea what they're here for. These are the people you seestanding in line to change colleges each semester. These people are the friends that you have that are taking
classes in every subject.
"I've changed majors once so far - from Urban Planning to English," Timothy Shea, currently a sophomore in LAS, said. "You can do a lot with English. I'm considering Law School right now, but I'm also interested in Economics, so CBA might be seeing me soon," Shea said.
"I've always been interested in flying, so I switched from Forestry toAviation," Ron Prus, sophomore in Aviation, said. "I want to work asa pilotand as a mechanic, butI'm also considering a degree in psychology or sociology."

Thomas G. Peroulas, sophomore
in LAS, said, "I started here as an undecided, and switched to Biology because I like to study anatomy. But, I'm interested in Computer Science, too, because computer imaging will be big."

Many people spend four or more years at the U of I constantly changing their mind. Some people just have such varied interests, that it is tough for them to decide what they want to do with their future at such a young age. At least when they do graduate from this fine institution, they'll be really well-rounded.

## McKinley Charges Students for Missed Appointment\$

## DNKA:s must poy

Most students have been frustrated trying to seek medical assistance at the McKinley Health Center. With dripping noses and hacking coughs, many hang up the phone after finding that no appointments are available for three weeks. Seeking relief, students often wait at emergency caretobeseeamedicalprofessional.
In regards to complaints about the lack of availability, the Student AdvisoryBoardandtheMcKinley administrationdecided inOctober 1992 to charge a $\$ 5$ fee to students who fail to show up without canceling at least one hour in advance. Cecile Steinberg, Assistant Director for AdministrativeServices,said,"The object is to create a deterrent. We try to discourage the number of DNKAs (did-not-keepappointments)becausetheywaste
a provider's time. Wealsodidit to provide better service."

Most students agree that the charge is a good idea. Leslie Killebrew, senior in Education, said, "The fee is justified. It forces students to cancel appointments and opens up spaces for others whoneed them." Although some feel that students have plenty to pay for already, they see that the feemakessense. JasonStone,senior in Communications, said, "It's probably for the best. Students already wait enough as it is for appointments."

However, students who have waited for hours over the winter, and who had McKinley call and cancel their previously made appointments due to back-up, blame the center rather than the students. Chris Swan, senior in Education,said,"IthinkMcKinley
isruninefficiently. Theyshould be paying me five bucks when they calland cancelmy appointments."

Although opinions on the fee differ, the cancellation policy has led to a 25 percent decrease in noshows. Butthereason may bedue to student awareness of the problem, ratherthanthereluctance to pay. Steinberg said, "Because we have implemented a heavy educational campaign, students realize the importance of canceling."

Next time you can't get to your appointment,rememberthat there may be a desperately ill student somewhere on campus who would jump at the chance to take your place. And, of course, you don't want to have to write yet another check to the U of I.

## A GRICULTURE

A pounding on the door; yelling; an annoying sound similar to an amplified alarm clock; groggy and bleary-eyed bodies pressed together trying to get into the same stairwell. The time: 3 a.m.

This is a scenario familiar to any university student who has ever lived in a Residence Hall. The annoyance and inconvenience of false fire alarms is often accompanied by the pure hellishness of being forced out of bed at an ungodly hour. "They [fire alarms] usually happen around three or four a.m.," Jeremy Horowitz, sophomore in LAS, said. "IT [Illini Tower] had some a couple of days in a row
at the beginning of the year." However, not everyone views fire alarms as entirely negative. Some see it as an opportunity to see everyone au naturel. "It's fun because you can see all your friends at three in the morning in their pajamas and without makeup," David Kheradyar, sophomore in LAS, said.

Miron Hirsch, sophomore in LAS, finds fire alarms entertaining. "They're a premiere social event."

Of course, there are instances when there is not a fire, which is what most students usually assume. But whether one sees it as an annoyance or as amusing, the
general disregard for most fire alarms may one day prove disastrous, paralleling The Boy Who Cried Wolf. Students have seen so many false alarms that it's automatically assumed that an alarm is not truly a sign of danger.
"You know, one of these days there's going to be a real fire and everyone is going to blow it off, thinking it's another stupid false alarm," Waymond Eng, sophomore Engineering, said.

While most students are annoyed by the number of false alarms that intrude their schedules, the University Fire Department is more patient "The false alarms are

something to be accepted in a system this big," Lt. Dennis Horn, a 15 year veteran of the force, said. "We don't catch very many [who pull the alarms], though."

If a student is caught, however, harsh action will follow. Besides punishment for breaking Illinois state laws, which can result in fines up to $\$ 1000$ and a prison sentence, the student will also face disciplinary action by the university. "I accidentally set one off, and it really scared me," a junior in Engineering who asked to remain anonymous said. "I ran across the street to a friend's until the fire trucks left. It's something I'm trying to forget about. I get in enough trouble as it is."

## A GRICULTURE

## Soap Opera Addicts Even YOUCan <br> Get Hooked

Like sand through the hourglass,many studentsspend countless afternoons engrossed in these tales of lust, deception and intrigue. If you live anywhere near a residence hall, you can hear the call: "Has anyone seen All My 'Kids'? What's going on?"
"We're playing All My Children right now!" Lisa Nichols, junior in LAS, said. "I don't schedule my classes around it or anything. I have a VCR and I tape it everydayfaithfully!"

Nichols explained that the appeal of any soap opera relies on the plot, the characters and the issues raised on the show. "All My Children is my favorite because the story line is just WONDERFUL!" shesaid, "Last year's plot won Best Drama for that story about Natalie's crazy
sister Janet who threwherdown the well. I was so proud of them for winning. They deserved it."
"All My Children is my favorite, too, but the plot is the sameold thing. Peopleareeither being murdered or they're sleeping around with their sister's step-brother's uncle's friend," Chealon Shears, junior in LAS, said. Shears said that she only watches the show becauseit'sa great way torelieve stress.
"It IS a good stress release, but what keeps me watching is the characters. I just love All My Children's Erica Kane because she's allowed to be a bitch!" Brittany Davis, junior in LAS, said.
"Erica's great. She's the backbone of the show. And I want you to know something!" Nichols added, "They used to
have all these dark-haired girls on All My Children, but now they don't because they won't let anyone compete with Erica."

Other favorite characters include Haley, Brian, Dixie and Adam Chandler. "Dogs on the show, like AdamChandler, have tons of kids scattered all over town. Every year he finds out he has another illegitimate child," Davis said.
"Soaps also deal with timely issues," Davis said. "They deal with what life's like TODAY! For instance, on All My Children there's a biracial couple, and the shows raises questions about racism."
"Theinterracialcoupletheme on All My Children is important. They've talked about alcoholism, too. But I like how they cater to the younger audience with Pine Valley

Kristina A. Talbert, Onarga John R. Tamblyn, Manteno Althea Thomas, Canada Jesse B. Thornton, Nakomis Timothy J. Thuline, Galva David B. Trotter, Morris Renee Vergara, Chicago Michael Vilendrer, Mauteno

Emaley M. Zuback, Bolingbrook

High," Nichols said, "So I can sort of relate to some of the situations."
Many soap opera junkies will agree that the daytime soaps are quite addicting. "If you start watching, you'll get hooked, too!" Davis said.
However, when schoolwork interferes (like on Finals Week) hese "addicts" forget about All My Children. "We do have ives!!!" Shears said.
However, most soap opera unkies find it hard to stop watching the shows. "I cannot quit watching soaps!" Nichols said, "because they let a person eethat your life isn't as messed up as you think. Those people nave all this money, and their ives are messed up. I have NO noney, and my life isn't nessed up so I must be doing something right!"
story by Lainee D. Frizzo layout by Jill Kogan

Jeff Wampler, junior inEngineering, puts a tape in his VCR to tape "Days of Our Lives." Many students tape the soaps when their not home to watch them.

Soap Opera addict Naomi Levin, senior in CBA, watches "All My Children " every day that she can. "All My Children" is one of the more popular soaps among $U$ of I students.

## APPLIED LIFESTUDIES

## girl scouts <br> There are several different

 GROW clubs and organizations that receivequitea bit of attention on thiscampus. One, however, that does not receive much notoriety is Campus Girl Scouts. The group was started by older Girl Scouts who had remained in Scouting intotheir college years. They wanted to encourage youngergirls tostay inScouting by helping to organize activities and progams with local troops.

CampusGirlScoutsareintheir third yearof existence. Co-founder and leader Chris Kysar, senior in FAA, said, "We started in the fall of 1990 and the main founder was Denise Szuck. I helped co-found the Girl Scouts when Deniseand I were roommates. The both of us were Girl Scouts when we were younger and we agreed that we shouldmakesomethingavailable for the younger Girl Scouts here."

It took Kyser and Szuck their
freshman year to get the organization going. "We did not actually start Campus Girl Scouts until we were sophomores. Denise and I both enjoyed our time as Girl Scouts, so this is one reason why we started it. Presently, we belong to the Organization Girl Scout Council," Kyser said.

Campus Girl Scouts has helped exposegirlstothediverse resources of the university. They have toured different parts of the campus, suchas the Krannert Center for the Performing Arts and the Krannert Art Museum.

Campus Invasion occured the weekend of Janurary 15 and 16 and was a very broad program. Kysarsaid,"TheGirlScouts came intownon Friday,January 15 and they were from six different councils from Central Illinois. They stayed at the University Inn. The Other Guys came and sang and this wasabig success with the girls. On Saturday, they were given an opportunity to explore career opportunities and learn about the different colleges at the university.'

The group became quite familiar with the different types of cirricula that are offered at the University of Illinois. A variety of groups, such as the Phi Gamma Nu business fraternity, have gotten the members and youngerScouts familiar with the diverse colleges within the university. Also, selling cookies in the Union has also proved to be a success for Campus Girl Scouts. They take orders at the end of January and the beginning of February but actually sell the cookies during the month of March.

Overall, Campus Girl Scouts has had a positive effect on its members as well as on the younger Girl Scouts in the surrounding communities. Kysersaid, "Wecanexposethem to the university, which gives [the girls] a taste for college life. Weare closeenough in age, with the girls, being in junior high or high school, so that we can do things together. In fact, we had a seminar on sexual education and gave the girls a chance to ask any questions that they

## APPLIED LIFE STUDIES

Students at the Armory line up to try to change sections or get into closed classes. Over the summer the Armory received a facelift which caused the re-arrangement of the registration tables.

What do undergraduates dread their first week back from break more than waking up for their first class of the semester? No, its not the return to "cafeteria" food. Its "oncampus registration." Every semester, a few days before classes start, the Armory floor is transformed from a race track to a chaotic mass of students "fighting" to get the classes they want.

Students go to on-campus registration for a number of reasons: they did not advanceenroll, they need to make schedule changes, they never received a copy of their registration agreement in the
mail, or they are encumbered
"I had to attend registration because one of the classes that I had signed up for, Philosophy 214, was closed," Sannie Willis, freshman in LAS, said.

For two days, students are given assigned times during which they are allowed to enter the Armory to add or drop classes. It is up to them to find classes that fit in their schedules, fulfill their College's requirements and hopefully appeal to them.
"It was frustrating," Lance Kumis, sophomore in LAS, said.
"You'll have three or four classes that will fit into your

hedule and only one, if any f them are open," Ashley lacon, freshman in LAS, said. Many students had ggestions on how registration puld be improved.
"It was hard to find your ay around to the different ations. It took me over 10 inutes just to find my ounselor. It needs to be ore formally organized," eronica Munoz, freshman LAS, said.

Another problem which eeds to be eliminated is aving to stand in a line for a ass that might not even have ny openings.
"You stand in line for an
hour waiting to sign up for a class that you find out is closed when you get up to the front of the line. Each class should have a sign that lets everyone know which sections are closed and which aren't," Macon said.

At one time or another, most students have to experience it. Although most would rather not do it, it is a necessary part of assuring that they get enough credit hours of required classes.
"Although it's a hassle, other than some small changes, there's probably no better way to do it," Macon said.

Looking back to the past, nothing has changed. This photo, from the 1931 Illio shows that 50 years ago, students waited in line to register for classes just as we do today.

## of <br> Racial <br> Origins Policies

During Spring 1991, Vice Chancellor Morton Weir commissioned Professor James Anderson to create a new Educational Policy Studies class after many groups had expressed concerns about the lack of courses which addressed race and race policy in-depth. The result was the addition of EPS 210: Race and Cultural Diversity in American Life. Anderson, who holds a Masters degree in education and in secondary social studies, worked with a research assistant during the summer and produced a course which is undoubtedly the first of its
kind on campus
Anderson cites his main goals as a chance to give students a comprehensive view of the ancient and modern role of race in our societies. "I want my students to understand the historical development of race so that they can discuss it intelligently and know the facts."

EPS 210 has been met with much approval from students. The class attracts a wide variety of majors; however, most students seem to have similar goals in mind. They are to better understand the origin of racial policies in order to implement change in their
respective communities.
"EPS210 was recommended to me by a friend, and I wanted to understand the origin of different racial policies and why they are so hard to change," Evelyn Rodriguez, senior in LAS, said.

Doug Davis, senior in LAS, gave similar reasons for taking the class; "I have an interest in racial and cultural issues. I want to see change in society. This is one of the first courses of this nature and I'm taking advantage of it so that I can help implement change."

# TatóosAre They for You? 

Although tattoos aren't for everyone, it seems that many university students are finding a growing interest in them these days. Tattoos have been around for a long time, and the reasons for getting them vary from person to person. For some students, tattoos aren't just another fad but a part of their personality. "Tattooing is like using your body as a canvas," Violet Mackowski, sophomore in CBA, said.

Some students get tattoos purely for display purposes, such as on their arm. They want others to see the tattoo and be intrigued by it, but some
students get a tattoo where no one else can see it. According to Dana Tolomeo, sophomore in LAS, "Itcanbe a real personal thing."

Basically, it all depends on the personality of the individual being tattooed and their degree of showmanship. However, if a person's tattoo is highly visible, especially an elaborate one, a person has to be certain that it's what they really want, and that it isn't something they will regret in the future.

Genuine-looking, temporary tattoos are also becoming widely popular, but
these fake tattoos just won't do the trick for everyone. "Why get a fake one when you can get a real one?" Mike Angarone, junior in LAS, said.

Some students get tattoos just because they think it would simply be a fun thing to do. "When I got mine done on my hip, I just wanted to burst out laughing because it tickled." Mackowski said. One of the myths about tattooing is that getting one will be very painful but it all depends on what part of the body it is.

Most people are surprised to hear that someone has a

# CHAMPAIGN URBANA 

Chambana. Most people just lump the two cities together. They are so close and so closely integrated, there seems to be little or no difference. The only thing that come between them physically is Wright Street. The $U$ of $I$ is spread out over these cities, making them seem like inseparable twins, but in reality, there really is a world of difference.

Jenny Cuasay, an Urbana resident and sophomore in LAS, chose to spend her second year in Urbana. "I think Allen Hall is great
because it's the nicest residence hall. It's close to the Quad, and the classes that are offered right in Allen are great. The city of Urbana is beautiful, too. It reminds me of some of the prettier suburbs near Chicago," Cuasay said.

Almost everyone agrees Champaign is the party town. It may have something to do with the huge number of Greeks or the many bars. "Champaign is more active and upbeat. It's got more businesses in the area and more to offer,"

Angie Rinkel, a senior in Agriculture who currently lives in Urbana, said.

Urbana, on the other hand, is more toned-down. "Urbana is quieter and has a nicer appearance and more character than Champaign. It also seems like there are more grad students," Champaign resident Mikkel Storaasli, freshman in Education, said.

Erik Luhtala, senior in Agriculture and Urbana resident, noticed some of the physical differences that separate

Chambana.

# Revamping 

Typically, Greek pledge programs span an entire semester, as most houses require pledged members to attain a minimum grade point average before initiation. However, approximately $1 / 3$ of the 22 women's fraternities in the university's Panhellenic Council have been forced to revamp their pledgeeducation programs to fit into a six to eight-week format. Allegations of hazing plague the Greek system as a whole, and many women's organizations have taken steps to eliminate pledge semesters entirely in an attempt to thwart criticism.

However, national women's fraternities are still divided on
this issue. Proponents of extended pledge periods assert thatsemester-long programsare necessary to ensure that each pledged memberadjusts socially and academically to Greek life before committing to a lifelong membership in a fraternity.
AdrienneStorch, freshman in FAA, said she believes a pledge semester is beneficial because of this adjustment period.
"You get to know everyone better after a semester, and you can decide if (the house) is not for you," she said. "A lot of people I know who have initiated earlier have had second thoughts, and I haven't." Storch, a pledged member of Phi Mu who will be
initiated in January, also said she enjoys being a pledged member because "everyone is so nice" and pledged members "don't have all the mandatory meetings."
Dusty Jennings, freshman in LAS and recent initiate of Gamma Phi Beta, agreed that it was more fun being a pledged member, but she liked initiating in the fall.
"There isn't much difference between being a pledge and being a New-I," Jennings said. "As a pledged member you don't have toattend mandatory meetings, and you get all of the attention and all of the presents. But, on the other hand, there is a feeling of being the lowest

## COMMERCE

 thingsseeing ${ }^{\text {s }}$ differently

For some university women, few words are as loaded as the word fraternity. Many women would conjure up a picture of male university studentsliving together in a house, but that seems to be the only common
their objective. Sigma Pi, for example, does their national philanthropy for Multiple Sclerosis, including support for Students Against Multiple Sclerosis (SAMS) and a wiffleball gametoraise money.

Other fraternities do not have a n a tion a philanthropy, but do local work. Theta Xi , which supports Habitat for Humanity, is an example.
ground for opinions about fraternities.

Vanessa Margaron, junior in Communications, said that she feels fraternities help serve the community. "There's a lot of fraternities that have done charitable things on campus."

Fraternities often have philanthropy work as part of

Suzie Berry, junior in LAS, does not view fraternities this way. "Are (fraternity members) really here to go to school and promote their scholastic abilities together? No. It may be that fraternities dosomepositive things around campus, but they are much more reputable, or notorious,
for drinking, wild parties and picking up girls."

Some women guys in fraternities are there just because they are followers. "I think that if guys belong to a fraternity, they're there for a reason... they have no identity of their own." Amanda Hryb, freshman in Engineering, said.

According to Aveen MacEntee, sophomore in LAS, men join fraternities in order to become associated with and become identified with different people at such a large university.

While it may be impossible for women to agree about fraternities, fraternities will continue to unite malestudents for school spirit, brotherhood, charity and maybe one or two parties.

## An Eight Year Commitment

Weekend Warriors Take-off to the National Guard

The first weekend of every month is not the weekend students in the Illinois Army National Guard pine away for. For female members it means traveling to Chicago, since no units in the Central Area currently allow women. For men and women alike it means long workdays and overnight trips. So what are the benefits of three hour drives north to endure weekends of orders and uptight commanders? Aside from popular belief, these students are not gun-toting masochists or camouflage clad heathens. What the National Guard means for enlisted students is eight semesters of paid tuition and an extra $\$ 170$
a month along with regular monthly pay.
"I really don't know how I would have been able to finance my education if it wasn't for the Guard," Marsha Demers, senior in LASsaid, "I've been in almost five years now, and I can'tsay I won't behappy to get out."

Paid college tuition doesn't come easy. Members enlist for eight years, attend two months of regular ARMY basic training and receive job training. For many students, especially in light of the Gulf War in 1991, the hardest part of being in the military is worrying about presidential and congressional decision making.
"A lot of the time the work we do is overdone, redundant and under our capabilities. But the friendships I've made make up for it....most of the time," Michael Brosnan, senior in LAS said. "It's really not for everyone. It's for people whoare willing to make a trade-off. And sometimes that trade-off means taking orders froma Republican conservative like George Bush when your liberal. It's often hard for me to show up on those weekends and stay true to myself." So for interested students, if you can endure the eight years, the money is yours. If not, get a loan.

## MORE SPACE LESS NOISE Certified Housing as a Residence Hall Alternative

Freshman have limited ving options on campus. They re required to either live in Iniversity Residence Halls or one of several forms of ertified housing. When one inks of certified housing, romley Hall,Hendrick House nd Illini Tower most often ome to mind because of their ze and location. Other forms fertified housing include ooperative houses as well as aternities and sororities.
Matt Weinstock, freshman CBA, said, " I chose to live in lini Tower mainly because I ranted my own bathroom and liked the idea of having eparate areas set aside for my edroom, living room and itchen."
Privacy seems to be the most ecurring theme for living in ertified housing. Semi-private athrooms appear to be the iggest plus. There are isadvantages toliving in large
certified housing buildings, however. "You don't meet people as freely as you do in the dorms," Dawn DelaTorre, sophomore in LAS and Bromley Hall resident, said.

In the Residence Halls, because of the smaller rooms, many people prop their doors open, encouraging contact with neighbors. Also sharing a bathroom helps promote conversation and meeting those on one's floor. Laura Watkinson, sophomore in LAS, said that the main reason she lived in a University Residence Hall was to meet people. She also said that she has met very few new people while living at Bromley Hall this year.

Students living in University Residence Halls also have more access to and information about university programs. Somehallsalsooffer classes and special academic programs on site. This was a
major selling point for Barbara Horwitz, sophomore in LAS, when she was deciding where to live. She chose Allen Hall because of its Unit One Program, Guest in Residence Program and others. In her opinion, these programs promoted a high degree of student involvement in both academics and the discussion of pertinent issues.

While Certified Housing is quieter, more private, and offers larger rooms and a location near the Quad, it can be difficult to meet people there. University Residence Halls, on the other hand, offer smaller rooms and more distant locations, but better lend themselves to interaction with others and making friends. Both offer completely different experiences, yet they suit the different personalities of the students. story and layoutby Monica Soltesz

## COMMUNICATIONS

## F.Y.I.

First year students in certified housing come together to discuss current issues that impact on their lives.

For 1992-1993 the U of I introduced a new program called First Year Impact (F.Y.I.) in an effort to evaluate and shape their orientation practices to meet the needs of new students. The program consists of freshmen who were nominated by either their Orientation Student Leader from the summer or their Resident Advisor. Although the group's main goal is to provide information for the university, Rhonda Kirts, Assistant Dean for Orientation Programs, said, "I think it is also a unique opportunity for students to take advantage of to assist in the transition to the University of Illinois.'

The development of thecurrent F.Y.I. program has been a step-by-step

rocess. In 1986, the Office of ne Dean of Students created a 5-member Freshman dvisory Board to provide edback on the summer rientation program. radually, the program grew size, peaking at 60 members st year. As membership creased, so did the group's ange of responsibilities. The reshman Advisory Board lanned and organized the resh Start activity at IMPE for coming freshmen during few Student Week and ssisted in the development of e F.Y.I. program last spring. F.Y.I. consists of pproximately 135 freshmen. hese students are divided into ven groups which meet at arious locations on the ampus from 3 to 5 p.m. on Iondays. Each group is
headed by a faculty facilitator who has received training in effective group leadership. Although F.Y.I.'s primary focus remains to evaluate the orientation programs, the group'sleaders haveexpanded the discussion topics to include such issues as residential life, campus safety and student services.

While the feedback received from the program is important to the university's administrators, the student members also profit by their participation. Jeff Henderson, Director of Certified Housing and F.Y.I. group facilitator, said, "I think the students get the opportunity to interact on a regular basis with a group of people they wouldn't normally get together with."

Amy Ward, freshman in

LAS and F.Y.I. member, said "It lets people share similar experiences and express their opinions, views and frustrations." In addition to the social benefits, members also receive weekly workshops on such topics as leadership, study skills and time management.

This winter the Orientation Programs Office plans to assemble a First Year Impact advisory board consisting of F.Y.I. members and facilitators. The board will reflect on the program and suggest improvements. As for the future of F.Y.I., Kirts said, "As long as F.Y.I. continues to receive positive feedback, we hope to provide the opportunity tomorestudents." story by Laurie Suthers layout by Peggy Christensen

## COMMUNICATION

As students feel the pressure from their environment they look for ways to release it. The pain. The relief?

Everyone has it. Some can't escape it. It often hits us at the worst possible times. Many people are probably experiencing it as we speak. You've guessed it - that awful six-letter word: STRESS.

It's easy to find things that make us feel pressured. Daily annoyances, as well as nagging long-term problems, can cause us to pull out our hair. Among these problems grades and money seem to be some of the most common stresses for many students.

Many students claim stress is an emotional or mental state. For Barbera Scoby, sophomore in LAS, "Stress is having too much to do and not enough time." For others, stress is a combination of confusion and exhaustion - certainly not something to look forward to.
"Making it through finals and tests is tough," Tara Cheek, sophomore in Agriculture, said.

Stress can do strange things. It's similar to drugs because it tends to have different effects on different people. Some students find it hard to sleep or concentrate. Because people often get grouchy and
moody when under stress, social lives can be negatively affected. Kathleen Finn, sophomore in LAS, would rather not have anyone near her. "When I'm stressed watch out! Don't talk to me or touch me."

Finn's wanting to be alone is not an uncommon feeling among stressed out students. "I have to get away from people when I'm under pressure. Sometimes I have to isolate myself," Scoby said.

Some students, however do not let the tension bring them downfor long. "] always have time to have fun. Stress can't put a damper on my social life, Kurt M. Pavlu, sophomore

## Students Cope with the Hassles of Life

FAA, said.
What can be done about is terrible disease? Is there cure? The only real way ut is to remove all forms of ress. But because ignoring kams or avoiding your job ist isn't possible, we must ok for other ways to keep om completely losing our ol.
The two most common nxiety relievers are rinking and smoking, but lat does not work for veryone. "I like to road ip or just go for a walk," heek said. Sitting in the in, watching funny ovies and having sex have so been cited as stress lievers. "To get rid of nsion I play pool or
dance," Pavlu said. Others like to paint or play music to help relieve pressure. And if all else fails, go fishing, fling stuffed animals at the wall, or light some candles and incense in your room. "Just make sure you do something. Don't brood over your problem," Scoby said.

Remember that we all will feel stressed at times Unfortunately, the stress usually hits us when we most need to keep calm and get things done. Although there is no simple solution to this problem, there are many effective ways to alleviate it.

## EDUCATION

## Wére Not ALL Iroon Illinois

Sometimes it seems like everyone you meet at the $U$ of I is from Illinois, but believe it or not, there are students from other states here. This year alone the percentage of out-ofstate students has risen from 6.8 percent to 7.4 percent. Overall, U of I currently has a total undergraduate out-ofstate enrollment of 1,907 students, compared to 1,457 students in 1988.

The university is trying to recruit a more diverse student body by increasing the number of students from other states. States such as Indiana, Missouri, New Jersey, New York, and Ohio have a fairly large student enrollment here,
while other states have fewer than ten students attending the school. "Sometimes I hate it that everyone here is from Chicago and there's not much diversity here. People put the university down and don't understand why I'd want to come all the way here," Julie Miller, junior in LAS from New York, said.

Some students from other states notice the difference between the people in Illinois and those in their home states. "People here are more friendly and there's a more conservative lean here," Miller said. Agatha Karosas, sophomore in LAS from Limestone, Maine said that students here are "a lot
more laid back."
Surprisingly, out-of-state students don't seem to be too excited by the scenery surrounding Champaign-Urbana area Karosas misses the scenery from Maine. "Central Illinois is not the most beautiful area. Maine is full of pine trees and snow capped mountains Everything is so flat here and there's no where to ski," Karosas said. Foncannon said he misses the hills and beaches of California.

The weather in Central Illinois also does not seem to excite out of-state students. "The winters here are ugly, gray and

## EDUCATION

## A Different World

Oof I students have the exciting option of spending a school year in a foreign country. Students can study in any country from Japan to Australia to Israel and Russia. Although most students study abroad during their junior year, many go as seniors and even others as sophomores. It is not necessary to be a fluent speaker. In fact, some programs are designed specifically for students to learn the language of their country.

Christine McDaniel, senior in LAS, spent a year studying at KonanUniversityinJapan. During her stay, McDaniel lived with a Japanese family. She believes that
this is the best way to learn about Japanese lifestyle. At Konan University, which has under 5,000 students, courses like law and politics, anthropology, religionand economy are all studied in relation to the Japanese culture.

According to McDaniel, classes in Japan are not as time consuming as classes here. Prior to studying in Japan, McDaniel had studied Japanese for three years. However, there were people in the same group whose study had been less intense. In fact, one student had never even taken Japanese. "After three or four months," McDaniel

404 Graduates
aid, "everybody was at the ame level."
Doug Boyce, senior in CBA, pent the 1990-91 school year tudying in Vienna, Austria. Juring his stay, he lived with a riend and worked at the World rade Center. He studied at he University of Economics nd Business Administration, vhich has about 5000 students. According to Boyce, class izes were enormous. Some of is classes were finance, Soviet conomic policy, Soviet narketing and Soviet trade. helatter three are courses that re not offered at any other niversity in the world.
During the fall of 1991,

Boyce also studied at Leningrad State University in St. Petersburg, Russia. While there, Boyce lived in a flat integrated with native Russians. According to Boyce, Russian schools are not allowed to teach history or economics so he took classes such as language and literature. Class sizes at the university were large and, according to Boyce, tailored to American students.

Thelearning experiences from studyingabroadarenotlimited to theclassroom, whichisonereason why students choose to go. American students learn about a country'scultureeverywherethey
go. Boyce attended the opera in Moscow and the ballet in St. Petersburg. While living with a host family, McDaniel learned many interesting aspects of Japanese daily life.

The differences in the cultural and educational systems are integral parts of learning. Boyce and McDaniel, having had different experiences in different countries, both agree that regardless of the county, the basic goal for studying abroad is: To learn not only in the classroom, but also in the experiences of life.
story by Karyn Wiseman layout by Meg Wyatt

Many students who come to college are faced with the dilemma of rooming with someone they do not know. Often times they make long time friends with their roommates and other times they do not. But for most, having a roommate means adapting to live and relate to strangers. Some people already live in one room and are forced to live with another person. Others simply have to give up their notion of a single room that they had in high school and conform to
living with a stranger ir college.

At first, most students are poised with the question, what will my new roommate be liké For Debbie Sokolow freshman in FAA, the ide of a new roommatt compared to living alont was "... part of the collegt experience. I thought a roommate
woulc motivate me to study harder and maybe make new friend."

Sokolow was not the only one who had gainec a roommate part way through the semester

## RELINQUISH PRIVACY TO A NEW RO$_{O_{N}} \Lambda_{\text {A }}$.... ...

Takashi Tada, sophomore n LAS, had his roommate nove out after first emester. For him noving in with someone lew was not that exciting. Living in a dorm room lone, I had more room. I ould run around naked nd no one would know." Takashi was not ompletely at a loss, nowever, "My new oommate and I were riends before he moved n. Now we are even etter friends than we vere." Takashi's past xperience helped him get hrough the transition of
having a new roommate.
However, Stephen Yogya, freshman in Aviation, did want to move in with someone he had known before. "I really did not care if I lived in a single or a double in the dorms in college, I just wanted to meet someone new." Yogya mentions that there were both good and bad aspects of living in a small room with someone else. "We get along pretty well, but sometimes we want to kill each other."

# What did <br> I miss out 

The things that we wonder whether or not we should have done before we graduated from the University of Illinois. There is a huge list of things that we, as students wanted to take ad vantage of in our youth, but unfortunately because of many lost weekends and nights were unable tc do them. So, for all of the underclassmen, you might want to start making your list and getting those things accomplished before that eventful day when you get to leave Champaign-Urbana.

- Stand in the ellipse in front of Foellinger Auditorium and yell.
- Climb to the top of the Armory and write grafitti.
- Climb up on the Alma Mater to take a picture.
- Drink the wall at O'Malleys.

- Go to a U of I equestrian show.
- Have sex on the Quad.
- Do a bar crawl.
- Eat a Murphy's megacheeseburger.
- Go movie hopping at Savoy Theater, but only pay for one.
- Get those workouts in at IMPE.
- Drive over the Quad in your car (motorcycle).
- Stand all night in line to get lottery tickets for a concert.
- Dive over the balcony into the pool at IMPE.
- Pull an all-nighter with friends.
- Eat a large serving of peanut butter fudge ice cream from Delights.
- Devour one (or more) La Bamba burritos in a day.
- Try to beat the Homestretch restaurant haystack eating record.
- Go meet the bell ringer at Altgeld some afternoon.
- Travel around the Quad in the steam tunnels.
- Get caught shacking the day your parents come to visit.
- Take an exam cold.
- Get your car towed and get revenge on the parking meter people.
- Go streaking across the Quad.
- Win a debate with Mad Max.
- Have bloody mary's and doughnuts at CO Daniel's on a Saturday morning.
- Climb on top of the Assembly Hall.
- Rollerblade down the Memorial Stadium ramps.

You should try just a few of these before going into the "real world" after graduation.

## Wheelchairs in ${ }^{2}$ Winter Wonderland

For most students at the U of I , getting to class in winter means walking blocks in the icy cold, trudging through snow, and slipping on frozen pavement. They grumble and complain, and some students don't even go.
However, what would students do if they not only had to go to class in inclement weather, but also in a wheelchair? This is reality for the campus' wheelchair students.
Mike Rembis, senior in LAS, said, "Winter is the worst. This campus is pretty accessible, but the snow and stuff gets pretty bad."
Accessibility was one of the main reasons Kathleen Madayag, senior in LAS, chose to attend the $U$ of $I$. However, winter weather often limits that accessibility
for her. "It just makes it harder to get around, and I don't have any traction on my wheels. Ice isn't that bad, but soft snow I can't get through."

While a snowless winter would be very helpful, it is not something that is likely to happen.
"It's one of those nature things you have to deal with," Tom Jacobson, senior in LAS, said. But, he admits "it can be tough getting around...the snow removal is usually pretty good, but it can't always be the best." It would be helpful though, he believes, if they would clear snow throughout the day if there is accumulation.

The snow removal also hinders the campus' accessibility for students in wheelchairs.
"They need to be aware that when they plow the
streets they push it to the side, which covers the curb cuts," Madayag said. This makes getting around campus more difficult.

The bus routes make it easier to get places in winter, and are often used.
"I take the bus everywhere in winter," Rembis said. "Sometimes I take the MTD, but most of the time I take the rehab bus."

Despite bus routes and snowplowing, getting to class in winter can still be very difficult for wheelchairdependent students who have concerns other students probably never worry about.
"If it's snowing really hard it makes me think twice about going to class. It gets slippery, which makes it easy to get stuck somewhere and get frostbite," Jacobson said.

## The Search To End

O.K., so you've lived in the dorms long enough, you're ready for a change of scenery, it's time...to get an apartment. The search for an apartment on or near campus can be a long and tedious process. From going to look at apartments, to finding roommates, to finding a good sized place within your price range, to locating an apartment that isn't a mile away from everything can be quite a chore. It's enough to drive you into an insane asylum. "The worst part about looking for an apartment is finding one with rooms bigger than a closet, a kitchen with stoves made after the ' 60 s , and a living room you can actually live in," Melissa Brink, junior in Communications, said.

Luckily, students have
the advantage of being able to utilize the Tenant Union. The Tenant Union, which is located in room 326 of the Illini Union, provides many services to help students find suitable apartments. The Tenant Union provides a lease review service where students can bring in their leases, preferably before they sign it, to insure that there are no problems or hidden clauses that can cause problems for the renter in the future. The organization also keeps complaint files on landlords so that the student can check up on prospective landlords to see if there were any problems in the past. The Tenant Union is also there to help students who may be having problems with their landlord, such as repairs and damage
deposits. The staff at the Tenant Union will also talk to landlords on behalf of the students if any problems arise. Celeste Cece, junior in LAS, said,"I used the Tenant Union to check over my lease. I have to admit that I felt more secure about signing it after having it checked over."

Out of all of these services, students take advantage of the complaint files on the landlords the most. Ester Pat, Director of the Tenant Union, said," That is the most advantageous service we provide since most of the problems that arise have to do with landlords. Approximately 6000 households per year come in to check the files before leasing an apartment." Another resource that is

## Jife in the FASTLANE

Almost everyone has had an Resident Advisor (RA) at some time and probably remembers at least one thing they did. Maybe your RA helped you with your homework, unlocked your door when your roommate locked you out or showed you how to use a computer. These are only a few of the more visible roles of an RA, but behind the scenes they are also called upon to be crisis managers, conflict mediators, authoritarians, fashion consultants, fire marshals,
academic counselors, bulletin board artists, repair persons, motivators and organizers.

After realizing everything an RA is asked to do, you may find yourself wondering why anyone would want this job. You may think they must be doing it for the "free" room and board. However, any R.A. will tell you that this is not the case. Mike Sundberg, senior in Agriculture, said, "It's not a job; it's an experience." Seeing the Resident Advisor
role as a set of assumed responsibilities seems to be the only true way of describing a position that requires such knowledge, flexibility and energy. "l thought I could make a difference. I thought I had a lot to teach and a lot to learn and becoming an RA seemed a good way to accomplish both," Rashied Robinson, senior in LAS, said. Shelly Pesek, junior in LAS, said, "I wanted to influence the lives of others."

The benefits of this job
obviouslyaren't financial ones; instead, they are personal ones. Being an RA offers one an opportunity to learn about themselves as well as make an impact on the lives of others. As a student in the classroom you can learn about statistics, English and science. However, as a Resident Advisor you can learn about yourself and others as you never have before.

you picture that professor of yours in his suit and tie canoeing with a group of students? Seems unlikely. Or maybe not. Thanks to Illini Excursions, faculty and students have the opportunity to interact with one another on a more casual basis. Judging from the response of the current participants, the program will only become even more a part of residence hall life.

Illini Excursions began operation Spring Semester 1990 as a way for residence hall students to interact outside the classroom with faculty members in all fields. Another goal of the program is to show students the variety of cultural and activities within a three hour radius of Champaign-Urbana. The Office of Residential Life, with the cooperation of Resident Advisors, brings programs to undergraduate and graduate residence hall students at little or no cost. The volunteer committee plans details of the programs, confirms faculty participants, and seeks Resident Advisors to confirm
and host programs.
Response by participating faculty has been very positive Professor Ziegler, accountancy has been involved in fous excursions since the beginning o the program. Participating give him "a chance to meet witł students on a purely social basis.' Students might be surprised to learn the talents their professor: have outside the classroom. Fo one of his excursions, Professo Ziegler cooked dinner for the group before they attended Krannert performance. Professo Ziegler went on to say the Illin Excursions are "a good diversiol for faculty and very worthwhil for helping students to feel the do matter."

Faculty are not the only peopl with good things to say abou Illini Excursions. In the minds o many of the student participants the program has met its goal o connecting students and facult. in a variety of activities. Miss? Comenduley, junior in CBA participated in a May 1992 raftin trip with a faculty friend. It "gav me the opportunity to di

# classroom 

mething I never had the chance do at a reduced price." Of culty participant T.J. Jacobs, omenduley said he "was an tive participant in the excursion. aculty participation allows us to e professors as people and not our educators."
Faculty Friends/Illini xcursions has become a huge access. Students main complaint that there are not enough spaces railable for certain activities. As e program grows and becomes ore recognized, a larger number faculty members have signed
on to be a part of an activity Students, too, are signing up in record numbers. Among the programs for Spring 1993: horseback riding, canoeing Krannert events, Chicago Blackhawks games, and the Chicago Museum of Science and Industry. These trips are usually priced under \$10. While enjoying these events, faculty and students alike have the opportunity tolearn more about each other and create an interaction that is usually missing between students and faculty on a campus the size of U of I .

In the future, the planning committeeshope toexpand the types and numbers of programs and faculty and student participants Long time residents of the area have a great deal to offer the newer students that are unfamiliar with all that Central Illinois really does have Faculty have the opportunity for closer, informal contact with students in and out of their field. Illini Excursions then showsstudents that the faculty do have more to give us than tests and long lectures.

Have you ever been in the mood to see a quality performance but, like all other college students, you don't have the money for a ticket? The answer is the Armory Free Theater. Almost every week students put on a different production. There is always something going on in the Armory Theater.

Each production is staged and directed by students, some of whom are advanced theater majors doing their senior theses. Some of the
productions are also chosen by the Illinois Repertory Theater (IRT), but are still run by the students. All of the productions are funded through the University. The main contributors to the Armory Free Theater are the Student Organization Resource Fund (SORF) and IRT.

For the most part, students have become involved through word of mouth. All of the auditions are open to anyone interested in trying out. Since there are many
different productions, there is bound to be a part for every actor. Another advantage of the Armory Free Theater is that it provides a creative outlet for students to whom acting is merely a hobby. "It is a great opportunity for students who are not theater majors to get involved in something they would not otherwise have the chance to," Kathi Brandolino, senior in LAS, said.

Jim Harper, junior in LAS, said,"I really enjoy being
involved with the Armor productions because th people are great to wor with and it is a really tight knit group of people wh really do work wel together."

Whether you're an acto or a spectator, the Armor Free Theater is a great thin to check out. It is a fu alternative to the usua Friday night activities, an the best part about it is tha it is FREE.

# Dily a11 V the Life of $\begin{aligned} & \text { the Fighting }\end{aligned}$ Illini Grind 

Just how do the Illinois Football players spend their time before and during the season?

For sophomore linebacker John Holecek, lifting weights is routine all year round. "We have optional lifting days during the season in which one half an hour of lifting is mandatory. It is important for people to make the most of their time in the weight room because weightlifting is a key way of staying in shape. Lifting weights is a big part of my
daily routine because it is important for me to maintain a certain strength level throughout the season. Also, during the season, we spend a lot of time viewing films of other teams."

As far as Holecek's off season goes, he lifts weights fivedays a week and runstwice a week. According to Holocek the summer months are when he pushes himself because spring ball is hard and it gets him ready for the upcoming fall season.

Conditioning isalsoacritica segment of sophomore kicke Chris Richardson's off-seasor routine. "For the next four tc six weeks, the whole team wil be running together. We (the kickers) do drills with the tigh ends because our training is the most similar to thei, training. We jump rope, sprin do and general station drills This helps keep me and the other guys in shape during the off season," Richardson said.

During the actual season, the players, including Richardson

## Art

Some students at the U of I ctually take classes for the fun of it.
Ray Carlini, senior in Communications, enjoys aking art classes. After a year t the College of DuPage, Carlini transferred to Illinois s an art major. "Ilike to draw, nd I'm pretty good at it. What's better than having a job fter graduation I like."
AfterCarlinitookafewclasses, e realized art was not that easy. tandardshereweredifferentthan t junior college. "Where I came rom, professors wanted realistic rt, but here, they want abstract. I lidn'thavemuchexperiencewith hat."

## EOr Fun

With the change in demands came a change in major for Carlini; he transferred to advertising. "I want to be an advertising art director after I leave."

Charlotte Kleiboeker, senior in CBA, took Art and Design 107 which worked with different mediums, but was essentially just a drawing class. "I had never taken an art class and thought I should learn to draw."

With friends who are art majors, Kleiboeker was encouraged to take the class. "It turned out to be fun. It was relaxing, which wasdifferent."

For Carlini, practicing is
essential to hone his skills. He designed ads for the Interfraternity Council and shirts for C.O. Daniel's.

Carlini still puts in a lot of time in his first love. He took art classes after he changed his major. "I might as well take a class I enjoy and can get a good grade in."

Since Kleiboeker is about to graduate, she will probably never have hands-on contact with art again. She regrets this. "I wish that I could have taken art classes sooner because I would have taken more of them," she said.

## THE SMELL or RASH

Most would agree that mendacious tabloids such as The Star or The National Enquirer are not the most credible information sources; some would describe them as journalistic slumming or intellectual rubbish. Maureen Umeh, junior in Communications caught in Walgreens with The Star said, "My friends know I'm a clothes horse. I like to see what the stars are wearing, and I look for funky fashions. But as far as reading it, I don't believe a word they say."

Students found in The

Bookstore on First Street, however, were definitely not hunting for fashion advice. The Bookstore, opened in July of 1992, caters to an adult audience, specializing in used romance novels and soft/ hard core pornographic magazines. Faye, a cashier whose been with The Bookstore since its opening said, "Our clientele consists mainly of men aged 18-80, but we can thank Illinois students for our big success. If we had to depend on the love novels, we wouldn't make it."

The Bookstore charges anywhere between \$3-40 for a magazine and also deals in magazine trade. Apparently, The Bookstore is one of only two adult bookstores in the Champaign-Urbana area. "A lot of this you can't buy in the drugstore. We get triple $X$ rated stuff shipped in from Chicago and California," Faye said.

When student patrons were approached for comment, a simple interview turned into an awkward game of question evasion.
"Um, I really don't wan to talk about it," one studen after trading his $\$ 20$ bill for a fleshy cover of Oui, said Another student took on glazed expression anc bolted for the door, clinginध tightly to his brown pape bag. Evidently thes individuals' deep fantasie did not consist of going public with thei pornographic interests. Sc if you're hung up on The Enquirer, don't feel to guilty. You have yet tc really smell the trash.

# INTERRACIA 

Many interracial relationships exist at the University of Illinois, however, a great deal of student's opinions vary greatly about this issue. Couples involved in interracial dating, as well as those who are not, undergo many mixed feelings including confusion and curiosity.
"In general, it is more common and more accepted now than in the past," Rachael Arnold, freshman in LAS, said. Years ago, mixed relationships would not
even be considered, but since then these bonds have been broken. People are now more inclined to follow their feelings. Horizons may have been broadened, in part, due to the publicity of interracial dating in movies such as Jungle Fever by Spike Lee.
"Sure I find it difficult at times, especially being excepted by both crowds," Megan Moulden, freshman in LAS, said. Students encountered problems with being stared at and looked down upon. Another
obstacle is that often many parents are understanding yet not supportive.
"If you are truly in love your girlfriend's race does not matter," Marty Hogann senior in Engineering, said Love is the most importan ingredient in a relationship The feelings and opinion of society can be dealt with if two people love one another. Difficulties with marriage and children may occur, but in the end love is universal.

## LAS

## "Oasis

Are Kennedy Center Lincoln Center and Krannert Center alike? Many U of I students would be surprised to know that amid the cornfields of Central Illinois, on their own campus, is one of the great performing arts centers in the world: Krannert Center for the Performing Arts (KCPA). Time called Krannert "arguably the finest performance art facilities in the nation."

Within this center, housing four distinct theaters, including one of
world, performers such as Itzak Perlman, the Chicago Symphony Orchestra Pavarotti and the Miami City Ballet have showcased their talents.

What makes KCPA truly exceptional is its commitment as a teaching facility. Eighty-five percent of the annual performances are student productions. Students in the Music, Theater and Dance departments work all aspects of production from design to construction. "The best thing about Krannert is that it allows us to do

Public Services Manager, said.

The facility is maintained by many different staffs; Theater, Music and Dance department faculty and students; and the Krannert Center Student Association one of the largest student organizations on campus, which provides ushers, tour guides and production crews. "Being a volunteer at KCPA has allowed me to expand my cultural horizons and get involved in the performance arts," Michael Peter, senior in LAS, said.
lesser lesser
t the
construction and use of KCPA while exploring the entire center, from the theaters to the lower levels teeming with activity ir preparation for many shows. Guests art frequently awed by the evident professionalism The tremendous efforts are apparent when patrons set the end result on stage.

Because of a firm belie that the entire community should have access to Krannert's performances no ticket is ever priced more than $\$ 39$. Identical shows ir Chicago or New York car well exceed this price. Ir order to encourage students

o experience the different events, a special discount is offered. A student eferendum that was passed overwhelmingly this fall, will bring a $\$ 5$ discount on ickets for most shows, naking ticket cost within each for more students. The opportunity to see the inest performances in heater, music and dance is eadily attainable for nterested students and community members. "Everything is here. What nore could you ask for," said Donelle Bires, graduate student.
story by Rebecca Sushak layout by Monica Soltesz

As part of a behind the scenes tour of Krannert, Sonia Budach, junior in LAS shows off the set of a production. The high quality of Krannert is not only evident in its onstage performances, but also in the care to design intricate sets, props and costumes.

dvising, 45 university-credit ourses, housing faculty, and much more," said Lisa Bos, ssistant Director of Unit One. ne major goal of the program to build a community with verwhelming opportunities nd options in order to make te hall more than just a place eat, sleep and study. This rogram provides the learning rat does not happen in class. "Unite One is en exciting, novative, pro-active, ducational opportunity for udents to get their teeth into ducation with many outlets interest," Christine Heitsch, rogram Advisor of Unit One, id. As a program advisor, eitsch helpsstudents organize eld trips, language tables at nner, lectures, workshops,
media, art shows and other programs dealing political and social issues. Some of the shortterm workshops have included: massage, bike repair, selfdefense and others.
"One of the main focuses of the program is to increase out-of-class interaction with students and faculty," Howard Schein, Director and Academic Advisor of Unit One, said. To increase this interaction, each floor has a faculty friend and each of the courses offered in Unit One have more of a personalized environment.

One of the most consistently successful programs has been theguest in residence. Students have a chance to meet ordinary
people with extraordinary interests in a variety of fields. This year guests include: saxophonist and political activist, Fred Ho; choreographer and performer, Lisa Fay; Olympic gymnast, Nancy Theis Marshall; educator andpeaceactivist,Mary Dandov; poet and social worker, Rozena Maart; and Native American activist, Vernon Bellecourt.

Every year at Unit One/Allen Hall isfreshand uniqueduetothe
students' and program's flexibility. Overall, the program encourages expression on individual and collective ideas and interests. As a living and learning center, Unit One provides an educational environment to meet the needs and expectations of its residents.

# Saving <br> Residence Hall recycling programs are growing fast. 

Recycling has quickly become a large part of daily life. Everywhere you go you see a container for recycling anything from office paper to plastic and aluminum. Even the residence halls have taken an active part in the quest to help the environment.

Four years ago, the residence halls began a program to make it easier for students to recycle. Since then, the program has grown as well as the number of participants. The
program includes all undergraduate and graduate residence halls, the student and staff apartment complex, and the family housing in Orchard Downs Students and staff are able to recycle aluminum cans, glass bottles, newspaper, office paper and plastic. Pick-ups are made at each of the residence halls daily, especially at the larger halls such as the Gregory Drive Halls and Illinois Street Halls. Karen Petroskey, freshman in FAA, said,"The
only problem I see with the recycling program is that the bins in the larger dorms get really messy, but it's great that people are using them."

The organization of the program makes it so easy to recycle almost everything that no one has an excuse to throw away recycleable items. There are recycling bins in every laundry room, lobby, vending area, and near every trash can in every residence hall on campus. "I am very pleased with the amount of participation I
have seen in the recyclin program. It seems as thoug we have mainstreamed large number of studen into recycling. They see to expect the recycling bir to just be there," Vonn Ortiz, Assistant Director C a mpus-Housin Recycling, said.

Everyone has heard abol the importance of recyclin everything possible. Th recycling programs th have been installed into th residence halls and aroun campus makes recyclin much easier. "I don't thin anyone realizes just ho much garbage we actual produce until we see a lot it being recycled," Petroske said.

# BLACK POETRY 

Poetry is a made up arrangement of words written or spoken, traditionally which flows in a rhythm that expresses the way an individual feels. There are a lot of feelings boiling inside the Afrikan American students on this campus, and they need an outlet to openly express exactly how they feel. Noelle Samuels, senior in Agriculture, and a few friends put together Peppa's, an open poetry session held every other Friday in Clark lounge at

7 p.m.. It is open to the general public, and anyone can sign up to recite their poetry on that night. Refreshments are also sold for intermission which consists of home-baked goods such as brownies cakes, pies, and shrimp rolls
"Peppa's is a very positive way to express your concerns on the problems in the Afrikan American community. It is also a good way to express your love for your people or your man. Peppa's is
a way to bring Afrikan together in a positive an personal setting, which i much needed in the societ we reside in today, LaTacia Morgan, junio in Communications, said

There are many issue brought to the forefron in a Peppa's set, such a love, hate, oppression disunity and sex. "Peppa" is fun and entertainin as well as educational. guess you could call i 'edutainment'. It feels lik we are one big famil sharing our inner emotion

# Is Three ompany or a Crowd? 

We've all heard the horror stories- a person comes home late from a night at the bars only to find the tell-tale neck tie hung on the doorknob, signifying yet another restless slumber on a lounge couch. For some students, having a roommate with a live-in boyfriend or girlfriend means constantly having to find other accomodations, but for others, having another "roommate" is not that much of an inconvenience.

Jackie Atallah, senior in

LAS, shares her apartment with one of her sorority sisters and her significant other, who rents another apartment but usually ends up at Atallah's six or seven nights a week. Despite the living arrangement, Atallah said she doesn't much feel like a "third wheel."
"It would make me feel uncomfortable if I didn't know him that well, but Tucker and I were friends long before he ever met Jill," she said.

Three's company according to Atallah, since
"having him around is lik having my brother arounc - without the fights."
"They hang out with m and they don't exclude me It could be a lot worse, Atallah said

One of the few drawback to living with a couple Atallah said, is an occasiona twinge of envy.
"Not having 'a friend myself sometimes makes mı uncomfortable," she said "Sometimes it gets really depressing watching then together all the time."

Having a live-il boyfriend or girlfriend doe also have its drawbacks.
"My roommate's boyfrien came to stay with us for thi weekend and he ended $u_{1}$ staying for a whole week. AI he did was just sit on th

# Cramped Olaters 

## Students in the Broadcast Journalism Department thrive despite their small classroom

Under 100 students, 36 graduating seniors, four professors, two computer labs, one room devoted to radio and another devoted to television make up the Department of Broadcast Journalism.

Broadcast journalism is housed in the basement of Gregory Hall, jammed amidst the other disciplines of print journalism, advertising, media studies, history and philosophy. The radio room is in 41 Greg and it is barely the size of a normal classroom. It is split up into four smaller rooms, some of which barely fit one person comfortably. The television editing room, which is smaller than an ordinary classroom, is split into three editing bays.

Although this lack of space can be a hassle, Kyung Lah, senior in Communications, said that it has its good points. "It forces us to get to know each other, sometimes too well."

Since the discipline is so small, the students get to know the professors as well. Most interaction with the teachers and the professors is on a first name basis, but there is still a lot of respect between the two, "I have learned a lot from my all of my teachers. They have all had experience in the business and have an incredible amount of knowledge to pass on to us," Lah said.

But many good things come out of this major. Not only does it prepare its
students to go out into th work force, but it gives som students real experienct Jornalism 291, Broadcas Documentary Production, producing its fourt documentary. "We ar making a documentar based on the American wit Disabilities Act, which w plan to air locally and acros the country if we can," Lal one of the documentary producers, said. The thre previous documentarie have been aired on WILL.

So next time you wal through the basement c Gregory Hall, remembe that there is a disciplin hidden behind the bi wooden doors - broadca journalism.

## Veging <br> 1 Everyone is a vegetable at one point in time, <br> chance."

No one likes vegetables, but everyone does like to "veg out." Some like to plan their rest and relaxation right into their daily schedule. For others, spacing out just comes naturally at any time. And some unlucky folks have no time (or so they say) to act as their favorite veggie.

Watching TV seems to be one of the most common pastimes for some of U of I's vegetables. Dan Evers, junior in Agriculture, said, "I'm a couch potato. I watch TV between classes, at the end of the day - whenever I get the

Alice Pearson, sophomore in CBA, finds herself vegging out in front of the TV in the evenings and on Sunday nights. "When I veg out, I become a piece of broccoli because I just lay there and I'm tall, but not leafy," Pearson said. Zoning out makes her feel more relaxed and at ease.

Watching cartoons and movies are right up there with the veggie fanatics. Albert J. Lenkaitis, sophomore in Agriculture, said, "Watching cartoons after studying really helps me think better." Rob

Penington, sophomore in LAS, eases his troubles by watching movies. "I watch movies on weekends and in the afternoons. I'm positively addicted," said Penington.

Others find more exciting ways to relieve stress. Heather Russell, freshman in LAS, releases her energy mostly during the evening and on weekends. "I like to dance around the room," said Russell. When she vegs out, Russell imagines herself becoming a piece of asparagus.

Kyle E. Klein, junior in CBA, relaxes by reading
books and watching movies "I'm a mushroom, becaus even when I'm vegging out I'm still a fun guy (fungi), said Klein. Like most othe U of I students, Klein rest in the evenings.

Everyoneloves to "vegout. Some people do it by staring a a blank wall, while other mor ingenious veggies watcl television or go for walks. N matter what anyone says though, you will see ever student on this campus actind as his or her favorite vegetabl at some point in time.

## pthe river

## down the

Throughout the years drinking has been characterized in many different lights from purely ceremonial to something that old friends do on their porches, or to a seemingly necessary vice for everyone to participatein. One popular way to drink alcohol is to play drinking games.

According to Daisy Castanares, sophomore inLAS, some of the most popular drinking games are 'Up and Down the River,' 'Queens,' 'Thumper,' 'Chandeliers,' and 'My Mother's Odd, but not Peculiar.'" Some games involve coordination, while others involve mental concentration.

The reasons for playing games are pretty similar. Sven Rasmussen, freshman in LAS and PiKappa Phimember, said "I always get fucked up and
don't know whether I win or lose...What's the point of the drinking game if you end ur the most sober?" Rasmusser plays 3-man, which involve rolling dice to see who drinks

MarieSantos, sophomoreir LAS, said, "To get drunk anc because they are fun."

Aron Smith, sophomore ir CBA, said, "Drinking game are a lot of fun if you want to get messed up. It's a socia thing, and it always ends up ir a good time...A bunch of people can be involved and everyon wants to drink...They are especially good for mixe parties or if you just want tc drink lots of beer." Josl Barrington, sophomore ir Engineering, plays a rhyming game called Wales Tales. H says that drinking games are "...just a reason to drink."

Drinking games are very

When most college students get the munchies, they call up the pizza place of their choice and approximately 30 minutes later, a hot, cheesy conglomerate of their favorite toppings arrives. The pizza gets torn into ravenously, everything else forgotten. But what about the delivery person? Surely a person of such vital importance to college students deserves some thought considering everything he or she has to deal with in serving a town often filled with drunken revelers.

Eugene Peppers, senior in Agriculture, knows firsthand about the downside of dealing with college kids. As a delivery person for Grog's Pizza, he has been assaulted while on the job. "I was punched once when I delivered to a fraternity, but I won't name any names."

Peppers has also
encountered some rathe bad luck. Not only has ht been involved in threr automobile accidents, buthr has even had his car stolen He came outside after delivery, and his car has dissappeared. "I still hac one pizza to deliver, though so I walked to Champaigi Surplus, where it wa: supposed to be delivered and then called the polict from there. My car showed up about a week later, but i was minus the ashtray."

Despite his bad luck Peppers still likes to do hi job. He said he applied fo the job because of his lack o funds and "for thr glamour." $\mathrm{He}^{\prime} \mathrm{s}$ seriou: about the glamour part he once had to deliver to group of high schoo students that were attendin a theatre convention. "They all asked me for my autograph and wanted ti have their picture takel

ith me," Peppers said. Bryan Weisberg, junior in BA and delivery person for izza Hut, has also had a ew interesting incidents ccur. "I've had pizzas olen out of my car before. ctually they took verything - the pizzas, the ag, the soda," Weisberg aid. However, he still likes is job since "it's good oney."
Students are often not ontributors to the "good oney" made by delivery rivers. Notorious for being oor and frugal, college udents often do not tip the eliverers. "Students, specially at the dorms, on't tip," Weisberg said. Peppers
concurs. Students usually do not tip rivers. Most of the tipping mes from people no inger in school or from sidential customers. But rery once in a while a udent does."

John Langreck, senior in Engineering and delivery driver for Papa John's Pizza, finds that tipping occures in extremes. "They're usually pretty good. Most of the time it's either no tip or a pretty good one, like a dollar."

Overall, it seems as though most delivery drivers like what they are doing. The job usually provides flexible hours and better pay than what other jobs, like a fast-food restaurant, offer. It took a tutoring job that paid the same as what he earned at Domino's to get Dean Banerjee, graduate student, to leave his delivery post. "I figured doing math tutoring would be more helpful in the future, since math is what I'm studying. But I'll probably go back this summer."
story by Kim Miller

# CHEAP DATES!! 

Many women, and even some men, want to be wined and dined and swept off of their feet when it comes to prospective lovers. People have had to come up with new and creative ways to have fun on campus with a significant other or with a group of friends. Late loan installments, little pay checks, no paychecks and all around poverty among college students are just some of the reasons students have learned to be swept off their feet with little money and lots of imagination.

One thing this campus is good for is good cheap food. There's McDonalds, Burger King, Pizza Hut and a host of bars. On Wednesdays, the White Horse Inn on Green

Street offers 10 cent buffalo wings when you buy a pitcher of pop or beer. Both of the Espresso Royale's on campus offer cool coffee and hot chocolate at low prices.

The Residence Halls have free movie nights on Fridays. The Illini Union Board offers movie nights periodically throughout thesemesterforonly $\$ 2.50$. That's Rentertainmenthas videodeals depending on what day of the week it is and the Co-Ed Movie Theater, on Green Street, has Two Dollar Tuesday movie night.

We can't forget the Illini Union, where you can socialize in the Down Under, play pool or go bowling for a dollar and half a game.

Some couples or friends
decide to use campus recreation facilities to meet and get to know each other Campus Recreation Center East, commonly called Wimpy hasbrand new nautilus, weight and step aerobic classes and equipment. The Ice Arena has open skate with skates renting for a dollar. IMPE has basketball courts, ar indoor and an outdoor pool a sauna, weight rooms volleyball courts, tennis courts, and much, much more. All of these thing just mentioned only cost a flash of your I.D.

# The Unofficial Guide to Snacking 

Unfortunately, staying up late is a part of everyone's life here at the $U$ of I. But whether a student is whining about how much work he has to do, or if he's actually doing it, finding yourself hungry doesn't make the situation any better. As Sun Kim, sophomore in LAS, said, "When you've got the munchies, you've got to fulfill that craving, dude!" There can never be too much emphasis put on snacking because sometimes it can make all the difference.

The first unofficial rule to snacking is availability. If its not easily accessible, forget about it. Try to focus energy on eating things that are within reach. This is
easy if a well stocked refrigerator is nearby. "Whenever I feel like snacking, I visit my next door neighbors!" Calliope Nicolandis, freshman in LAS, said.

However, try not to get too carried away. Always check for visible signs of age before ingesting. Another option would be to order the proverbial pizza. It may take a little longer, but it's well worth the wait because a pizza can turn a lonely evening into a happening party.
The second rule to snacking is cost. In the middle of the night it's not probable that a student is willing to shell out a lot of cash for food (unless their
judgment is impaired fror lack of sleep). Now is th time to open that packag from home. It may contai edible items. Another goo option is to buy anythin that only requires change fo its purchase. "I keep a jar c change in case I have to ru to the vending machines, Ben Kogan, junior in FAA said. This isn't alway practical and clippin coupons might be a goo habit to get into.

The third and last rule enjoyment. Rosett Cordero, freshman in LA: said, "While I'm doing $m$ homework, I just like to hav a snack." The purpose snacking is not just to $g$ ! rid of those pesky hunge pains but to also perk $u$

Susan K. Nelson, Ridge Farm Tammy W. Nelson, Woodstock Grant L. Nesheim, Bartlett Theresa V. Nguyen, Champaign David P. Nicholls, Urbana Pamela Nicoski, Melrose Park Sally J. Niermann, Elgin Soheil Niku, Burr Ridge

our attitude. Therefore, earch for foods that are fun eat. A good suggestion ould be anything crunchy chewy. Don't have too uch fun, though, or the eighbors will start to mplain.
Some people believe that y kind of snacking is a ivial part of many udent's college life, but in tuality it is an art form tat should be taken riously. If used to the ght advantage it can make our college experience a uch more pleasant and ajoyable one. As Tina reen, sophomore in LAS, id, "Live to eat, at least at 00 in the morning!"
story by Jill Kogan layout by Peggy Christensen

Many University of Illinois students heading home for vacations or holidays have made their travels easier by riding buses provided by Suburban Express. Suburban Express was founded in 1983 by then sophomore Dennis Toeppen. At that time, Greyhound offered travel services to University students. Toeppen, who graduated in 1987, felt the service provided by Greyhound was poor and thought he could do better himself. That first year, Suburban Express ran only a Thanksgiving shuttle and its success warranted the company's gradual expansion.

Today, Suburban Express runs an average of 20 to 25 buses per week to the Chicago suburbs and back to serve University
students. Suburban Express also provides service for Eastern Illinois and Illinois State University students and runs shuttles to $\mathrm{O}^{\prime}$ Hare and Midway airports. The busiest times for Suburban Express are Thanksgiving and Spring Break. This year, the company ran over fifty buses to bring students home for Thanksgiving.

Students can purchase Suburban Express tickets for an average of $\$ 15.50$ one-way and $\$ 28.95$ round-trip. The buses pickstudentsupatfour different locations on the University campusandmakeeightdifferent stops in the Chicago suburbs. Woodfield Mall in Schaumburg is the most popular suburban stop, with Oak Brook a close second. The buses, which are privately owned and chartered
from different companies, ar equipped with air conditionin study lights and a washroor for the students' comfor Courtney Chapman, freshma in education, said, "The buse are very comfortable. There i plenty ofroomand the triphom always seems to fly by."

Students can purchas tickets at the Suburba Express ticket office on th upper level of Johnstow: Center. The office is staffe by eight employees, al students, and owne Toeppen. Previously, th ticket office was located i the Illini Union Trave Center. However, the spac in the Union proved to small to handle the volum of Suburban Express customers. Student complained that during th

## foot fistand Aレナ

What is Tae Kwon Do? It is a Korean martial art that literally means foot, fist and art. Certainly one is impressed by its array of kicks and punches, but it embodies more than just the physical aspects. Under the leadership of Master Nam Soo Hyong, a fifth degree black belt, the Illini Tae Kwon DoClub offers a cooperativeatmosphere for selfconfidence and self-dicipline.

The Illini TKD Club has two goals for its members. First, the training provides the physical fitness and ability to defend oneself. The three sessions per week improves the strength and technique of each member. Second, it increases discipline
which can be carried over to other aspects os one's life, such as academics. Jeff Balour, freshman in CBA and new Illini TKD member, said, "I wanted to train my mind and my body. Also, 1 wanted to develop a greater confidence in myself."

Perhaps, the ultimate goal of all members is to achieve a black belt, which takes at least four years of hard work and dedication. However, Rajeev Goel, senior in Engineering and club president, said that a black belt actually signifies "a new beginning. It's a time to make Tae Kwon Do an art of your own. Belts are simply an evaluation of one's progress.'

## OU

For Fighting Illini Men's Basketball Coach Lou Henson, beating Penn State 82-66 on January 21 at the Assembly Hall was another milestone in an impressive coaching career.

This victory marked the 600th win for Coach Henson, becoming only one of 16 head coaches to win 600 games. The win put him right behind Indiana's Bobby Knight and Missouri's Norm Stewart for most career wins. Adolph Rupp holds the all-time record with 875. Coach Henson is very grateful to those who gave him the chance to coach. He said, "I want to thank the administration of HardinSimmons University for giving me a major job at the age of 30 . After that I went back to my alma mater, New Mexico State and coached there for nine
years before coming to Illinois I want to express my appreciation to those peoplea those universities. Here a Illinois, the administration, the faculty, the student body, ou boosters, our support groups our alumni throughout the country, everybody. I'mhappy for my family, friends, anc team that we did achieve the goal. This was a team effort. It s nice to win 600, but I know i was a team effort."

Henson, in his 18th seasor at the helm of the Illinois basketball team and his 31s season overall, has postec some impressive numbers. Hi lifetime mark is 604-287, with $364-180$ record at Illinois. He guided the Illini to ninestraigh 20 win seasons and eigh consecutive

NCAA
Tournament appearances. He

# Greeks Fight Back 

#### Abstract

After they felt they had been unfairly treated by the Daily Illini, Fraternities and Sororities in the Greek System banded together to organized a boycott of the popular student newspaper.

Relations between the Daily Illini (DI) and the University of Illinois Greek System took a radical turn in November of 1992. In response to a November 11 article which appeared in the DI entitled "Greek Safety Committee warns of Sex Games," the 1992 Presidents of the Interfraternity and Panhellenic Councils voted almost unanimously to withdraw their advertising support of the DI. According to Katie Humpal, the 1992 Panhellenic President, "Thesex game article was the final straw, but relations between the Greek System and the Daily Illini have been negative and slowly deteriorating for the past 3 years."

The boycott of the Greek system included the withdrawl of advertising support, in the form of personals, ads,etc, from Monday, November 30 to Friday, December 11. The weeks covered by the boycott were the two weeks immediately following Thanksgiving Break and finals week. "The objective of the boycott was to increase the Daily Illini's awareness of the Greek System. We wanted them to realize that we were not pleased with how the Greek system was traditionally portrayed in the paper. We wanted to be treated more fairly and objectively,"

Humpal said.
However, as a result of the boycott and the increasec awareness achieved throughit the DI has taken steps ts improve relations with the Greeksystem. In the first week of the 1993 Spring semester the DI hired Mike Dizon sophomore in LAS, as thi official DI staff membe assigned to cover and follon the Greek system and it activities. The DI also added weekly column entitled "Th Greek Beat" which appear every Tuesday and detail currentevents within the Greel system. Humpal said, "Sinc" these steps have been taken' relations have improver and the stories have bees

very accurate. As long as this continues to improve, the Greek system is where it wants to be. The weekly column and reporter is exactly what we needed to receive accurate coverage." Besides improving elations, the boycott also acted as an internal boost for the system. "We finally stood up for what many had oelieved in for a long time, and it worked! It showed us hat when the whole system oulls together, we really can jet something done and mprovements made," Wendy Caughey, Alpha Phi 1993 President, said.
story by Theresa A. Robbins layout by Monica Soltesz

Themajority of personalsinthe Daily Illini are purchased by members of the GreekSystem. During theGreekboycott, very few personals appeared in the paper.

Can you imagine having your mouth completely swollen from one day to another for no apparent reason, not knowing one single dentist in the country, or how to say in English what is going on, and, to make things even worse, having your mom miles and milesaway? Being anexchange student can be tough sometimes, but it has its rewards.

The hardest period for most studentsis the firstmonth, when they are not here (as their minds and hearts are at home) nor at home (because...they are here!). Comparisons between home countries and the United States
at this point are almost always unavoidable, and because of a student's loneliness and homesickness, this country usually gets the short end of the stick. "Theinternationalstudent does not see the American culture as neither better nor worse, but different. It will be impossible to have complete adaptation," Domingo Lastra, an Argentine student completing his masters in Agricultural Economics, said.

When classes start the internationalstudent findsa new barrier that turns out to be a challenge: the competitive atmosphere so prevalent in American schools. "At home I

 Experienceised to worry about helping my riends study asmuch as I could, and would get happy when they ad a good grade, even better han mine. The grading curve nakesthestudents' livesharder and sometimes lonely," Ana Carvalho, a sophomore in LAS rom Brazil, said.
Once they feel more comfortablein the language and tart making friends, most of the exchange students get the best out of the experience because hey know that there is only one ear to enjoy and try every new hing. "Some of the students get nvolved in every possible activity-they get into plays, vork in interesting places, go to
different states every holiday and join many student organizations. Many times they enjoy the university even more than the American students, because they want to take advantage of the time they have in the United States," Diana Peele, Program Coordinator at the Study Abroad Office, said.

One thing is sure - the exchange students are never the same after living at the $U$ of $I$. Whether it is because of their friends, classes, or the freedom experienced here, one part of their hearts will always be orange and blue.

## Crusading for Christ

| Campus Crusade for |  |
| :---: | :---: |
| hrist | is | iterdenominational udent organization for hrist. Its main goal is to elp students develop a ersonal relationship with sus. Patty Montgomery, a of I alumna and a new ember of the Campus rusade staff, said, "The ost important question meone can have answered

'Who or what will I orship?'" This is just the nd of question Campus rusade tries to help udents answer.
"Campus Crusade for hrist does a good job of mmunicating who Jesus is ad how to let other people now about him," ontgomery said.
Campus Crusade is idespread, not only roughout the United tes, but also throughout e world. It is able to reach udents as far away as ussia and Thailand, and et as close as Purdue niversity and Eastern inois University.
Campus Crusade has two
weekly meetings as well as numerous social events throughout the year. Every Thursday night at 7:30 U of I students meet to worship Christ at "Prime Time." It's a fun way to meet other Christians while cultivating a relationship with Jesus. The meeting incorporates both humorous skits and activities along with a more serious message and devotional.

On Sunday evenings Campus Crusade meets for a more traditional service called $\mathrm{C}^{3}$. A sermon, along with singing and prayer, fills the hour.
"It's deep. It makes me feel closer to God," Dan Jonasen, senior in LAS, said.

Some of the other events associated with Campus Crusade are noon prayer hours and Bible study groups. Everyday during the school week, students get together at noon for a time of prayer. Students can make prayer requests or simply go to listen. Bible study groups are organized by members of the staff at

Campus Crusade and usually meet once a week. These groups allow students to take a close look at God's word.

Campus Crusade offers such social events as a tailgate party before the Dad's Day football game and a barndance. They also have a fall retreat. For 1992 it was held at Lake Springfield Christian Assembly in Chatham, Ill., and the theme was "More Like the Maker."

Colleen Houlihan, senior in LAS, has been involved with Campus Crusade for the past four years and has had the opportunity to experience many of the exciting aspects of it, including the fall retreat. "Campus Crusade helps students to know Christ and to help others to get to know him too." She summarized the goal of Campus Crusade for Christ when she said that it "helps students see how Christ can be relevant to their lives today."

people pee - Bill Luthy • Cluck, cluck, cluck — Bob • My eyes feel all mushy! — Ruth • I been talking about sex more than I been doing it! - Toi • Hey Friendly! - Cassie • I always have boy problems, but never a boy to have problems with - Jenna - Big sister is watching you - Laura

Winding up the year the University of Illinois took on many new challenges and said good-bye to more than a few faces. As the graduating class of 1993 prepared to go out into the "real world" with renewed hopes and aspirations of making it, the university seemed to look to the future as well.

The Board of Trustees introduced an incremental program to fend off the costs of inflation. Students in the Engineering College and many in certain fine art disciplines were made to pay higher fees for both lab classes and to compensate for budget cuts on facilities and equipment. All students were notified that starting in 1994 there would be an annual increase in tuition.

On a brighter note for students, the basketball team earned national recognition when they were invited to the NCAA tournament after a two year absence. Unfortunately, the team lost in the second round to Vanderbuilt University. The wrestling team also received recognition as they placed 23rd at the national tournament with three ranked wrestlers, their first winning season in almost 10 years.

Nationally there was over a month long stand-off between federal authorities and cult leader David Koresh in Waco, Texas. Koresh and his followers were being watched because of the massive amounts of weapons within the

At the WPGU-FM pregame football tent,
a student pours a cup of Leinenkugel's beer for the next person in line. Before each home game WPGU held a tent with live broadcasts throughout the morning and free refreshments and beverages provided by Taco Bell and Leinenkugel's.
compound. The world was shocked when terrorists blew up the World Trade Center in New York City killing and injuring many people. The Center closed for over a week as authorities assessed the damages. Tensions remained high in Russia as Boris Yeltsin became embroiled in a power struggle and both Israelis and Palestinians continued to raid each other.

The university faced tough times as the suicide rate skyrocketed and administrators created a task force to investigate the five deaths. Counseling was stressed for students who were considered at risk.

Students learned that there would be changes in the living situation in the

Residence Halls. Due to decreased enrollment, two floors at the Pennsylvania Avenue Residence Halls and two floors at the Florida Avenue Residence Halls will be closed until student enrollment increases. The Residence Halls are producing a promotional video, creating floors solely for upperclassmen, substance free floors and revised meal plans all to create a more desirable atmosphere for students to want to remain in the halls.

These changes, to both the university and the nation, made the year one to remember as students were made aware of the fact that we are all slightly different.

Midshipman 4th Class Will
Weiland, freshman in Engineering, gathers in the American flag at the end of the day.

Each branch of the armed services rotates the responsibility for raising and lowering both the

American flag and the
P.O.W flag at the Armory.

Leaving the doors of the Graduate Library, two students walk out into the blistery cold. The cold weather plagued the campus throughout the winter with some days reaching as low as 30 degrees below zero with the wind chill factor, forcing students
to stay inside.

throughout the Athletics section. Body copy, captions and head at 60 pt . are Tekton. The copy start at 250pt. was imported from Freehand in Freestyle Script. The Greeks section body copy is Palatino. Names are 8 pt . or 6pt. Palatino. Head 3 is 48 pt . Palatino. Head 1 and head 2 are 100 pt . and 60 pt . Symbol. The Organizations section body copy and names at 8 pt . are Palatino. Head is 48 pt . Palatino. The Graduates section body copy and captions are New York. Names are 8 pt. New York. Heads are individually designed using Freehand.
DESIGN: The Student Life, Academics. Athletics, Organizations and Graduates sections were designed with the input of the members of the production staff in consultation with the Editor-in-Chief, managing editor and production editor. The 100th Anniversary section was designed by the managing editor. The Greeks section was designed by the production editor. The
cover was designed by the Editor-in-Chie and managing editor. The endsheets opening, dividers and closing were designed by the Editor-in-Chief.
PHOTOGRAPHY: Graduate portraits taken by Yearbook Associates. Greeks and Organizations photos were taken by variou local photographers and supplied by the organization. Color photos were printed by Film Processing Limited and MotoPhoto. All other photography was completed by the Illini Media Company photography staff. unless otherwise noted in the byline. ILLIO is a division of the Illini Media Company. Volume 100 of the Illio was produced on a total budget of \$167,160 with $\$ 90.000$ going towards printing of the book. Allrevenue was raised by the Busines Staff through senior portrait sittings, sales of Greeks and Organizations pages and sales of yearbooks. No university funds were used to produce this book.

Who would've thought a year ago how we would pull together to produce this slightly different book. Now we can say it is done!

When we started out, all we could think about was how to celebrate the 100th book. We came up with the doublegate foldout. Now we just needed a theme, "Slightly Different." What an accomplishment.

We started off with a bang at Quad Day and all of that food and rain! Illio Extravaganza Day brought even more food. We have devoured at least 20 boxes of cake mixes.

When we weren't eating, however. we did manage to get some work done. Some of the more memorable sayings of the year were plastered on the "our sane thoughts" wall. Who could forget. . ."Is it sundown yet?". . ."I have to cancel my appointment because I'm having a bad hair day.". . .II want a good chair."

Trying to make Ruth talk about any subject so Meg could complete her SpCom project. Who could forget color deadline night when we were driving everyone home in the middle of the night to catch some zzz's. "Who needs anything at Super Pantry?" When Cassie found the Homecoming photos, what a surprise to find them in a Film Processing envelope! Oddly, it was one of the first proofs to come back from the color deadline. "Are there any photos?" "I don't want to hear that tape again, the tape player was hungry again!" "Bill is hungry again!" The day the sweatshirts arrived. The old issues in chronological order, "If you take one put it back exactly where you found it." Finally someone pulled the fire alarm at IT. The book arrives.

With all of the work that was put into this book we can all be proud. Section editors: Aimee, Kim, Theresa, Tina all of the frustration was worth it. The sections look great. Michelle,

Lainee, Amara. Debbie and Toi you had some strange articles to write, but you came through. Eric and Garen, Theresa's guilt trips worked. Stories were on time and you worked hard. All of you now have your name in print. Michelle and Hilary. who could forget the "b-c" crew. What do those letters stand for? Thanks for coming in whenever possible.

The production staff, Raleigh, Peggy, Meg, Monica, Ryan and Jill. did we really finish all of those pages in one week? You guys couldn'thave worked more. Greatheadlines and captions! The volunteers came through with flying colors. Thank you.

Thanks to Sonja and her business staff. All that work on groups and greeks couldn't have been more appreciated. Some people can be so difficult. Sonja, we learned so much and I wish you the best next year. Paul, I knew I'd get one hockey player on staff!

Cassie and Ruth, the inseparabletwins, youtwo helped keep the staff together when we all needed it. You two will never forget your long nights in the darkroom. "Yes, Bob is stressing about the anniversary section." "Jenna, someday sweetheart you will find your man, I promise." The wonderful Greeks section was beyond the call of duty. Thanks for all of the talks. To the man I slept with in Dallas. . .Bob, the anniversary and flower arranging pages look beautiful. You have grown so much in the past two years. Your artistic talents will take you far. I wish all of you the best of luck next year.

Millions of thanks to Terry Dugan-Nolan. my ear for all occasions. You helped me in so many ways. When I needed a lift you were there. and not just with your car. You're a rare individual.

Thank you Ellie. Al and Mary Cory for all of the answers to my questions.

Another huge thanks to Mike Hackleman, our Jostens
representative. Who else could I have called four times a day to try and figure out how to do the index? I still say we don't need one. Those long lunches and talks about life were enlightening.

Special thanks to Jim. George. Steve and Theresa at Yearbook Associates for the help with senior photos. They're over with. To the guys at 60 East Chalmers thanks for all of the laughs and tension breaks. See I did have a social life! Thank you also to my family and Helen who endured my frazzled phone calls.

And to the two people I couldn't have lived without, Becky and Joe. I can't thank you enough. Beck, who would have thought you would have spent all of those hours with us in the office. "You know B, it's 4:30 a.m. you can go home if you want to?" We're different, but we get along for some reason. Joe, what can I say? You have lived with me through two years of hell. All of those tears and frustrations just seemed to go away because of you. I love you.

I have to say it has been an unbelievable experience working on the Illio for the last three years. The 100th staff has done an incredible job. The future staffs will look at this year and hopefully learn as much as we did. Good Luck to everyone. I will miss you.

## LAURA LICHTENSTEIN EDITOR-IN-CHIEF

It hardly seems possible that almosttwo years ago I approached the Illio booth at Quad Day in hopes of being a part of the yearbook-and now I've
completed a busy and challenging year as Business Manager. I thought I was prepared, I had no idea what was in store. A warm. humid Quad Day ending in a downpour, seemingly endless weeks of senior portraits. organizing the groups and Greeks page purchases, mailings, ads, telemarketing, receipts and more receipts-it's been an experience! I don't think I'll ever forget when my roommate Chris and I tried to carry the computer, paper, and printer over to University Inn for seniorpictures. When apoliceman stopped and took us the rest of the way, I had several thoughts: we look like idiots, and boy are my arms going to hurt!

I learned so much from this experience that will help mein the future. I don't think anyone can understand what it is like to manage others until you actually do it yourself. Now would be a good time to say a great big THANKS to my staff-Holly, Geena, Nita. Sarah, Paul and Scott. You guys did a wonderful job. Thanks also for putting up with me during times of stress (Wasn't that always?!). I'd like to thank Ellie for all her assistance. WheneverIhadaquestion,I could go to her and she was always willing to help. Bob, thanks for all your help with graphics, especially with the spring mailing. And finally, Laura. It'sbeenreally fun working with you in ourcubby hole office. We' ve come a long way from our whirlwind trip to Massachusetts (first class!!!) to the completion of this 100th edition. I'll miss your sunny disposition in the office next year, good luck in whatever you do!
